

# ANNUNCIATORS

Compatible with all Exit Check® systems, the 101 series annunciators provide door status at a remote location such as a nurse's station, guard station or office. The tri-color LED provides precise delay mode status.

Used in lieu of the standard built-in reset and bypass, the wall mount controls provide a more accessible method of reset and bypass using the existing facility key system. All reset controls must be located adjacent to the door. (Key cylinder not included)

### 101-1A Single Door Annunciator

- Audible alarm
- Tri-color LED status indicator
