OVERHEAD CONCEALED CLOSER

D200 SERIES

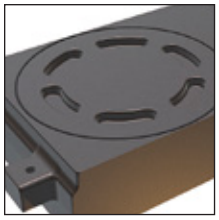

5 YEAR WARRANTY

FEATURES

- **I.D.C.** provides **LEAK-FREE guaranteed performance** under the most demanding conditions.
  1. Steel spring cap is now on top of closer body utilizing a new high performance O-Ring and epoxy sealed threads for double protection.
  2. New automotive type heavy duty spindle seal replacing old standard O-ring technology.
  3. All three adjustment valves now with two high performance O-rings for double protection.
  4. Steel end caps incorporating new high performance O-rings and also epoxy sealed threads for double protection.
  5. Adjustable back check after 80° to prevent the door from slamming open.
- **CENTER HUNG DOORS:** Double or Single Acting (Door stop applied to frame renders unit Single Acting). Adjustable "S" type side loading or "A" type, "K" type and "PT" type end loading top arms are available for center pivoted applications.
- Built-in positive back stop and hold-open positions available:
  - 105° Back Stop with Hold-Open
  - 105° Back Stop - no Hold-Open
  - 90° Back Stop with Hold-Open
  - 90° Back Stop - no Hold-Open
- ADA spring tensions available for use on center pivoted applications:
  - 5 lb. opening force (Interior door)
  - 8-1/2 lb. opening force (Exterior door)
- Standard spring tensions available:
  - **LIGHT, MEDIUM & HEAVY**
- Three control valves: Closing speed, latching speed and back check, fully adjustable after installation.
- Fits in an aluminum header or transom bar as small as 1-3/4" x 4".
- Positive centering for alignment and to hold door closed against any normal wind or draft.
- Stable hydraulic door check fluid for any climatic operation and constant lubrication.

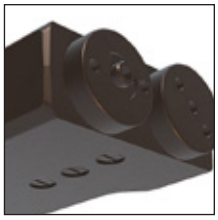

NEW IMPROVED FEATURES

1) Steel spring cap is now on top of closer body utilizing a new high performance O-Ring and epoxy sealed threads for double protection.

2) New automotive type heavy duty spindle seal replacing old standard O-ring technology.

3) All three adjustment valves now with two high performance O-rings for double protection.

4) Now with steel end caps incorporating new high performance O-rings and epoxy sealed threads for double protection.

5) Adjustable back check after 80° to prevent the door from slamming open.

Center Hung Doors: Complete units for aluminum doors and frames are furnished with top arm assembly (adjustable 'S' side loading, "A" end loading, "K" end loading or "PT" end loading), adjustable dual purpose 3010-DP bottom pivot set for floor or threshold mounting (side or end loading) and 3010-FS anchor set with all fasteners. 3010-G and 3010-GE bottom pivot sets are available, but must be ordered separately.

"S" type side loading top arms and 3010-DP adjustable dual purpose pivot set and 3010-FS anchor set will be furnished unless otherwise specified.

"A" type, "K" type or "PT" type end loading and "JO" or "VO" type offset arms are optional, but must be specified.

"G" and "GE" type pivot sets are available, but must be ordered separately.

Offset Hung Doors: Single Acting. Offset "JO" and "VO" type top arms are available for butt hinge or offset pivot applications.

(Offset Pivots or Butt Hinges not included. Top Door Stop/ Arm Cover by others – fabrication drawings available.)

ADJUSTABLE SPRING POWER - OVERHEAD CONCEALED CLOSER

D300 SERIES

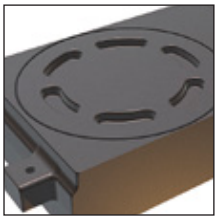

5 YEAR WARRANTY

FEATURES

- **I.D.C.** provides **LEAK-FREE guaranteed performance** under the most demanding conditions.
  1. Steel spring cap is now on top of closer body utilizing a new high performance O-Ring and epoxy sealed threads for double protection.
  2. New automotive type heavy duty spindle seal replacing old standard O-ring technology.
  3. Adjustment valves now with two high performance O-rings for double protection.
  4. Steel end caps incorporating new high performance O-rings and also epoxy sealed threads for double protection.
- **ADA** closer with Adjustable Spring Power for a range of sizes from 5 lb. to 8.5 lb. **LIGHT, MEDIUM & HEAVY**. Spring Tension, fully adjustable after installation.
- Barrier Free Operation to comply with Federal Accessibility Standards (ADA): complying with ANSI A117.1 (4.13.11) available for center pivoted applications.
- Built-in positive back stop and hold-open positions available:
  - 105° Back Stop with Hold-Open
  - 105° Back Stop - no Hold-Open
  - 90° Back Stop with Hold-Open
  - 90° Back Stop - no Hold-Open
- Suitable for both Center Hung (Double or Single Acting) and Offset Doors.
- Two control valves: Closing speed and latching speed, fully adjustable after installation.
- Fits in an aluminum header or transom bar as small as 1 3/4" x 4".
- Stable hydraulic door check fluid for any climatic operation and constant lubrication.
- Optional 3/4" Spindle Available.

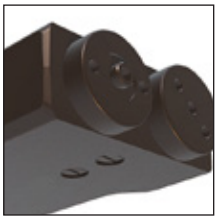

NEW IMPROVED FEATURES

1) Steel spring cap is now on top of closer body utilizing a new high performance O-Ring and epoxy sealed threads for double protection.

2) New automotive type heavy duty spindle seal replacing old standard O-ring technology.

3) Adjustment valves now with two high performance O-rings for double protection.

4) Now with steel end caps incorporating new high performance O-rings and epoxy sealed threads for double protection.

Center Hung Doors: Complete units for aluminum doors and frames are furnished with top arm assembly (adjustable 'S' side loading, "A" end loading, "K" end loading or "PT" end loading), adjustable dual purpose 3010-DP bottom pivot set for floor or threshold mounting (side or end loading) and 3010-FS anchor set with all fasteners.

"S" type side loading, "A" type, "K" type, or "PT" type end loading top arms are available for center pivoted applications.

"A" type, "K" type or "PT" type end loading and "JO" or "VO" type offset arms are optional, but must be specified.

"G" and "GE" type pivot sets are available, but must be ordered separately.

Offset Hung Doors: Complete units for offset pivoted or butt hinged aluminum doors and frames are furnished with a "JO" or "VO" type offset arm (may not meet handicap force requirements) and 3010-FS anchor set with all fasteners .

3010-DP dual purpose radial ball bearing bottom pivot set is standard for floor or threshold center pivoted installation. Optional 3010-GE bottom pivot sets are available, but must be ordered separately.

ADJUSTABLE SPRING POWER - OVERHEAD CONCEALED CLOSER

D500 SERIES

GRADE 1

CERTIFIED GRADE 1
ANSI 156.4

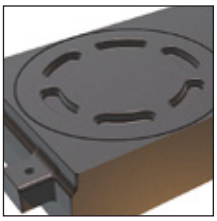

10 YEAR WARRANTY

FEATURES

- **I.D.C.** provides **LEAK-FREE guaranteed performance** under the most demanding conditions.
  1. Steel spring cap is now on top of closer body utilizing a new high performance O-Ring and epoxy sealed threads for double protection.
  2. New automotive type heavy duty spindle seal replacing old standard O-ring technology.
  3. All three adjustment valves now with two high performance O-rings for double protection.
  4. Steel end caps incorporating new high performance O-rings and also epoxy sealed threads for double protection.
- **Certified ANSI 156.4 Grade 1**
- **ADA** closer with Adjustable Spring Power for a range of sizes from 5 lb. to 8.5 lb. **LIGHT, MEDIUM & HEAVY**. Spring Tension, fully adjustable after installation.
- Barrier Free Operation to comply with Federal Accessibility Standards (ADA): complying with ANSI A117.1 (4.13.11) available for center pivoted applications.
- Built-in positive back stop and hold-open positions available:
  - 105° Back Stop with Hold-Open
  - 105° Back Stop - no Hold-Open
  - 90° Back Stop with Hold-Open
  - 90° Back Stop - no Hold-Open
- Suitable for both Center Hung (Double or Single Acting) and Offset Doors.
- Two control valves: Closing speed and latching speed, fully adjustable after installation.
- Fits in an aluminum header or transom bar as small as 1 3/4" x 4".
- Stable hydraulic door check fluid for any climatic operation and constant lubrication.
- Optional 3/4" Spindle Available.

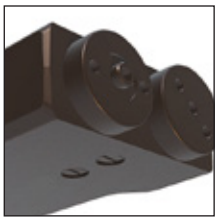

NEW IMPROVED FEATURES

1) Steel spring cap is now on top of closer body utilizing a new high performance O-Ring and epoxy sealed threads for double protection.

2) New automotive type heavy duty spindle seal replacing old standard O-ring technology.

3) All three adjustment valves now with two high performance O-rings for double protection.

4) Now with steel end caps incorporating new high performance O-rings and epoxy sealed threads for double protection..

Center Hung Doors: Complete units for aluminum doors and frames are furnished with top arm assembly (adjustable 'S' side loading, "A" end loading, "K" end loading or "PT" end loading), adjustable dual purpose 3010-DP bottom pivot set for floor or threshold mounting (side or end loading) and 3010-FS anchor set with all fasteners.

"S" type side loading, "A" type, "K" type, or "PT" type end loading top arms are available for center pivoted applications.

"A" type, "K" type or "PT" type end loading and "JO" or "VO" type offset arms are optional, but must be specified.

"G" and "GE" type pivot sets are available, but must be ordered separately.

Offset Hung Doors: Complete units for offset pivoted or butt hinged aluminum doors and frames are furnished with a "JO" or "VO" type offset arm (may not meet handicap force requirements) and 3010-FS anchor set with all fasteners.

3010-DP dual purpose radial ball bearing bottom pivot set is standard for floor or threshold center pivoted installation. Optional 3010-GE bottom pivot sets

5 YEAR WARRANTY

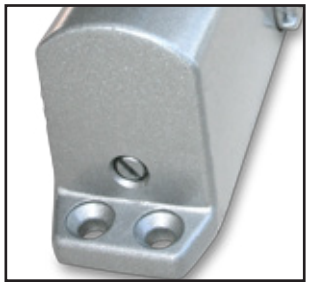

FEATURES

- Series 880 has adjustable Back-Check function controlled by a separate regulating valve, adjustable after installation.
- Underwriters' Laboratories Inc. Listed.
- Range of sizes:
  - **Standard:** 851, 852, 853, 854 and 855
  - **Back-Check:** 883, 884 and 885
- Two Adjustment Valves: Closing and Latching speeds controlled by separate regulating valves, adjustable after installation.
- Non-handed for standard, top jamb or parallel arm installation.
- Available with regular, hold-open or fusible link hold open arms.
- Regular arms are equipped with a 15% (+)(-) 7½% power adjustment bracket.
- Hold-open arms are adjustable for holding from 90° to 180°.
- Rack and pinion mechanism contained in a high tensile precision cast aluminum housing assures the highest quality.
- Stable hydraulic door check fluid for any climatic operation and constant lubrication.
- Narrow design permits installation on most modern glass and aluminum doors without adaptors.

- 850 & 880 Series Closing and Latching Adjustment Valves

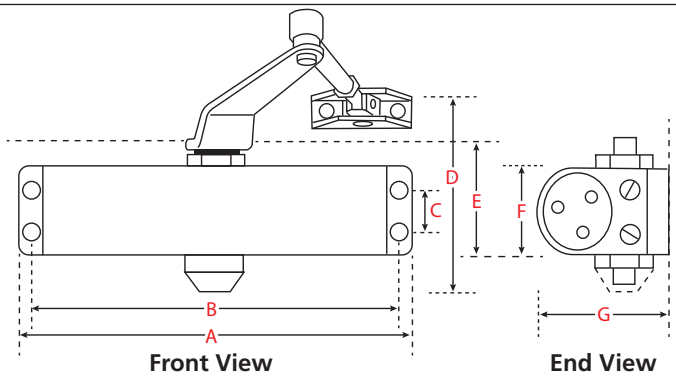

- 880 Series Back-Check Adjustment Valve

SPINDLE

A range of interchangeable spindles is available to provide greater floor clearance if required (e.g. door with thresholds, carpeted floors etc.)
Special spindles available on application: e.g. with flat face profile and 3· offset or square section ; spindles for MAS specific accessory also available.

Calculating the necessary length of spindle extension:
Extension S : Floor clearance (normally 8mm)
Collar height T of extended spindle inserts : Spindle extension length + 3mm (collar of the standard spindle insert)

FLOOR SPRINGS

ST80 SERIES

ADJUSTABLE • LARGE AND HEAVY DOOR

FEATURES

- Closing from 175° in both door swing directions with hydraulic control from 170°.
- Three thermodynamic valves for consistent performance.
- Adjustable closing speed (175°-15°) and latching speed (15°- 0°) from lop regulating valves.
- Adjustable hold-open or delay action angle 80°- 175°.
- Cast iron body
- Cement box in hot zinc plated.
- Universal cover plate in stainless steel.
- Extended spindle.

Floor spring with adjustable closing force for large and very heavy doors. Certified compliance with EN 1154 Adjustable size 3-6 or fixed 4, 5, 6 Suitable for fire and smoke protection doors (No fire test conducted yet) For double and single action door up to 661lbs

THE ADVANTAGES OF A GLANCE

Project Planners	Extensive range of uses: Fire and smoke protection doors as well as standard doors. Variable hold open between 80°-175° or delay action. Independent closing and latching valve for easy control. Variety of available spindles: square Italian, square French, rectangular German. Architectural finishes: cover plate in polished stainless steel, satin stainless steel, polished brass.
Builders	Universal for left/right handed and double action doors. Over pressure relief valve to protect unit against abuse. Large range of adjustment within cement box to solve possible alignment problems on the site without taking down the door. Meet door weight up to 661lbs.
Traders	Reduced inventory costs due to modular product range. One single product suitable for a large variety mounting positions. Complementary accessories available for the whole product range. Extensive interchangeable.
User	Adjustable operating force to meet door construction requirements and user needs. Easier door opening and improved accessibility due to Gam-Motion technology. Backcheck feature offers optimum protection for doors and walls, Independent closing and latching valve for easy control variable hold open range

PEDESTRIAN GATE CLOSER

SWINGER 300

HYDRAULIC

5 YEAR WARRANTY

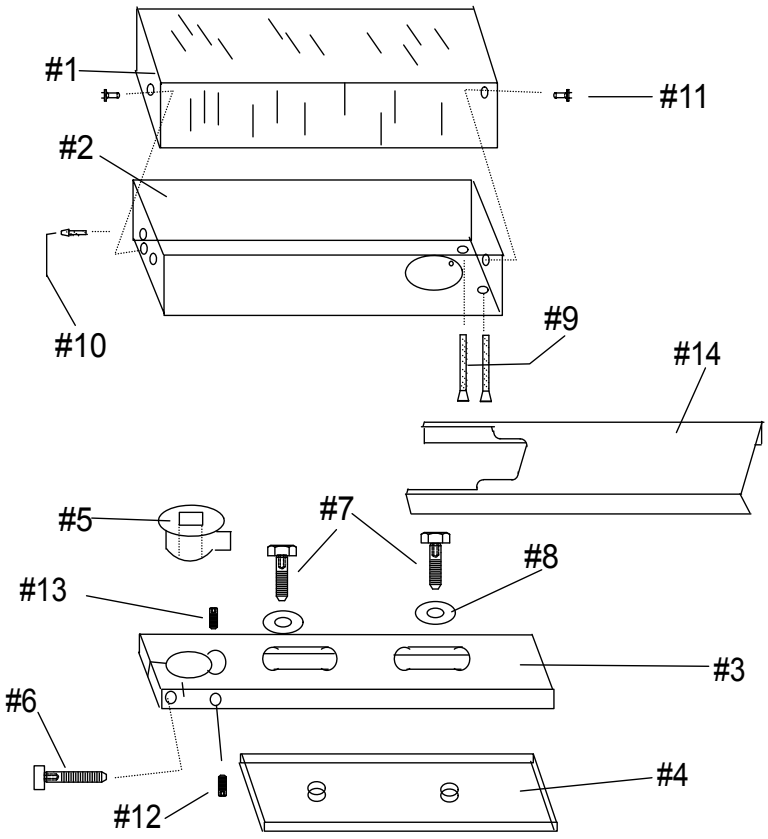

FEATURES & ADVANTAGES

- Tough, Dependable and Vandal Resistant.
- 2" x 4" x 12" 16 gauge galvanized Steel housing.
- Gate closer manufactured for pedestrian gates.
- Two Separate Closing and Latching valves adjustable after installation without removing the closer.
- Adjustable spring power to accommodate various size gates.
- Non Handed (right or left swing).
- Opens to full 105 degrees.
- Fully adjustable top arm for proper gate alignment.
- Adjustable zinc plated Bottom Hinge with sealed ball bearings rated for 350 lbs. Slotted Yoke for Adjustability.
- Designed to close gate into its latch position without slamming.
- Smooth operation.
- Factory tested to over 1,000,000 cycles.

CHAIN TENSIONER

Series IDC4041

Model 4041-1 & 4041-2

FEATURES

- **STRONGER:** Higher tensile strength than the roller chain, tested up to 8000LBS.
- **SAFER:** No more threaded rods protruding from the chain bracket.
- **CLEANER:** Can be painted or powder coated to match gate color.
- **LONG LASTING:** Captures roller chain.
- **EASY TO USE:** Easy to install and adjust chain tension.
- **SMARTER:** Eliminates costly service calls due to master link or tension bolt failures

ELECTROMECHANICAL GATELOCK FOR ACCESS CONTROL

GL160/GL260 GATELOCK

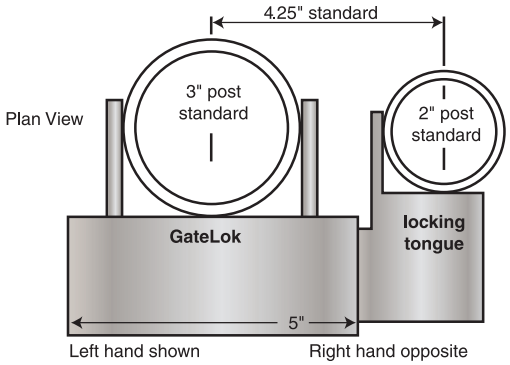

FOR TUBULAR STEEL AND WROUGHT IRON GATES

Electromechanical GateLock for Access Control of Tubular Steel and Wrought Iron Gates

Higher Security than Electromagnetic Locks

Made in the USA

The IDC GL160 and 260 series electromechanical GateLoks are designed to provide access control and remote locking and unlocking capability for manual or automatic chain link, tubular steel and wrought iron sliding or swinging gates.

Available in either failsafe (locked when energized) or failsecure (unlocked when energized) the electromechanical GateLok provides a higher degree of security than electromagnetic locks. Locking and unlocking may be accomplished with an access control such as a card reader, digital keypad or remote control.

All GateLoks are designed for a 3" (76mm) fence post and 2" (51mm) gate post and are adaptable to smaller sizes.

Features

- Higher Security than Electromagnetic Locks
- Solid Stainless Steel 0.625" (15.9mm) diameter locking bolt
- Continuous duty operation
- Low current draw
- Auto relock switch
- Heavy gauge 0.125" (3.2mm)
- Weather sealed steel housing
- Access control compatible

Operation

The GL160A/GL260A GateLocks may be unlocked by an access control and remote control. While handing is required they are field reversible.

The GL163A GateLock may be unlocked by an access control, remote control and built-in keyswitch. Handing is required and they are not field reversible.

The GL263A GateLock may be unlocked by an access control, remote control and built-in mechanical key. The mechanical key is for momentary override and does not maintain a sustained unlocked mode. Handing is required and the lock is not field reversible.

Standard with all GateLocks the adjustable Auto Relock Switch keeps the bolt retracted until the gate is in the closed position.

Models

GL160AI	Failsafe, 12/24VDC
GL163AI	Failsafe, built-in keyswitch 12/24VDC
GL260AH	Failsecure 12/24VDC
GL263AH	Failsecure, built-in keyswitch, 12/24VDC
GL260MRAH	Failsecure, mechanical key release, 12/24VDC

Mortise key cylinder provided by others.

Hand

LH Left Hand **RH** Right Hand

Options

D	Gate position sensor SPDT, 10Amp @ 30VDC
B	Bolt lock position sensor, 10Amp @ 30VDC
BR64XL	Rectifier for AC operation

Specifications

Size	5"W x 6.5"H x 2"D (127 x 16.5 x 50.8mm)
Material	0.125 (3.2mm) Steel
Bolt	0.625" dia. x 0.625" throw (15.9mm x 15.9mm)
Key Cylinder	ANSI 1.125" or 1.250"

Standard or interchangeable core mortise key cylinder. Provided by others.

Failsafe	12/24 VDC 900/450mA
Failsecure	12/24 VDC 900/450mA

SLIDING DOORS

ENTRA-SLIDE SL10.4L

NO WHEELS NO TRACKS

LINEAR BEARING MOTION BELT DRIVE

FEATURES AND BENEFITS

- A self-supporting structural header with full hinged covers
- A microprocessor control with self-diagnostic 13 LED light visual indicators.
- Full break-out capability
- Full vertical height interlock with double weather strip seal
- Electronic locking device

International Door Closers offers automatic and manual sliding door systems to answer any entrance requirements

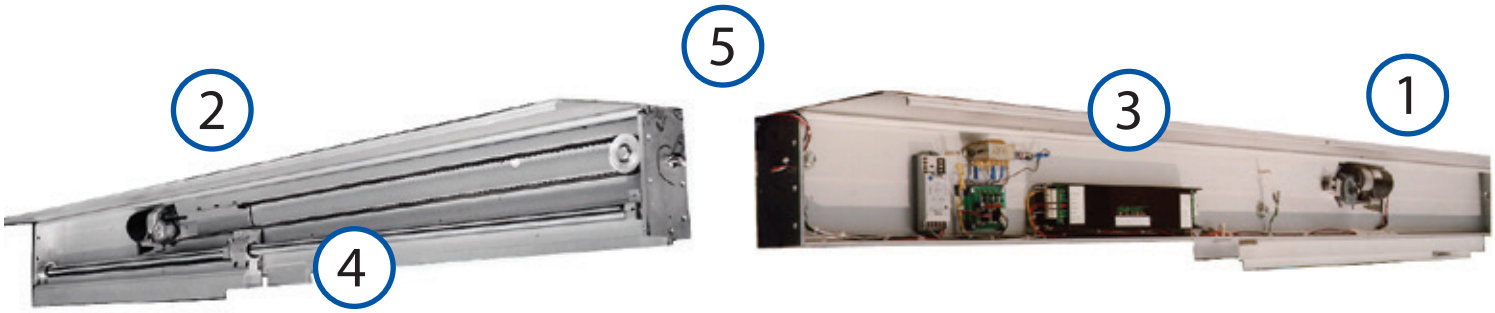

TECHNICAL FEATURES:

- RELIABLE AND SAFE OPERATION
- EASY INSTALLATION AND SERVICE
- HIGH SPEED & SMOOTH OPERATION
- USER FRIENDLY LCD-DISPLAY FOR SETTINGS AND ADJUSTMENTS
- LOWER COST OF OWNERSHIP
- FULL VERTICAL HEIGHT INTERLOCK WITH DOUBLE WEATHER STRIP SEAL
- HI-TECH BEARING MOTION
- MEETS **ANSI A156.10** GUIDELINES FOR COMMERCIAL APPLICATIONS
- EASY MANUAL SLIDE OPERATION IN CASE OF POWER FAILURE
- BRUSHLESS DC-MOTOR AND ENCLOSED HYPOID GEAR SYSTEM
- MICROPROCESSOR CONTROL WITH SELF-DIAGNOSTIC CONTROL BOARD
- ELECTRONIC LOCKING DEVICE

WE ARE REVOLUTIONIZING ACCESS CONTROL WITH ONE SIMPLE SOLUTION

CAMERA S15

Discreet. Flexible. Hemispheric.

- **OPTIONAL ELECTRONIC LOCKING AND CARD READER ENTRY.**
  The industry's first panel-free IP reader controller to deliver true Power Over Ethernet, our PowerNet Reader provides the freedom to secure an unlimited number of doors without the hassle of having to wire panels or hubs.
- **OPTIONAL BATTERY BACKUP FOR UP TO ½ HOUR OF CONTINUOUS USE**
- **OPTIONAL PAINTED FINISH, POWDER COATED FINISH OR CLAD FINISH**
- **CUSTOM SIZES (CSTM) AVAILABLE, PLEASE CONSULT FACTORY FOR LIMITATIONS**

- HOLD HARMLESS INDEMNIFICATION AGREEMENT OFFERED TO END USERS. (WITH THE USE OF HIGH RESOLUTION CAMERA)
- DECENTRALIZED CONCEPT WITH MICRO SD CARD THUS ALLOWING LOWER NETWORK BANDWIDTH.
- FULL IMAGE RECORDING WITH PTZ CAPABILITIES VIA SOFTWARE (NO MOVING PARTS).
- FREE VIDEO MANAGEMENT SOFWARE (MX EASY) FOR LIFE. (NO LICENSING FEES)
- CAMERAS HAVE MICROPHONE / SPEAKER PHONE CAPABILITIES BUILT IN.
- HEMISPHERIC DUAL LENS ALLOWING TO SIMULTANEOUSLY SECURE TWO SEPARATE ROOMS WITHOUT ANY BLIND SPOTS.

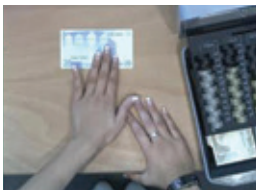

IXIO ACTIVATION AND SAFETY SENSOR FOR AUTOMATIC SLIDING DOORS

The IXIO combines microwave radar technology for the activation of the door with infrared technology for pedestrian safety. The unidirectional radar provides energy savings and an infrared curtain for sliding door safety as pedestrians pass through the threshold.

AUTOMATIC CURVED SLIDING DOOR

SLIDING DOORS

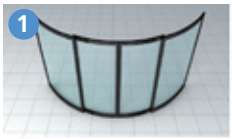

CREATIVE APPLICATION

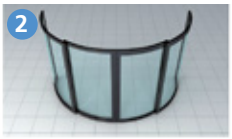

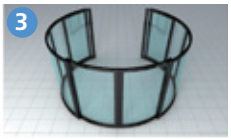

AUTOMATIC CURVED SLIDING DOOR KC1000

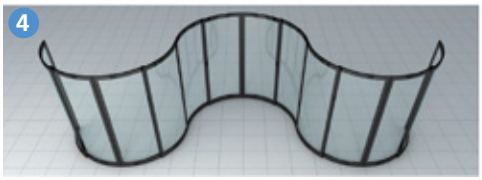

Curved sliding doors are becoming a more and more popular option due to its outstanding performances, such as various appearance, multi-function, energy-savings and environmentally friendly.

KC1000's Four Types

1. **Segmental Curved Sliding Door**
2. **Semi-Circular Curved Sliding Door**
3. **Circular Curved Sliding Door**
4. **Combined Curved Sliding Door**

ATM Security Revolving Door

Based on the curved sliding door, IDC/KBB developed ATM security revolving door, to which automatic lock, intelligent open/close and panic breakout are added. Meanwhile, customization of appearance designing makes it a perfect companion to ATM.

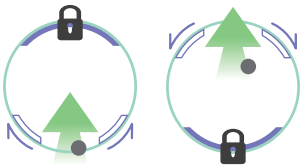

Solution 1

Interlock

Interlock refers to the status of one door leaf being locked while the other remains open during the curved sliding door's motion. This function is widely applied for:

Solution 2

Energy-savings:
While the interlock function does not allow for two door leaves to be open at the same time, it is optimal to control the indoor and outdoor air exchange. This contributes to significant energy control and savings for a building.

Access control:
The Interlock function upgrades a curved door into a security portal through a sophisticated coordination system of switches and sensors. There is a double ID authentication and video analysis systems to prevent restricted access. The interlock system comprehensively ensures safety to the building through its doors.

SPECIFICATIONS

Power Source	220V ±10%, 50/60Hz
Rated Power	200W (Double Leaves), 100W (Single Leaf)
Main Fuse	2A
Maximum Drive Power	150N
Opening Speed	0.4~0.7m/s
Closing Speed	0.3~0.6m/s
Ambient Temperature	-15°C~50°Cs

SECURITY CURVED PORTALS

SLIDING DOORS

MULTIPLE SAFETY PROTECTION

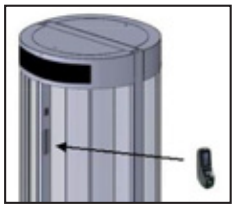

Interlock & Anti-Tailgating
& Anti-Piggybacking

SECURITY CURVED PORTALS

1. Facial and weight recognition, strong anti-tailgating & ant-piggypacking function.
2. Mutiple safety protection device, voice promot to assure the pedestrian security.
3. Energy-saving and environmental protection.
4. Automation control design, contactless access without secondary pollution.
5. Remote control is available for doors open, realize pass quickly.
6. Multifunction LED monitor: WELCOME, WETHER REPORT, NOTIFICATION.....
7. Save for two security guard salary, no closing all the 24 hours day.

Fingerprint Scanner
and Infrared Switch

Facial Recognition

1. Enter-Outer door open

2. Confirming pedestrian

3. Security judgement

4. Enter-Inner door open

5. Tailgating-Inner door closed.

6. Exit-Inner door open

7. Confirming pedestrian

8. Exit-Outer door open

9. FastPass mode-Keep open

10. Emergency mode

Remark:
2.**Confirming pedestrian:** Confirm by finger/facial/weight recognition.
5.**Tailgating-Inner door closed:** If any person tailgating, the second door keep closed, alarm warning and voice prompt.
7.**Confirming pedestrian:** Confirm by finger/facial/weight/card reader recognition.
10.**Emergency mode:** When emergency or fire alarm activated, the door open automatically to 10cm, even women or children can open the door easily manually.

Interlock Function

One door leaf being locked while the other remains open during the curved sliding door's motion.

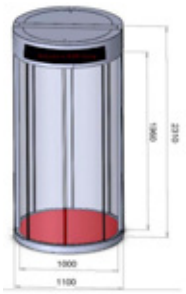

Solution 1
Energy-savings

Solution 2
Access control

AUTOMATIC

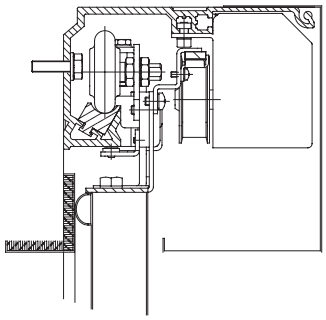

SLIDING DOORS

PROFESSIONAL HERMETIC SLIDING DOOR

KH1000

KH1000 is a professional hermetic sliding door developed by IDC/KBB and applies to special locations, which demand excellent airtightness, sound isolation, and radiation protection.

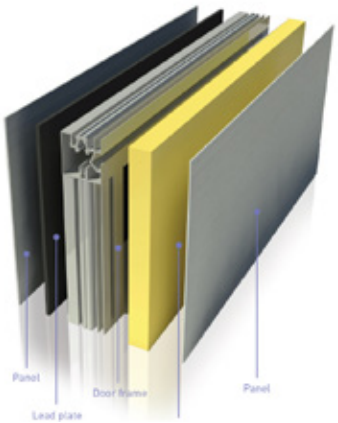

KH1000 uses polyurethane high-pressure forming technology, which allows the door to be lighter, while strengthening sound and heat isolation, and energy savings. It has been highly welcomed for its dustproofing, fire-proofing, air-proofing and radiation protection.

SPECIFICATIONS

Clear Passage Width	23 5/8"~59 1/16" (600~1500mm)
Clear Passage Height	82.68"~102.36" (2100~2600mm)
Maximum Opening Force	120kg
Power Supply	220V ±10%
Rated Power	100W (Single Drive)
Ambient Temperature Range	-15°C~55°C
Relative Humidity	≤85%
Operating Noise	≤50db

IDC/KBB hermetic sliding doors use a specially designed track along with special rubber attached to the inside and downside of the door. In the closing process, the door compresses the rubber to the frame achieving the hermetic effect.

Anodizing

IDC/KBB keeps the strictest and highest standards in its process. The finish of the anodized aluminum is no exception, offering more than twenty different choices of color and surface texture finishing. Other standards of this stainless material include its wear-resistance, corrosion resistance, electrostatic prevention, amongst other features to meet different architectural styles and demands.

Stainless Steel Cladding

REVOLVING DOOR

AUTOMATIC TWO-WING REVOLVING DOOR

ABOUT REVOLVING DOORS

Revolving doors offer an impressive aesthetic appearance and effectively separate indoor and outdoor conditions. IDC/KBB's superior designs provide an imposing entrance to any building, while serving as an airlock as well, to minimize a building's heating and air conditioning losses, therefore maximizing energy savings. There are numerous variations and functions according to the needs passing.

Revolving doors are categorized in two different categories according to the way they revolve: two-wing doors and three/four-wing doors. Each door consists of a glass body with an aluminum frame. The operation of the doors can be manual or automatic.

KA022

Comparing with ordinary revolving doors, the KA022 revolving doors provide the highest safety assurance as they adopt IDC/KBB's exclusive "drum wall load-bearing" structure. It is the firmest two-wing door across the world and has the strongest ability to evacuate. The unique design allows the doors to bear even and run steady providing superior safety. A key feature included is the panic breakout exit function for safe and efficient evacuations.

THREE IN ONE

Revolving Door:
The revolving door design effectively controls indoor and outdoor air exchange. Energy consumption is lowered due to the controlled environments in air conditioning and heat preservation. Other benefits of these doors are the wind proofing, ash proofing and noise reduction

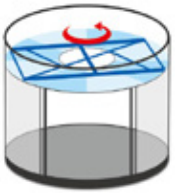

Sliding Door:
Sliding door Incorporated within a revolving door can provide a more efficient flow for faster and heavier pedestrian traffic.

Balanced Door:
Balanced door Is able to provide maximum opening width for peak flows, large cargo and evacuation situations.

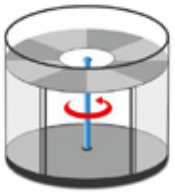

Two-wing automatic revolving doors
The door wings of two-wing doors are fixed to the H-girder which can drive the door wings.

Three/four-wing revolving doors
The door wings of the three/four wings revolving doors are fixed to the central axis which can drive the door wings.

DRUM WALL LOAD-BEARING

The KA022 doors use IDC/KBB's exclusive "drum wall load-bearing" structure. This is the essential element to keep the structure safe and of superior quality. Compared with other two-wing doors that are pole-bearing, the KA022 provides a door with better stability.

REVOLVING DOOR

AUTOMATIC TWO-WING REVOLVING DOOR

Emergency Stop Button:
The emergency stop button is able to stop movement of the automatic door under any circumstance, ensuring safety of the passerby In case of emergency.

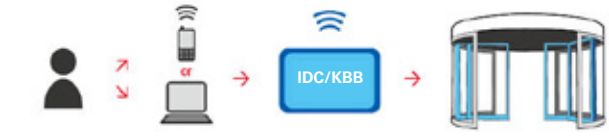

Key Switch:
The key switch has three modes: Revolving Door, Sliding Door and Remote Controlled Door.

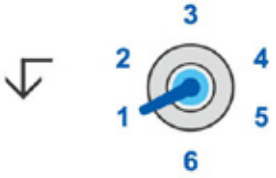

LED:
The LED lighting panel displays the operating state of the door, and shows possible error codes for troubleshooting.

Disabled Push Button:
The disabled button can control the speed of the door and stow It down for the safety of younger, older and disabled passersby.

Backup Battery:
The backup battery ensures normal operations when the door is powered off.

Mobile Phone/Internet Monitoring:
IDC/KBB's unique control software can be used to facilitate the management of the door through mobile phones or the Internet. With this feature, the manager has remote operation functions and is able to monitor the operation status and alarms.

Program Selector

The switch allows the user to control the operating state of the door through six programs depending on their needs.

Night lock
In this position, the door stops after automatically revolving to the Night Lock position. The electromechanical lock is then triggered to lock the door, keeping the building safe.

Opening Position Stop/Start
The key switch has three modes: Revolving Door, Sliding Door and Remote Controlled Door.

Closing Position Stop/Start
In this position, the door will automatically stop in the closing position when nobody passes by. When the door is approached upon, infrared radars will be activated and the door will revolve for one circle (and continue when people walk through). This setting is ideal for difficult weather conditions and when the temperature difference is more significant.

Low/High Speed
In this position, the automatic door will revolve slowly (0.5~2.5 c/min, adjustable) when no one is passing by. When the door is approached upon, infrared radars will be activated and the door will revolve for one circle (in a higher speed, to allow a more efficient passage). This setting is ideal for difficult weather conditions and when the temperature difference is more significant.

Revolving Counter-Clockwise Manually
In this position, the infrared radars are disabled and the door stops revolving. The doors will revolve slowly in a counter clockwise direction when the reset button is pushed. In this position, the door can be pushed to operate (force: 110~150N). This setting is most suitable for cleaning and maintenance.

Revolving Clockwise Manually
In this position, the infrared radars are disabled and the door stops revolving. The doors will revolve slowly in a clockwise direction when the reset button is pushed. In this position, the door is to be pushed to operate. This setting is most suitable for cleaning and maintenance. This function also ensures that any trapped object can be safely removed

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

ADVANCED SAFETY DESIGN

Safety Relay
The safety relay can monitor whether the compressible horizontal safety buffer works at any moment. An alarm will sound when the buffer breaks down.

Torque Control Function
When the distance between the moving door wing and the fixed one is less than a certain space, the driving force will be reduced. At this point, users entering the space will not be hurt.

Mechanical Axis Braking Driving
The rotary table and the motor brake at the same time, providing the passerby complete safety in case of an emergency.

Emergency switch Function
To ensure complete safety, a UPS power supply is incorporated in case of emergencies. When the passengers are trapped inside a door, this function can make the door open.

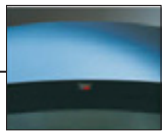

Anti-Collision Sensor
In case of a person or object obstruction, the system will stop and the door will halt. This sensor is operational at all times.

Anti-Squeeze Sensor
When the from safety switch on the door comes within 27 9/16" (700mm of the outer safety rubber (distance can be adjusted), the sensor function becomes active. If there are any people or object obstructions within the limit range at this time, the system will stop and the doors will halt.

Radar
When detecting moving objects, sensor will be activated and the door starts to operate.

Vertical Safety Switch
When detecting moving objects, sensor will be activated and door starts to operate.

Sliding Door Anti-Squeeze Sensor (Ensure the safety of passengers when the sliding door operates)
When operating the sliding door, if the sensor is activated, the sliding doors will automatically reverse direction, avoiding squeezing the pedestrian.

Photo Cell
Six total. if a pedestrian is sensed, the doors will immediately reduce speed, brake and finally stop.

Foot Sensor (optional)
Installed below the compressible horizontal safety buffer, this sensor helps protect pedestrian.

REVOLVING DOOR

AUTOMATIC TWO-WING REVOLVING DOOR

IDC/KBB offers different series of two-wing doors to fulfill its consumer's requirements and expectations.

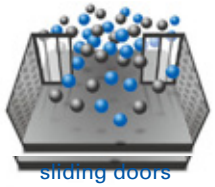

ENERGY-SAVING AND ENVIRONMENT-FRIENDLY

IDC/KBB's revolving doors use an unique design referred to as windmill revolving body. Its revolving direction is consistent with that of the wind. The design cuts of the exchange of indoor and outdoor air, allowing for cost and energy savings of 10% or more than other revolving doors. It is estimated that the cost of a IDC/KBB two-wing automatic revolving door is equivalent to the money it saves in three years.

Through simple calculation you will find the price difference of revolving doors and sliding doors is equal to the energy consumption cost saving of 2-3 years by using revolving door instead of sliding door.

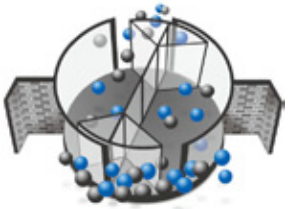

As for the sliding doors, the amount of air exchanged varies according to the size of the area, time of the opening of the door and the speed of airflow.

= Air

sliding doors

The air exchange for revolving doors depend only on the inside air volume and the number of times the doors open.

REVOLVING DOOR

THREE / FOUR-WING REVOLVING DOOR

ABOUT REVOLVING DOORS

Revolving doors offer an impressive aesthetic appearance and effectively separate indoor and outdoor conditions. IDC/KBB's superior designs provide an imposing entrance to any building, while serving as an airlock as well, to minimize a building's heating and air conditioning losses, therefore maximizing energy savings. There are numerous variations and functions according to the needs passing.

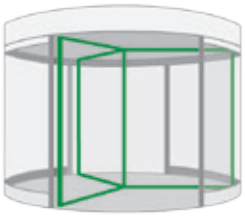

Revolving doors are categorized in two different categories according to the way they revolve: two-wing doors and three/ four-wing doors. Each door consists of a glass body with an aluminum frame. The operation of the doors can be manual or automatic.

KA023

The KA023 are elegant and economical three/ four-wing revolving doors. More than just granting the entry and exit of heavy passing traffic, the KA023 marks the highest standards in wind-proofing, dustproofing, warm-keeping and energy-saving. In summary, they can be regarded as the safest three/ four-wing revolving doors in the world and an excellent choice by exceeding the expectations of customers and architects. KA023 comes in three operational modes: manual, automatic, and manual/automatic activation driving; and two driving models: top and underground driving.

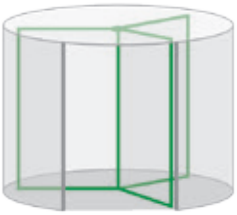

KA023/KM023

Classic Door

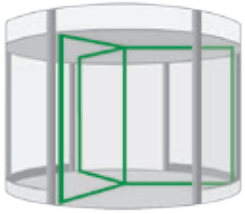

KA071/KM071

All-glass Door

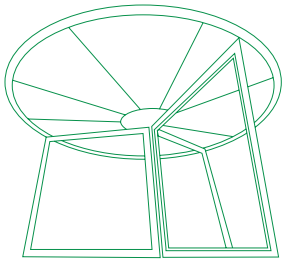

KA061/KM061

Drum-Wall-Pillar Decorated Door

DRUM WALL LOAD-BEARING

One of the outstanding features in the KA023 doors is IDC/KBB's exclusive drum wall loadbearing structure. This component is essential to increase structural safety and overall quality, allowing for the door to have better stability, especially when comparing the doors with other two-wing pole bearing doors.

REVOLVING DOOR

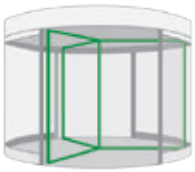

THREE / FOUR-WING REVOLVING DOOR

MANUAL REVOLVING DOOR

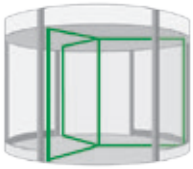

Manual revolving doors are separated in two categories: three-wing and four-wing doors, which do not require electric power and will never suffer from severe weather conditions. IDC/KBB's manual revolving doors are also equipped with an exclusive speed controlling device that allows the door to operate safely. Simultaneously, other standards such as energy-saving and dust proofing are maintained to the best level keeping the most competitive price.

KM023

KM071

KM061

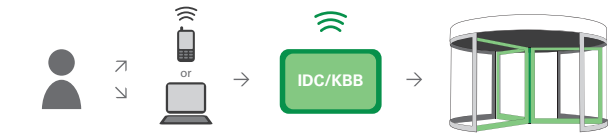

The Speed Control Function

IDC/KBB's original speed limitation patent ensures safety as it prevents the doors from rotating too fast. This mechanical system is safer and more reliable compared to other electric operated devices.

AUTOMATIC REVOLVING DOOR

The difference between automatic and manual revolving doors is that the automatic doors are equipped with drive units and sensor systems, which make the door operate automatically Three/four-wing doors are cost-efficient, and are commonly used in banks, shopping centers, hotels, office buildings, amongst others.

Administrator | Signal / Network | IDC/KBB's unique controlling software | Revolving Door

Anti-Squeeze Sensor:
The anti-squeeze sensor will stop the door immediately when activated.

Key Switch:
Automatic doors can be operated through three different functions: night lock, go-stop and continous revolving. *(Note) The go-stop, the door will automatically revolve (through sensor activation) when the door is approached upon. This setting is ideal to reduce energy consumption.*

Fire Alarm Function:
The pre-installed signal output also allows for the door to be connected to the fire system in the building. When the door receives a fire alarm signal, the revolving door will automatically switch to the emergency open mode.

Disabled Access Function:
The low-speed button is used to control the speed of the door and slow it down for the safety of younger, older and disabled passersby.

Emergency Stop Function:
The emergency stop button is able to stop movement of the automatic door under any circumstance, ensuring safety of the passersby in case of any emergency.

Mobile Phone / Internet Monitoring:
IDC/KBB's unique control software can be used to facilitate the management of the door through mobile phones or the internet. With this feature, the operator could monitor the operation status and alarms of the door.

REVOLVING DOOR

CRYSTAL ALL GLASS

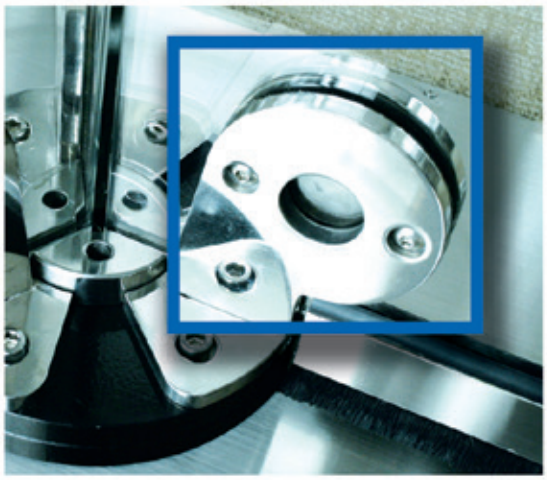

KA071 CRYSTAL DOOR

KA071 crystal door is made of a special safety glass, featuring a unique structure and an impeccable appearance. As the door is designed without a central column, clearer visibility allows it to become sparkling and more elegant. With IDC/KBB's unique music note style clamp, the KA071 door incorporates exceptional mechanics with aesthetics, increasing both safety and beauty.

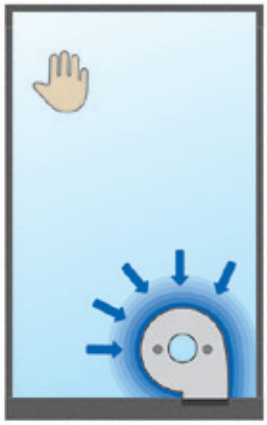

Music Note Style Clamp

The music note style clamp is one of IDC/KBB's most distinguished patents.

Before the emergence of the music note style clamping system, most of the crystal doors use the conventional square clamping system. However, the traditional square clamp is unable to decentralize the pressure effectively, weakening the glass a round the clamp, and therefore creating safety hazard. The music note style clamp is named after its appearance, similar to one of the musical notes. The clamp's round shape makes the bearing points of the edge distribute pressure equally, keeping the door body steady and firm. This system has proven an impeccable safety record for IDC/KBB's crystal doors.

SECURITY & ADVANCED SAFETY FUNCTIONS

IDC/KBB's three/four-wing revolving doors can be equipped with a security system for access control. Access could only be granted to those with authorized cards.

Following Prevention

In order to ensure that only the authorized person is granted access through the security door, the door rotation will only allow access to the individual with the access card. Any person attempting to follow the first user would be locked inside the door as the door will stop and sound a warning.

Video Analysis

Advanced video analysis software is used to ensure that only one person passes through each passage space. The alarm system of the security door would be triggered off in the case that two or more people breach access through the same passage space.

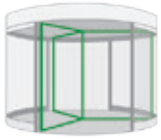

Pass Indication

The passersby can be indicated whether they are authorized to pass by a set of LED lights mounted on the curved wall of the revolving door. When the green light shows, it means that the user is granted access whereas the red light denies it.

Pass Identification

IDC/KBB products provide various of identification systems, including card reader system, finger print reader system and so on, to ensure only identified people can get free access into the buildings. Meanwhile, the systems also help to track the record easily and accurately.

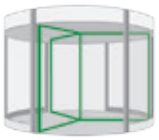

Applied for:

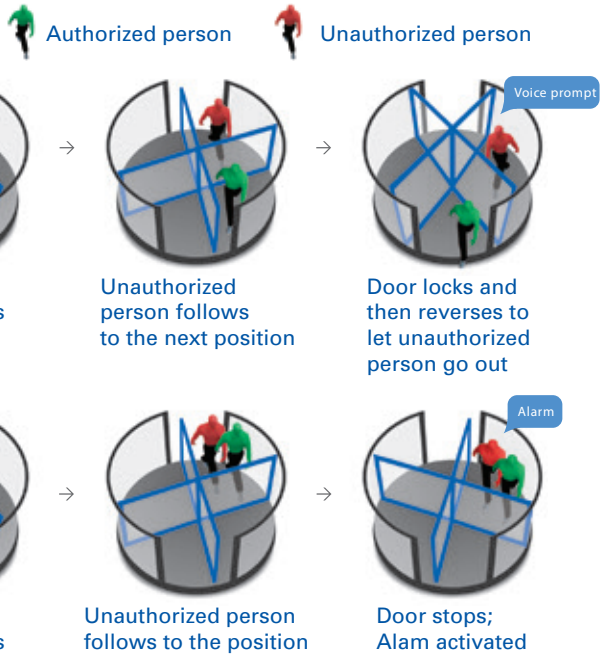

KM023

KM071

KM061

IDC/KBB mainly provides two kinds of swiping-card poles.

ADVANCED SAFETY FUNCTIONS

Force-Sensitive Door Leaf

If the resistance that the revolving wings encounter exceeds a preset value (adjustable), the automatic door will stop revolving to ensure safety and to protect the door at the same time.

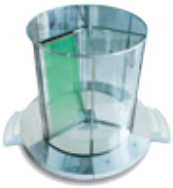

Torque Control Function

When the gap to the closing position is less than a certain distance, the driving force of the driving system will be reduced. So even if a passerby tries to rush in, he will not be injured.

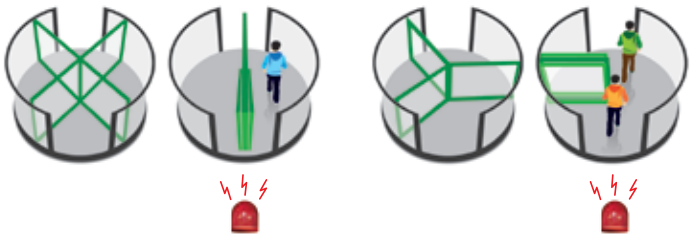

Horizontal Safety Light Barriers

The anti-collision light battiers installed on top of the revolving wings allow the doors to brake when any passersby or objects are detected within a defined scale.

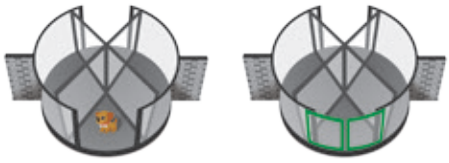

Breakout Function

Night Security Door

Depending on customer preferences, two curved doors can be added outside the drum wall to close the whole revolving door system when needed. This option provides extra protection to the building and the door.

REVOLVING DOOR

SURFACE TREATMENT

Anodizing

IDC/KBB keeps the strictest and highest standards in its process. The finish of the anodized aluminum is no exception, offering more than twenty different choices of color and surface texture finishing. Other standards of this stainless material include its wear-resistance, corrosion resistance, electrostatic prevention, amongst other features to meet different architectural styles and demands.

Stainless Steel Cladding

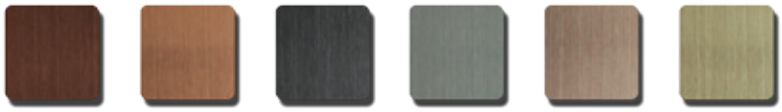

- **Mirror surface**

- **Satin pattern**

- **Hair pattern**

- **Carving pattern**

- **Arenaceous pattern**

Coating

IDC/KBB provides two kinds of coating: electrostatic coating and coated by fluorin and carbon.

ATM SECURITY DOORS

KC3000 SPECIFICATIONS & TECHNICAL PARAMETERS

KC3000

Based on the curved sliding door, IDC/KBB developed ATM security revolving door, to which automatic lock, intelligent open/close and panic breakout are added. Meanwhile, customization of appearance designing makes it a perfect companion to ATM.

SPECIFICATIONS

Total height	2330mm
Opening width	580mm
Passage height	2050mm
Canopy height	230mm
External diameter (Outdrum)	1192mm
Internal diameter (Outdrum)	1112mm
Installation foundation internal diameter (Base)	739mm
Installation foundation external diameter (Base)	947mm
Product weight	300KG
Installation foundation height	50mm
Door overall size	1200mm (L) x1070mm (W) x 2330 (H)

TECHNICAL PARAMETERS

Rated Voltage	220V/AC ±10% 50Hz
Rated Power	120W
Lighting Power	9W
Maximum Driving Force (static)	150N
Opening Speed	0.16-0.46 m/s
Closing Speed	0.11-0.24 m/s
Keep Opening Time	0 -10s
Night Keep Opening Time (adjustable)	0 -30s (standard: 7s)

Certification Authority

With the authority of ministry of public security, IDC/KBB significantly promises to supply the most complete security solutions to all ATM users and banking outlets. The series of security solutions could be realized by the most personalized products

Quiet Running
A quiet imported motor equipped with polyurethane mute pulley structure which is created by IDC/KBB could ensure that the door runs smoothly and quietly.

Excellent Quality Assurance
Passed: The 1 million failure-free detection test
Passed: The strict high and low temperature detection test
Passed: Varieties of voltage detection test

Easy Parameter Adjustment
The PSA communication technology which researched independently by IDC/KBB could realize easy setting, adjustment and programming only by PSA without opening the internal structure of the door.

ATM SECURITY DOORS

KC3000 FUNCTIONS & FEATURES

INTELLIGENT CONTROL

1. **Intelligent Locking:**
   When a person enters into ATM security door, the door will be locked automatically. Meanwhile the door-opening button from outside will be deactivated. This feature will prevent other persons from entering inside.

2. **Intelligent Lighting:**
   When ATM security door inspects someone entering inside, the light will turn on automatically to provide visual convenience for the user.

3. **Intelligent Ventilation:**
   When ATM security door inspect someone entering inside, the ventilation system will operate automatically. It will provide a comfortable environment for the user.

SECURITY FEATURES

4. **Anti-pinch Function:**
   Our advance infrared sensor ensures the user to go through the door safely. (Optional)

5. **Anti-collision Function:**
   When the door frame meets with resistance, it will return back automatically by using advanced software design. This will ensure the safety of the user going through the door.

6. **Emergency Open Function:**
   IDC/KBB's implemented mechanical emergency open device with exclusive patent will ensure that the door could be opened easily from inside under an emergency situation (including power off). (Optional)

Customized Design

IDC/KBB provides exclusive customized products for our customers' demand.
Based on high class design and strong technology strength, IDC/KBB will bring you further satisfying experience.

TECHNICAL PARAMETERS

Standard Configuration	
High Strength Aluminum Alloy Rail	Contact Push Button
Main Control Power	Lighting System
Drive Unit	9W
Infrared Presence Sensor	Ventilation System

Optional Configuration	
Infrared Anti-pinch Sensor	Security Glass
Door Card	Canopy Light Box
Emergency Open	Advertisement Film Attached on Door Body

EXIT DEVICE

5000 SERIES

GRADE 2

International Door Closers IDC 5000 Series Exit Devices meet the Life and Fire Safety Codes as prescribed by UL and ANSI / BHMA 156.3 standards. These durable devices are designed for both standard and commercial applications. The 5000 Series were tested and approved by Underwriters Laboratories (UL, USA and ULC, Canada) and listed to comply with UL 10C, and Uniform Building Code Standard 7-2, "Fire Test of Door Assemblies" (1997).

FEATURES

- All devices are non-handed design
- Auxiliary guarded latch deadlocks latch bolt automatically locks when the door is closed
- High shock-resistant latching mechanical design for protection from vandalism
- All inside components are made of high rust-resistant alloy or heavy electroplated steel
- Baked powder coating, electroplated or architectural base finishes are used on all exposed surfaces
- Outside trims are provided by rose and escutcheon lever or knob in a variety of styles
- All trim, features a through-bolted design to the devices that allow easy installation but not to compromise on security
- With a dogging mechanism, users have a choice of hex-key or cylinder operated design for a positive push-pull door action during peak traffic time

5510S Panic Rim Exit Device

5510F Fire Rim Exit Device

5530S Panic SVR Exit Device

5530F Fire SVR Exit Device

5610S Narrow Design

Panic Rim Exit Device

5630S Narrow Design

Panic SVR Exit Device

5510 SERIES RIM EXIT DEVICE
5530 SERIES SVR EXIT DEVICE

These two series models are wide stile design,

UL listed Panic Hardware or Fire Exit Hardware.

Rim Type- Ideally suited for:

- Any single exterior doors
- Any panic or fire rated interior single door and all exit doors in factories, hospitals, apartments, office buildings
- Indoor parking lots

SVR Type- Ideally suited for:

- Any pairs of emergency exit doors
- Pairs of doors in cross-corridors
- Double egress applications
- Passage doors in hospitals, factories or any public buildings

5610 NARROW DESIGN PANIC RIM DEVICE
5630 NARROW DESIGN PANIC SVR DEVICE

These two models are narrow stile design,

UL listed Panic Hardware

Rim Type and SVR Type

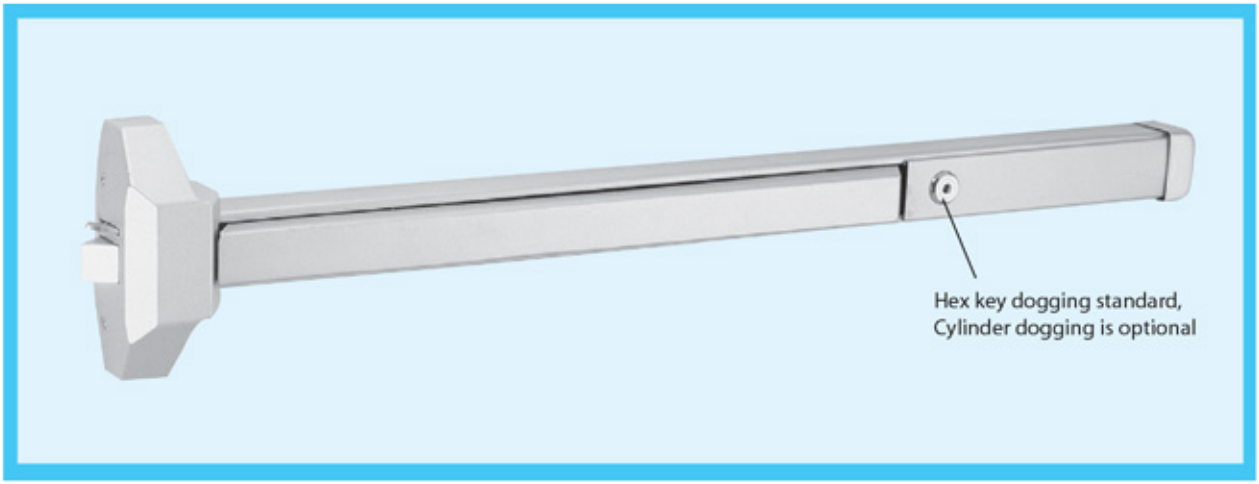

Both Types- Ideally suited for:

- Glass door
- Aluminum entrance doors
- Passage doors
- Full glass doors in stores, resorts and hotels

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

RIM EXIT DEVICES

MODEL 5510S PANIC-RATED RIM EXIT DEVICE - For wide stile and flush doors use
MODEL 5510F FIRE-RATED RIM EXIT DEVICE - For wide stile and flush doors use

Application

- For use on single or double doors with mullion (Fire rated device must use on 4′ x 8′ single or up to an 8′ x 8′ double fire labeled doors).
- Fits for 1 3/4″ (44mm) thick standard RHR or LHR hollow metal doors & wood doors Other than standard an 1 3/4″ is available but specify door thickness when ordering.
- Minimum Stile width: 3 1/2″ (90mm)

531 Strike Shim
Furnished with 532 Strike together made if steel and is plated. This shim is 1/8″ thick and is used to prepare doors with a 1/2″ stop. This will correct the distance between the device latch and the surface. If the frame has a 5/8″ stop a shim is not needed.

532 Panic Rim Strike
Surface applied standard on 5000 Series panic rim exit devices. Stainless Steel with a plated roller.

533 Fire Rim Strike
Surface applied. Standard on 5000 Series fire rim devices. It is 100% stainless steel including a roller.

*Fire rated SVR device has no mechanical dogging. (Dogging device is not permitted on fire-rated exit device)

Specifications

Device Head Cover	Stainless Steel, nonferrous alloy
Chassis	Steel plated
Mechanism Housing	Steel or Stainless Steel
Push Bar	Steel or Stainless Steel
End Cap	Steel or Stainless Steel
Latch Bolt	100% Stainless Steel, dead locking type with an 11/16″ throw
Deadlocking Latch	100% Stainless Steel with 5/8″ (16mm) throw
Strikes	531 & 532 Rim (panic rated) 533 Rim (fire rated)
Handing	Non-handed
Mounting Fasteners	Machine screws furnished standard Sex Nut & Bolt (SNB) are required for wood doors. Order SNB separately including standard.
Dogging*	Hex key dogging standard (Allen-type key furnished)
Dogging Options	Cylinder dogging or less dogging
Finish	US28(689) and US20A(690)
Dimension	See Spec. Sheet
Device Length	See Spec. Sheet
UL Listed	For Panic Hardware, see model 500SA For Fire Exit Hardware, see model 510AF

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

SURFACE VERTICAL ROD EXIT DEVICES

MODEL 5530S PANIC-RATED SVR EXIT DEVICE - For wide stile and flush doors use
MODEL 5530F FIRE-RATED SVR EXIT DEVICE - For wide stile and flush doors use

Application

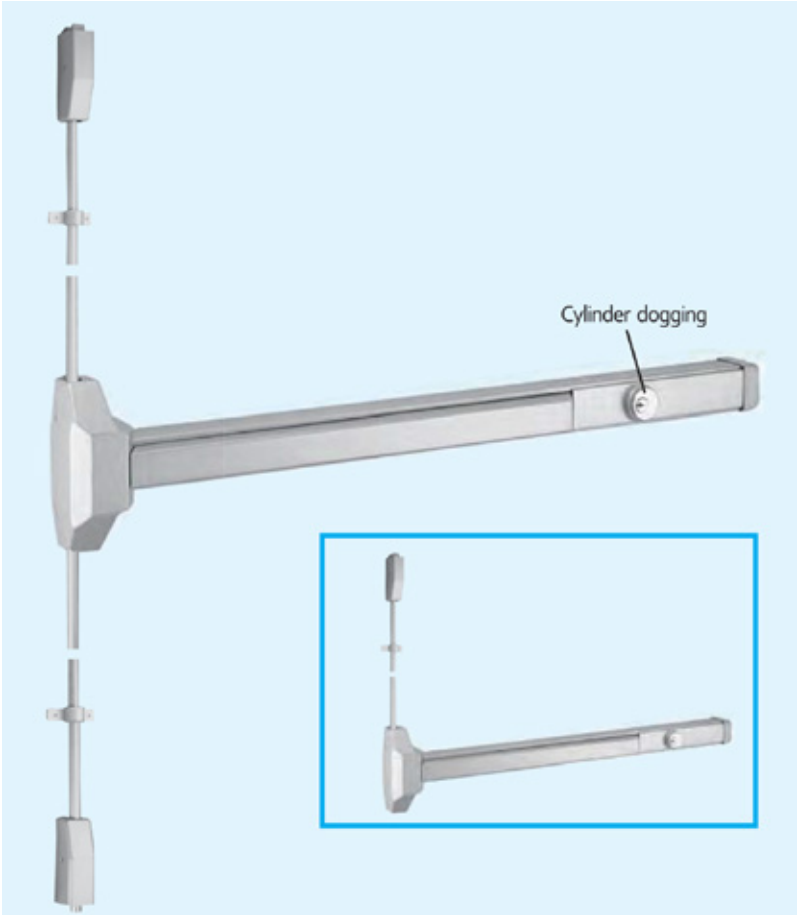

- For use on all single doors or double doors where two-piont latch is desirable (inactive leaf of double door). Fire rated device must use on 4′ x 8′ single or 8′ x 8′ double fire labeled doors.
- Fits for 1 3/4″ (44mm) thick standard non-handed hollow metal and wood doors, other than standard 1 3/4″ is available but specify door thickness when ordered.
- Minimum Door Stile width: 3 1/2″ (90mm)

534 Top Strike
Applied to surface of stop.
Hardened steel and plated.

537 Bottom Strike
Applied to surface of floor.
Nonferrous alloy and plated.

Specifications

Device Head Cover	Stainless Steel, nonferrous alloy
Chassis	Steel, stainless steel
Mechanism Housing	Steel or Stainless Steel
Push Bar	Steel or Stainless Steel
End Cap	Steel or Stainless Steel
Latch Bolt	100% stainless steel, 1/2″ (13mm) throw
Latch Case Covers	Steel, stainless steel
Vertical Rods	Tubular aluminum with rod guides
Strikes	Top 534, Bottom 537
Handing	Non-handed

Mounting Fasteners	Machine screws furnished standard, Sex Nut and Bolt (SNB) are required to use for wood doors. Order SNB separately.
Dogging*	Hex key dogging standard (Allen-type key furnished)
Dogging Options	Cylinder dogging or Less dogging
Finish	US28(689) and US20A(690)
Dimension	See Spec. Sheet
Device Length	See Spec. Sheet
UL Listed	For Panic Hardware, see model 900SA and Fire Exit Hardware see model 917A

*Fire rated SVR device has no mechanical dogging. (Dogging device is not permitted on fire-rated exit device)

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

RIM EXIT DEVICES

MODEL 5610S PANIC-RATED RIM EXIT DEVICE - For narrow stile exit doors made from Aluminum, Metal (HM) or Wood

Application

- For use on single doors or double doors with mullion (Fire rated device up to 4'x8' single or 8'x8' double fire labeled doors.
- Fits for 1 3/4" (44mm) thick standard non- handed or hollow metal or wood doors, other than standard 1 3/4" is available, specify door thickness.
- Minimum Stile width : 2 1/2" (63mm)

531 Strike Shim

Furnished with 532 Strike. This shim is 1/8" thick for prepared doors with 1/2" stop. It is used to obtain correct distance between the latch and the surface applied strike, when the stop is 1/2" high. If the frame has a 5/8" stop the shim is not required. Strike shim is steel and plated.

532 Panic Rim Strike

Surface applied. Standard on 5000 Series panic rim exit devices. Stainless steel with a plated roller.

Specifications

Device Head Cover	Stainless Steel, nonferrous alloy
Chassis	Steel plated
Mechanism Housing	Steel, plated
Push Bar	Steel or Stainless Steel
End Cap	Steel or Stainless Steel
Latch Bolt	100% stainless steel, deadlocking type, 11/16" (17mm) throw
Deadlocking Latch	100% stainless steel with 5/8" throw
Strikes	531 & 532 Rim type
Handing	Non-handed
Mounting Fasteners	Machine screws furnished standard, Sex Nut and Bolt (SNB) are required to use for wood doors. Order SNB separately
Dogging*	Hex key dogging standard (Allen-type key furnished)
Dogging Options	Cylinder dogging or less dogging
Finish	US28(689) and US20A(690)
Dimension	See Spec. Sheet
Device Length	See Spec. Sheet
UL Listed	For Panic Hardware, see model 500SA For Fire Exit Hardware, see model 510AF

*Fire rated SVR device has no mechanical dogging. (Dogging device is not permitted on fire-rated exit device)

SURFACE VERTICAL ROD EXIT DEVICES

MODEL 5630S PANIC-RATED SVR EXIT DEVICE - For narrow stile and flush doors use

Application

- For use on all single or double doors where two-point latch is desirable (inactive leaf of double door in specialty). Fire rated device must be use on 4 'x 8" single or 8' x 8" double fire labeled doors (max. size).
- Fits for 1 3/4" (44mm) thick standard RHR or LHR hollow metal door and wood doors, other than standard 1 3/4" is available but specify door thickness when ordering.
- Minimum Door Stile width: 2 1/2" (63mm).

534 Top Strike
Applied to surface of stop.
Hardened steel and plated.

537 Bottom Strike
Applied to surface of floor.
Nonferrous alloy and plated.

Specifications

Device Head Cover	Stainless Steel, nonferrous alloy
Chassis	Steel, plated
Mechanism Housing	Steel or Stainless Steel
Push Bar	Steel or Stainless Steel
End Cap	Steel or Stainless Steel
Latch Bolt	100% stainless steel, 1/2" (13mm) throw
Latch Case Covers	Steel, stainless steel
Vertical Rods	Tubular aluminum with rod guides
Strikes	Top 534, Bottom 537
Handing	Non-handed

Mounting Fasteners	Machine screws furnished standard, Sex Nut and Bolt (SNB) are required to use for wood doors. Order SNB separately.
Dogging*	Hex key dogging standard (Allen-type key furnished)
Dogging Options	Cylinder dogging or Less dogging
Finish	US28(689) and US20A(690)
Dimension	See Spec. Sheet
Device Length	See Spec. Sheet
UL Listed	For Panic Hardware

*Fire rated SVR device has no mechanical dogging. (Dogging device is not permitted on fire-rated exit device)

DEVICE OUTSIDE TRIM

MODEL 58L SERIES ESCUTCHEON LEVERS

FEATURES:

1. Non handed, easily installed with exit device.
2. Available finishes: US28(689) and US20A(690).
3. Trim has two through-bolts to the device chassis directly for more security and durability. It fits 1-3/4" (44mm) door standard. For 2" (51mm), 2-1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.
4. The trim has four (4) models to meet different functions use, see the chart below.

Models and Functions:

Device Head Cover (Dummy trim is not recommended for fire device)	Key Locks & Unlocks Lever 	Lever Always Active (No Cylinder) 	Key Retracts Latch Bolt 	Pull when Dogged 
Function	Classroom	Passage	Night Latch	Dummy
Trim Designation	Cylinder Escutcheon Lever	Blank Escutcheon Lever	Night Escutcheon Lever	Dummy Escutcheon Lever
Model Number and Use	58L01A	58L01B	58L01C	58L01D
	For 5510 Series Rim, 5530 Series Surface Vertical Rod			
Escutcheon Plate Size	8 1/16" x 2 5/8" x 29/32" (205mm x 67mm x 23mm)			
ANSI Function Numbers	08	14	03	02
Cylinder Type	1/4" Mortise	–	Mortise	–

- Escutcheon is made of steel or stainless steel, lever handle is made of zinc allow.
- When there is a key requirement, the trims may receive cylinders from other manufacturers.
- Cylinder is not furnished standard. Specify cylinder type (RC-Regular Cylinder, NC-No Cylinder) when the cylinder is required.

Optional Lever Design

58L 01A #01 Lever | **58L 05A #05 Lever** | **58L 17A #17 Lever**

Cylinder Selection

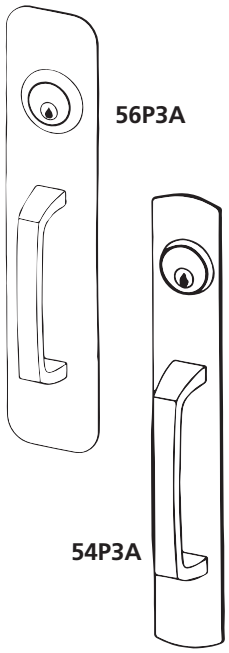

The cylinder has two types as shown below.

Mortis Cylinder 526 | **Rim Cylinder 426**

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

MODEL 56P AND 54P SERIES STANDARD PULL PLATES

Trim Designation	Cylinder Pull Plate (with cylinder)	Dummy Pull Plate (without cylinder)	Flate Plate (without cylinder & grip)
Function	Night Latch	Dummy	N/A
Operation	Key Retracts Latch Bolt	Pull when Dogged (Not for use with a Fire Device)	N/A
Escutcheon Plate Size	56P Series - L 11 $^{13}/_{16}$" x W 3" x T $^{3}/_{32}$" (300mm x 76mm x 2mm) 54P Series - L 11 $^{13}/_{16}$" x W 1 $^{25}/_{32}$" x T $^{3}/_{32}$" (300mm x 45mm x 2mm)		
Model Number for Wide Stile Exit Device	56P3A	56P3B	56P3D
	For 5510 Series Rim and 5530 Series SVR Devices Use		
Model Number for Narrow Stile Exit Device	54P3A	54P3B	54P3D
	For 5610S Rim and 5630S Series SVR Devices Use		
ANSI Function Numbers	03	02	10
Cylinder Types	Rim	–	–

MODEL 52R SERIES RAISED-LIP TYPE PULL PLATES

Trim Designation	Cylinder RL Type Pull Plate	Blank RL Type Pull Plate	Flate Plate (No Lips)
Function	Night Latch	Dummy	N/A
Operation	Key Retracts Latch Bolt	Pull when Dogged (Not for use with a Fire Device)	N/A
Dimensions	L 7 $^{11}/_{16}$" x W 3" x T $^{1}/_{8}$" (196mm x 76mm x 2mm)		
Model Number for use for Device Type	52R2A	52R2B	52R2D
	For 5510 Series Rim and 5530 Series SVR Devices Use		

- Cylinder is not furnished standard. When need to meet key requirements, the trims may receive cylinders from other manufacturers. Specify cylinder type (RC - Regular Cylinder, IC - Interchangeable Core, NC - No cylinder) when the cylinder is required.
- The face plates of thee trims are made of steel or stainless steel, lever handles are made of zinc alloy.
- 52R & 56P Series trims can retrofit 1 3/4" steel doors prepped for bored locks (per ANSI A115.2).
- 54P & 56P Series trims furnish mounting through-bolts, 52R Series trim furnishes sex nuts and bolts (SNB).
- Available finishes: US28(689) and US20A(690).
- To Order: Specify model numbers, cylinder type, finish code and add door thickness if the door is thicker that 1 3/4". For example: 52R2A-RC-630

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

LEVERS

MODEL 55K AND 53K SERIES ROUND ROSE LEVERS

FEATURES:

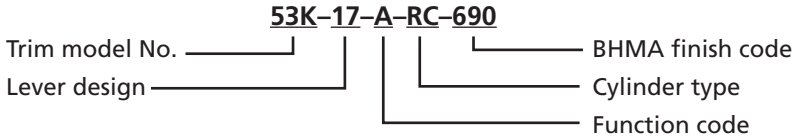

1. Non-handed, easily installed with exit device.
2. Easy operating lever handle allows convenient one hand operation.
3. Available finishes: US28(689) and US20A(690)
4. Trim has two through-bolts to the device chassis directly for more security and durability.
5. The actuating shaft of this trim is made of hardened steel bar, it fits 1 3/4" (44mm) doors standard for 2" (51mm), 2 1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.
6. Clutch freewheeling design. The lever rotates when the door is locked preventing excessive force from being applied to the horizontal lever.

Models and Functions:

Operation Options		Key Locks & Unlocks Lever	Key Retracts Latch Bolt	Lever Always Active (No Cylinder)	Pull when Dogged
					
Function		Classroom	Storeroom Night Latch	Passage	Dummy
Trim Designation		Cylinder Round Rose Lever	Night Latch Round Rose Lever	Blank Round Rose Lever	Dummy Round Rose Lever
Model Number and Use		55K01A	55K01C	55K01B	55K01D
		53K01A	53K01C	53K01B	53K01D
		For Rim, Surface Vertical Rod Exit Device Use			
Dimensions	55 Series	Rose diameter 3 3/8" (86mm). Lever length 4 3/4" (121mm), Projection 3"(76mm)			
	53 Series	Rose diameter 3 1/16" (78mm). Lever length 4 3/4" (121mm), Projection 3"(76mm)			
ANSI Function Numbers		08	03	14	02

- Rose Trim is made of steel or stainless steel, lever handle is made of zinc alloy.
- When need to meet key requirement, the trims may receive cylinders from other manufactures.
- Cylinder is not furnished standard. Specify cylinder type (RC-Regular Cylinder, IC - Interchangeable Core, NC - No Cylinder) when the cylinder is required.
- 55k Series trims can fit and cover cutout of 1 3/4" steel doors prep for bored locks with lever handles (per ANSI/BHMA A156.115).

How to order for 55K or 53K Series Trims:

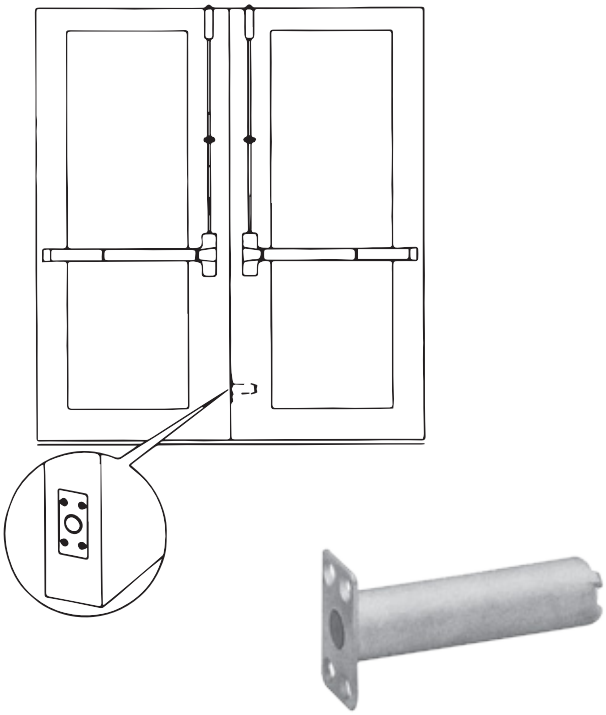

Function code:
A - Classroom
B - Passage
C - Storeroom
D - Dummy

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

ACCESSORIES

FIRE LATCH BOLT, MODEL FLOOR

Fire latch bolt is used with a pair of UL listed fire rated LBR exit devices, it includes a spring and stainless steel bolt which installs in the lower door edge inside to replace the bottom vertical rods of two SVR exit devices on a double door. This UL listed fire latch bolt is a temperature-actuated bolt that is designed to release from one door leaf and engage the other door when the temperature exceeds the rating of the fusible link during a fire. When the fire latch bolt releases and connects with the opposite door leaf, it keeps the doors in alignment and closed during a fire.

Specifications

- UL listed, furnished with LBR device
- Faceplate: 1-25/32" x 1" (45mm x25.6)
- Bolt diameter: 27/32" (21.6mm)
- Length of Latch Bolt: 3-5/32" (80mm)
- Material: 100% stainless steel

DOGGING OPTIONS

Less Dogging (LD)

Less Dogging is available on all 5000 Series Panic Exit Devices when users want to remove the dogging option.

Cylinder Dogging (CD)

Cylinder Dogging is available on all 5000 Series Panic Exit Devices to replace the standard hex key dogging. Unit requires a standard 1-1/4" (32mm) mortise cylinder with a straight cam.

CYLINDER OPTIONS

Cylinders are not furnished with device or trim and must be specified when required. Refer to the trim pages for cylinder type.

	Mortise Cylinder	Rim Cylinder

GRADE 1 • ARCHITECTURAL TYPE • EXIT DEVICES

8000 SERIES

SERIES HEAVY-DUTY MODELS

FEATURES

- All devices are non-handed design
- Slight pressure on device touch bar will retract latch(s) for immediate exit
- Auxiliary guarded latch deadlocks latch bolt automatically when door is closed
- High shock-resistant latching mechanical design for protection from vandalism
- All inside components are made of high rust-resistant alloy or heavily electroplated steel
- Anti-fading, electroplated or architectural base material finishes on all exposed surfaces are available
- With a dogging mechanism, users have a choice of hex-key or cylinder operated for positive push-pull action at peak traffic time. This dogging device will also help by increasing the life of the exit device (panic label only).
- The exit devices are available in the following finishes: US32D and US10B.

IDC 8000 Series Exit Devices are heavy duty and designed for heavy traffic applications. The devices are Underwriters Laboratory (UL, USA and ULC, Canada) listed for Panic Exit Hardware or Fire Exit Hardware, and are certified to ANSI A156.3-2001 Grade 1.

Narrow Design Rim Exit Devices

MODEL 8510S/8710S NARROW PANIC-RATED RIM EXIT DEVICE
MODEL 8510F/8710F NARROW FIRE-RATED RIM EXIT DEVICE

IDC 8500 / 8700 Series heavy-duty narrow stile Panic and Fire-Rated Hardware are designed for contemporary glass, aluminum, wood and metal doors.

Certification

- **UL/cUL Listed:** UL listed as Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- 8510S / 8710S narrow design rim exit devices are used for aluminum style full glass doors or narrow stile aluminum door applications. 8510F / 8710F narrow design rim exit devices are used for narrow or wide stile single doors up to 4′ x 8′ (1219mm x 2438mm) or 8′ x 8′ (2438mm x 2438mm) double metal or wood doors with mullion.
- The exit devices are available in the following finishes: US32D and US10B.

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	2-19/32” (66mm)
Latch Bolt	3/4” (19mm) throw, deadlocking design
Strikes	801 (panic), 802 (fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished standard • Fire device - Sex nuts and bolts (SNB) supplied standard • Optional SNB are available for device, order separately
Mounting Height	Device center line from finished floor is 40” (1016mm) standard
Door Opening Height	Device centerline from finished floor is 40” (1016mm) standard
Projection	Pushbar Neutral: 3-1/16” (78mm), Pushbar Depressed: 2-19/32” (66mm)

Narrow Design Surface Vertical Rod Exit Devices

MODEL 8530S/8730S NARROW DESIGN PANIC-RATED RIM EXIT DEVICE
MODEL 8530F/8730F NARROW DESIGN FIRE-RATED RIM EXIT DEVICE

Certification

- **UL/cUL Listed:** Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- Narrow design Panic SVR exit devices are used for aluminum frame full glass doors or narrow stile aluminum door applications. The narrow design Fire SVR exit devices are use for wide stile pairs of metal or wood doors up to 8′ x 8′ (2438mm x 2438mm).
- The exit devices are available in the following finishes: US32D and US10B.

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	2-19/32”(66mm)
Latch Bolt	• Top latch - 5/8” (16mm) throw, can be deadlocked automatically • Bottom latch - 5/8” (16mm) throw, held retracted during door swing
Strikes	• Top: 812 (Panic), 822 (Fire). • Bottom: 815 (Panic), 825 (Fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished for device standard SNB furnished for top & bottom latches • Fire device - Sex nuts and bolts (SNB) supplied standard SNB are required for wood doors, supplied standard
Mounting Height	Device centerline from finished floor is 40” (1016mm) standard
Door Opening Height	Standard door height is 7′ (Optional 8′ door is available)
Vertical Rods	• 1/2” (13mm) diameter tubular with rod guides • Top rod has two pieces to connect for accommodating 7′ or 8′ doors • Bottom rod is one piece with a length of 31-1/4” (794mm)
Projection	Pushbar Neutral: 3-1/16” (78mm) and Pushbar Depressed: 2-19/32” (66mm)

Narrow Design Concealed Vertical Rod

MODEL 8550S/8750S NARROW DESIGN PANIC-RATED RIM CVR EXIT DEVICE
MODEL 8550F/8750F NARROW DESIGN FIRE-RATED RIM CVR EXIT DEVICE

Certification

- **UL/cUL Listed:** Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- Narrow design Panic CVR exit devices are used for the aluminum frame full glass doors or narrow stile aluminum door applications. The narrow design Fire CVR exit devices are used with wide stile pairs of steel doors up to 8′ x 8′ (2438mm x 2438mm).
- The exit devices are available in the following finishes: US32D and US10B.

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	2-19/32” (66mm)
Latch Bolt	• Top latch - 5/8” (16mm) throw, can be deadlocked automatically • Bottom latch - 5/8” (16mm) throw, held retracted during door swing
Strikes	• Top: 812 (Panic), 823 (Fire). • Bottom: 815 (Panic), 825 (Fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished for device standard SNB furnished for top & bottom latches • Fire device - Sex nuts and bolts (SNB) supplied standard SNB are required for wood doors, supplied standard
Mounting Height	Device centerline from finished floor is 40” (1016mm) standard
Door Opening Height	Standard door height is 7′ (Optional 8′ door is available)
Vertical Rods	• 1/2” (13mm) diameter tubular with rod guides • Top rod has two pieces to connect for accommodating 7′ or 8′ doors • Bottom rod is one piece with a length of 31-1/4” (794mm)

Rim Exit Devices

MODEL 8610S/8810S PANIC-RATED RIM EXIT DEVICE
MODEL 8610F/8810F FIRE-RATED RIM EXIT DEVICE

- MODEL 8610S/8810S PANIC-RATED RIM EXIT DEVICE
- MODEL 8610F/8810F FIRE-RATED RIM EXIT DEVICE

The IDC 8600 and 8800 Series have a full line of heavy-duty wide stile Panic and Fire-rated Hardware. This series offer durability, safety and meet the security demand and access control needs of today.

Certification

- **UL/cUL Listed:** UL listed as Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- 8610S/8810S rim exit devices are used for all types of single double doors with mullion.
- 8610F/8810F rim exit devises are used for UL listed fire labeled single doors up to 4’ x 8’ (1219mm x 2438mm) or 8’ x 8’ (2438mm x 2438mm) double doors with mullion.
- The exit devices are available in the following finishes: US32D and US10B.

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	4-1/4” (107mm)
Latch Bolt	3/4” (19mm) throw, deadlocking design
Strikes	801 (panic), 802 (fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished standard • Fire device - Sex nuts and bolts (SNB) supplied standard • SNB are required to use for wood doors, supplied standard
Mounting Height	Device center line from finished floor is 40” (1016mm) standard
Projection	Pushbar Neutral: 3-1/16” (78mm), Pushbar Depressed: 2-19/32” (66mm)

Mortise Lock Exit Devices

MODEL 8620S/8820S PANIC-RATED MORTISE EXIT DEVICE
MODEL 8620F/8820F FIRE-RATED MORTISE EXIT DEVICE

Certification

- **UL/cUL Listed:** Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- 8620S/8820S mortise lock exit devices are used for all types of single double doors with mullion.
- 86210F/8820F mortise lock exit devises are used for UL listed fire labeled single doors up to 4′ x 8′ (1219mm x 2438mm) or 8′ x 8′ (2438mm x 2438mm) double doors installations.
- The exit devices are available in the following finishes: US32D and US10B.

How to Order
When ordering a Mortise Lock Exit Device,choose a model of trim together; and specify the lever design and finish.

Example:

- 8820S-36-88E01A-RC-626
- 8820F-48-89E17A-NC-63

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	4-1/4” (107mm)
Latch Bolt	Stainless steel two-piece mechanical 3/4” (19mm) with anti-friction inserted auxiliary deadlocking latch
Strikes	Universal curved lip, non-handed, 818 (panic), 828 (fire). Optional 831(panic) or 832 (fire) flat ANSI Strike for door pairs with overlapping astragal(7/8” lip)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished standard • Fire device - Sex nuts and bolts (SNB) supplied standard • SNB are required to use for wood doors, supplied standard
Electric Strikes	Compatible with Von Duprin 6000 Series Electric Strikesor Folger Adam 300, 500, 600, or 700 Series Strikes
Mounting Height	Device center line from finished floor is 40” (1016mm) standard
Projection	Pushbar Neutral: 3-1/16” (78mm), Pushbar Depressed: 2-19/32” (66mm)

Surface Vertical Rod Exit Devices

MODEL 8630S/8830S PANIC-RATED SVR EXIT DEVICE
MODEL 8630F/8830F FIRE-RATED SVR EXIT DEVICE

Certification

- **UL/cUL Listed:** Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- Panic SVR exit devices are used for all types of single and double doors. Fire SVR exit devices are used for UL listed fire labeled pairs of doors up to 8′ x 8′ (2438mm x 2438mm)
- Available finishes: US32D and US10B.
- For LBR device

Above models are not available for 9′ or 10′door height use. If doors are over 8′ please specify when ordering.

Example:

- Model 10FT-8630S / 10FT-8830S
- Model 10FT-8630F / 10FT-8830F

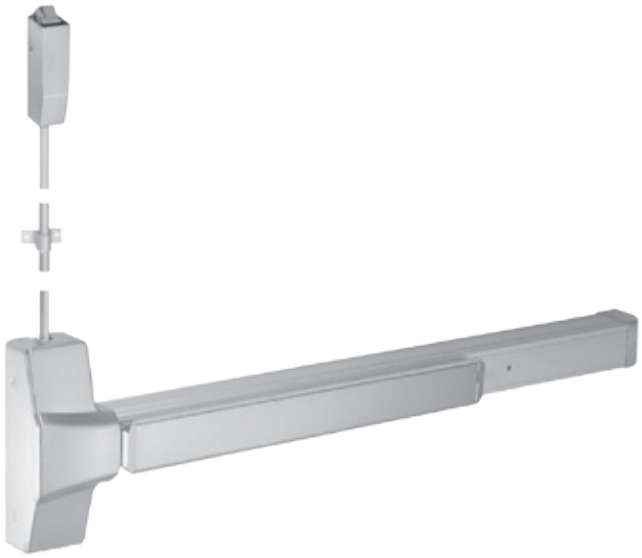

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	4-1/4” (107mm)
Latch Bolt	• Top latch - 5/8” (16mm) throw, can be deadlocked automatically • Bottom latch - 5/8” (16mm) throw, held retracted during door swing
Strikes	• Top: 812 (Panic), 822 (Fire). • Bottom: 815 (Panic), 825 (Fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished for device standard *SNB furnished for top and bottom latches* • Fire device - Sex nuts and bolts (SNB) supplied standard *SNB are required for wood doors, supplied standard*
Mounting Height	Device centerline from finished floor is 40” (1016mm) standard
Door Opening Height	Standard door height is 7′ (Optional 8′ door is available)
Vertical Rods	• 1/2” (13mm) diameter tubular with rod guides Top rod has two pieces to connect for accommodating 7′ or 8′ doors. • Bottom rod is one piece with a length of 31-1/4” (794mm)
Projection	Pushbar Neutral: 3-1/16” (78mm), Pushbar Depressed: 2-19/32” (66mm)

Less Bottom Rod Surface Vertical Rod Exit Devices

MODEL LBR8630S/LBR8830S PANIC-RATED SVR EXIT DEVICE LESS BOTTOM ROD
MODEL LBR8630F/LBR8830F FIRE-RATED SVR EXIT DEVICE LESS BOTTOM ROD

Certification

- **UL/cUL Listed:** Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- Panic SVR exit devices are used for all types of single and double doors. Fire SVR exit devices are used for UL listed fire labeled pairs of doors up to 8′ x 8′ (2438mm x 2438mm)
- The exit devices are available in the following finishes: US32D and US10B.
- For LBR device

Above models are not available for 9′ or 10′door height use. If doors are over 8′ please specify when ordering.

Example:

- Model 10FT-8630S / 10FT-8830S
- Model 10FT-8630F / 10FT-8830F

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	4-1/4” (107mm)
Latch Bolt	• Top latch - 5/8” (16mm) throw, can be deadlocked automatically • Bottom latch - 5/8” (16mm) throw, held retracted during door swing
Strikes	• Top: 812 (Panic), 822 (Fire). • Bottom: 815 (Panic), 825 (Fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished for device standard *SNB furnished for top and bottom latches* • Fire device - Sex nuts and bolts (SNB) supplied standard *SNB are required for wood doors, supplied standard*
Mounting Height	Device centerline from finished floor is 40” (1016mm) standard
Door Opening Height	Standard door height is 7′ (Optional 8′ door is available)
Vertical Rods	• 1/2” (13mm) diameter tubular with rod guides Top rod has two pieces to connect for accommodating 7′ or 8′ doors. • Bottom rod is one piece with a length of 31-1/4” (794mm)
Projection	Pushbar Neutral: 3-1/16” (78mm), Pushbar Depressed: 2-19/32” (66mm)

Concealed Vertical Rod Exit Devices

MODEL 8650S/8850S PANIC-RATED CVR EXIT DEVICE
MODEL 8650F/8850F FIRE-RATED CVR EXIT DEVICE

Certification

- **UL/cUL Listed:** Panic Exit Hardware or 3-hour Fire Exit Hardware
- **ANSI Certified:** Devices are ANSI A156.3 – 2001 Grade 1

Application

- Panic CVR exit devices are used on single or double metal doors. Fire CVR exit devices are used for UL listed fire labeled pairs of steel doors up to 8′ x 8′ (2438mm x 2438mm).
- The exit devices are available in the following finishes: US32D and US10B.
- CVR models can not be installed without bottom rod (LBR), only Surface (SVR) models can only be installed less bottom rod.

Above models are not available for 9′ or 10′door height use. If doors are over 8′ please specify when ordering.

Example:

- Model 10FT-8650S / 10FT-8850S
- Model 10FT-8650F / 10FT-8850F

Specifications

Device Lengths	• Standard (36”): 33-15/32” (850mm) • Long (48”): 44-3/4” (1137mm)
Door Widths	• 36” - For 29” to 36” (736mm to 914mm) doors • 48” - For 33” to 48” (838mm to 1219mm) doors
Minimum Stile Width	4-1/4” (107mm)
Latch Bolt	• Top latch - 5/8” (16mm) throw, can be deadlocked automatically • Bottom latch - 5/8” (16mm) throw, held retracted during door swing
Strikes	• Top: 812 (Panic), 823 (Fire). • Bottom: 815 (Panic), 825 (Fire)
Doggin Kit	• Panic device - Hex key dogging (RD) standard • Fire device - No mechanical dogging (ND)
Dogging Options	• Cylinder Dogging (CD) • Less Dogging (LD)
Mounting Fasteners	• Panic device - Machine screws furnished for device standard *SNB furnished for top and bottom latches* • Fire device - Sex nuts and bolts (SNB) supplied standard *SNB are required for wood doors, supplied standard*
Mounting Height	Device centerline from finished floor is 40” (1016mm) standard
Door Opening Height	Standard door height is 7′ (Optional 8′ door is available)
Vertical Rods	• 1/2” (13mm) diameter tubular with rod guides Top rod has two pieces to connect for accommodating 7′ or 8′ doors. • Bottom rod is one piece with a length of 31-1/4” (794mm)
Projection	Pushbar Neutral: 3-1/16” (78mm), Pushbar Depressed: 2-19/32” (66mm)

Electrified Exit Devices

ALARM EXIT DEVICE

All IDC 8000 series exit devices can be converted into alarm devices. Its feature is used to deter and signalthe unauthorized use of a door opening. The push bar is printed with "EMERGENCY EXIT ONLY, PUSH TOOPEN ALARM WILL SOUND" in red lettering.

The alarm exit device is operated by a 9 volt battery and has two alarm modes:

- **Type A - Monitors push bar**
  When the push bar is depressed, the alarm will sound. This type is suitable for exit device without outsidelever trim (for exit only).
- **Type B - Monitors push bar and latch bolt**
  When the push bar is depressed or the latch bolt is retracted by operating the outside lever trim, the alarmwill sound.Model numbers for orderingPrefix "AL" on any on 8000 series model number and suffix: "A" or "B", then add the device length for 36" and48" door sizes, then the finish code.

FOR EXAMPLE:

- **AL8810SA - 36 - 630** (i.e. Panic-Rated Rim Exit Device + Type A alarm, 36", 630)
- **AL8830SB - 48 - 613** (i.e. Panic -Rated SVR Exit Device + Type B alarm, 48", 613)
- **When panic-rated exit devices are converted to an alarm exit device, the dogging function is not available.**

DELAYED EGRESS EXIT DEVICE

The delayed egress exit device can provide a controlled egress for opening. When the exit device is in the arming stage, it will deny exit to unauthorized persons for 15 - 30 seconds. If depressed for 3 secondsor longer, the device will sound a local and a remote audible alarm. The remote monitor signal will alertthe security personnel. The delayed egress device is furnished with a sticker in red letters which states:

EMERGENCY EXIT ONLY
PUSH UNTIL ALARM SOUND
DOOR AN BE OPEND IN 15 SECONDS

When the exit device is in the arming mode, turning the key clockwise to the bypass position will allow authorized personnel to exit for maintenance or egress without sounding the alarm. If the exit device is in the arming mode, turn the key switch counterclockwise to the reset position and it will release the device without sounding the alarm for egress and will rearm after 10 seconds.

- **Device is ANSI A156.3 Grade 1 and ANSI A156.24.**

DEVICE OUTSIDE TRIM

MODEL 88L AND 88E SERIES ESCUTCHEON LEVERS (SQUARE DESIGN)

FEATURES:

1. Non handed, easily installed with exit device.
2. Easy operating lever handle allows convenient one hand operation.
3. Available finishes: US32D and US10B.
4. Trim has 4 through-bolts to the device chassis directly for better security and durability. It fits 1-3/4" (44) door standard. For 2" (51mm), 2-1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.
5. 88L Series Escutcheons are forged bronze and the levers are zinc alloy castings.
6. Anti-Vandalism design prevents the lock from being damaged when a key locks the lever.

Models and Functions:

Operation Options	Key Locks & Unlocks Lever	Lever Always Active (No Cylinder)	Key Retracts Latch Bolt (Rigid Lever)	Pull when Dogged (Rigid Lever)
				
Function	Classroom	Passage	Night Latch	Dummy
Trim Designation	Cylinder Escutcheon Lever	Blank Escutcheon Lever	Night Escutcheon Lever	Dummy Escutcheon Lever
Model Number and Use	88L01A	88L01B	88L01C	88L01D
	For Rim, Surface / Concealed Vertical Rod, LBR Exit Devices Use:			
	88E01A	88E01B	88E01C	88E01D
	For Mortise Lock Exit Devices Use Only			
Escutcheon Plate Size	9 $^{7}/_{16}$" x 2 $^{15}/_{16}$" x $^{13}/_{16}$" (240mm x 75mm x 21mm)			
ANSI Function	08	14	03	02
Cylinder Type	$^{1}/_{4}$" Mortise	–	Rim	–

- When there is a key requirement, the trims may receive cylinders from other manufacturers.
- Cylinder is not furnished standard. Specify cylinder type (RC-Regular Cylinder, NC-No Cylinder) when the cylinder is required.

Optional Lever Design

88L 01A #01 Lever | **88L 05A #05 Lever** | **88L 17A #17 Lever**

Cylinder Selection

The cylinder has two types as shown below.

Mortis Cylinder 526 | **Rim Cylinder 426**

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

DEVICE OUTSIDE TRIM

MODEL 89L AND 89E SERIES ESCUTCHEON LEVERS

FEATURES:

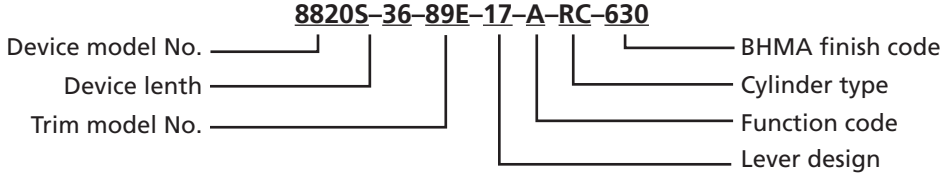

1. Non-handed easy installation
2. Easy operating lever handle allows convenient one hand operation.
3. Available finishes: US32D and US10B.
4. Trim has 4 through-bolts to the device chassis directly for better security and durability. It fits 1-3/4" (44) door standard. For 2" (51mm), 2-1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.
5. Clutch freewheeling design. The lever rotates when the door is locked, preventing excessive force from being applied to the horizontal lever.

Models and Functions:

Operation Options	Key Locks & Unlocks Lever	Lever Always Active (No Cylinder)	Key Retracts Latch Bolt (Rigid Lever)	Pull when Dogged (Rigid Lever)
				
Function	Classroom	Passage	Night Latch	Dummy
Trim Designation	Cylinder Escutcheon Lever	Blank Escutcheon Lever	Night Escutcheon Lever	Dummy Escutcheon Lever
Model Number and Use	89L01A	89L01B	89L01C	89L01D
	For Rim, Surface / Concealed Vertical Rod, LBR Exit Devices Use:			
	89E01A	89E01B	89E01C	89E01D
	For Mortise Lock Exit Devices Use Only			
Escutcheon Plate Size	8 $^{27}/_{32}$" x 2 $^{15}/_{16}$" x $^{15}/_{16}$" (255mm x 75mm x 24mm)			
ANSI Function	08	14	03	02
Cylinder Type	$^{1}/_{4}$" Mortise	–	Rim	–

- In order to meet key requirements, the trims may receive cylinders from other manufacturers.
- Cylinder is not furnished standard. Specify cylinder type (RC - Regular Cylinder, IC - Interchangeable Core, NC - No Cylinder) when the cylinder is required.
- The 88E or 89E Series trims, which are used for mortise lock exit devices only, are not available to be ordered individually. Any one trim must be packed together with a mortise lock exit device when ordered.

Ordering Information:

Function code:
A - Classroom
B - Passage
C - Storeroom
D - Dummy

DEVICE OUTSIDE TRIM

MODEL 87L SERIES ESCUTCHEON LEVERS FOR NARROW STILE EXIT DEVICE USE

FEATURES:

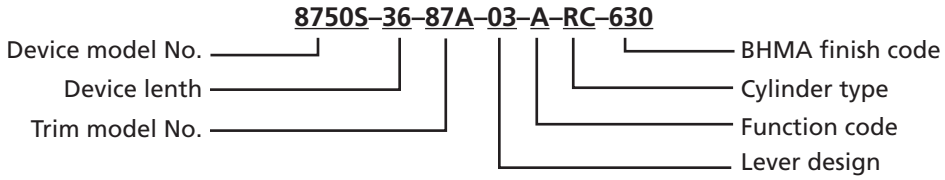

1. Non-handed, easily installed with exit device.
2. Available finishes: US32D and US10B.
3. Trim has through-bolts to the device chassis for more security and durability. This product fits 1-3/4" (44mm) doors standard. For 2" (51mm) or 2-1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.

Models and Functions:

Operation Options	Key Locks & Unlocks Lever	Lever Always Active (No Cylinder)	Key Retracts Latch Bolt (Rigid Lever)	Pull when Dogged (Rigid Lever)
				
Function	Classroom	Passage	Night Latch	Dummy
Trim Designation	Cylinder Escutcheon Lever	Blank Escutcheon Lever	Night Escutcheon Lever	Dummy Escutcheon Lever
Model Number and Use	87L01A	87L01B	87L01C	87L01D
	For Rim, Surface / Concealed Vertical Rod, LBR Exit Devices Use:			
Escutcheon Plate Size	8 $^{27}/_{32}$" x 2 $^{15}/_{16}$" x $^{15}/_{16}$" (255mm x 75mm x 24mm)			
ANSI Function	08	14	03	02
Cylinder Type	$^{1}/_{4}$" Mortise	–	Rim	–

- In order to meet key requirements, the trims may receive cylinders from other manufacturers.
- Cylinder is not furnished standard. Specify cylinder type (RC - Regular Cylinder, IC - Interchangeable Core, NC - No Cylinder) when the cylinder is required.

DEVICE OUTSIDE TRIM

MODEL 87P AND 87E SERIES PULL PLATES – FOR WIDE STILE EXIT DEVICE USE

FEATURES:

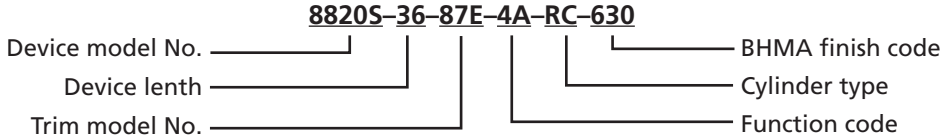

1. Non-handed, easily installed with exit device.
2. Available finishes: US32D and US10B.
3. Trim has through-bolts to the device chassis for more security and durability. This product fits 1-3/4" (44mm) doors standard. For 2" (51mm) or 2-1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.

Models and Functions:

Operation Options	Key Locks & Unlocks Thumbpiece	Lever Always Active (No Cylinder)	Key Retracts Latch Bolt	Pull when Dogged
				
Function	Classroom	Passage	Night Latch	Dummy
Trim Designation	Cylinder Pull Plate with Thumbpiece	Blank Pull Plate with Thumbpiece	Cylinder Pull Plate	Dummy Pull Plate
Model Number and Use	87P-5A	87P-5B	87P-5C	87P-5D
	For Rim, Surface Vertical Rod Type, and LBR Type Exit Devices Use			
	87P-6A	87P-6B	87P-6C	87P-6D
	Concealed Vertical Rod Type Exit Devices Use			
	87E-4A	87E-4B	87E-4C	87E-4D
	For Mortise Lock Exit Devices Use Only			
Escutcheon Plate Size	14 $^{11}/_{16}$" x 3" x $^{3}/_{32}$" (373mm x 76mm x 2mm)			
ANSI Function	08	14	03	02
Cylinder Type	$^{1}/_{4}$" Mortise	–	Rim	–

- In order to meet key requirements, the trims may receive cylinders from other manufacturers.
- Cylinder is not furnished standard. Specify cylinder type (RC-Regular Cylinder, IC- Interchageable Core, NC-No Cylinder) when a cylinder is required.
- The 87E Series trims that are used for mortise lock exit devices, are not available to be ordered individually. When ordering any one trim, it must be packed together with a mortise lock exit device.

To order the 87E Series Trims with mortise lock device, please specify in the following format:

Function code:
A - Classroom
B - Passage
C - Storeroom
D - Dummy

- **To order the 87P Series Trims:** Specify model series number, lever design number, fuction code (A, B, C, D), cylinder type and BHMA finish code. EXAMPLE: 87P-6A-RC-630

DEVICE OUTSIDE TRIM

MODEL86P AND 86E SERIES PULL PLATES – FOR WIDE STILE EXIT DEVICE USE

FEATURES:

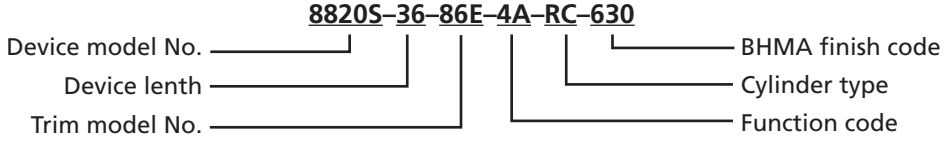

1. Non-handed, easily installed with exit device.
2. Available finishes: US32D and US10B.
3. Trim has through-bolts to the device chassis for more security and durability. This product fits 1-3/4" (44mm) doors standard. For 2" (51mm) or 2-1/4" (57mm) thick door or the shim-mounted exit device, specify the door thickness when ordering.

Models and Functions:

Operation Options	Key Locks & Unlocks Thumbpiece	Lever Always Active (No Cylinder)	Key Retracts Latch Bolt	Pull when Dogged
				
Function	Classroom	Passage	Night Latch	Dummy
Trim Designation	Cylinder Pull Plate with Thumbpiece	Blank Pull Plate with Thumbpiece	Cylinder Pull Plate	Dummy Pull Plate
Model Number and Use	86P-5A	86P-5B	86P-5C	86P-5D
	For Rim, Surface Vertical Rod Type, and LBR Type Exit Devices Use

AUXILIARY HARDWARE

KEYED REMOVABLE MULLIONS

The IDC 7000 Series Keyed Removeable Mullions are for use with the 5000 & 6000 Series Rim Exit devices on non-fire or fire rated pairs of doors. They are designed for faster and easy removalof the top bracket by a simple operation of the rim cylinder when a clear, unobstructed large opening is required. Once the mullion is removed, the cart, gurneys, large machine, forklift or furniture can freely pass through the opening. When the mullion is reinstalled, the unit will self lock in place without the use of the cylinder key.

Each keyed removable mullion set includes the top and bottom bracket set, mullion tube and shims.The rim cylinder is included. Mullion is fire rated and certified by UL.

NON-FIRE RATED KEYED REMOVABLE MULLION, MODEL 7100

For use with Panic-Rated Rim Exit Devices on non-fire rated pairs of doors

Specifications

Mullion Tube	2" (51mm) wide x 3" (76mm) deep, Wall thickness 1/8" (3mm) and 11 gauge steel tube
Mullion Size	• 7" (2134mm), 8' (2438mm) or 10' (3048mm) three (3) sizes. • Mullion may be field cut to fit proper size
Rim Cylinder	Use a 1-1/4" solid brass 6-pin rim cylinder, model 426, or interchangeable core, model 308 is sold separately
Top Bracket	• Steel, using key allows the mullion to be removed in seconds • Mullion can be locked in the top bracket easily without using the key
Bottom Bracket	Steel, fixed by (4) hex bolts with nonferrous anchors
Shims	1/2" (13mm) and 5/8" (16mm) shims included
Fasteners	Each Mullion includes: • 2 Flat head machine screws, #5/16-18 x 1-1/2", Stainless steel • 4 Flat head machine screws, #5/16-18 x 5/8", Stainless steel • 4 Flat head machine screws, #5/16-18 x 1-1/4", Stainless steel • 4 Expansion Anchors, 1/2" dia. x 1-1/2" long, steel
Strikes	Use two (2)standard Rim Strikes (801), not included
Finish	Gray baked powder coating only

FIRE-RATED KEYED REMOVABLE MULLION, MODEL 7200

For use with Fire-Rated Rim Exit Devices on fire-rated pairs of doors

Specifications

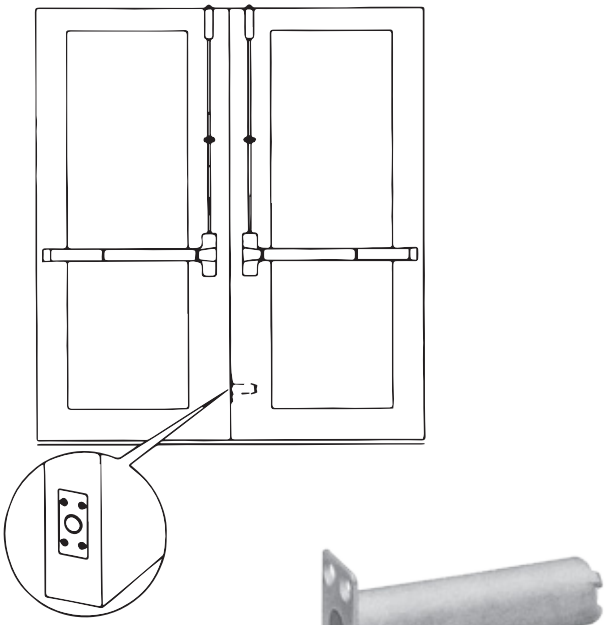

Mullion Tube	2" (51mm) wide x 3" (76mm) deep, Wall thickness 1/8" (3mm) and 11 gauge steel tube
Mullion Size	• 7" (2134mm), 8' (2438mm). • Mullion is fire rated and may be field cut to fit proper size
Rim Cylinder	Use a 1-1/4" solid brass 6-pin rim cylinder, model 426, or interchangeable core, model 308 is sold separately
Top Bracket	Stainless steel, the key allows the mullion to be removed in seconds and the mullion can be locked in the top bracket without using the key
Bottom Bracket	Stainless steel, fixed by (4) hex bolts with stainless steel anchors
Shims	1/2" (13mm) and 5/8" (16mm) shims included
Fasteners	Each Mullion includes: • 2 Flat head machine screws, #5/16-18 x 1-1/2", Stainless steel • 4 Flat head machine screws, #5/16-18 x 5/8", Stainless steel • 4 Flat head machine screws, #5/16-18 x 1-1/4", Stainless steel • 4 Expansion Anchors, 1/2" dia. x 1-1/2" long, steel
Strikes	Use (2) sets of Mullion Strikes (688) & Strike Hooks (689), sold separately
Finish	Gray baked powder coating only

ACCESSORIES

FIRE LATCH BOLT, MODEL FLOOR

Fire latch bolt is used with a pair of UL listed fire rated LBR exit devices, it includes a spring and stainless steel bolt which installs in the lower door edge inside to replace the bottom vertical rods of two SVR exit devices on a double door. This UL listed fire latch bolt is a temperature-actuated bolt that is designed to release from one door leaf and engage the other door when the temperature exceeds the rating of the fusible link during a fire. When the fire latch bolt releases and connects with the opposite door leaf, it keeps the doors in alignment and closed during a fire.

Specifications

- UL listed, furnished with LBR device
- Faceplate: 1-25/32" x 1" (45mm x25.6
- Bolt diameter: 27/32" (21.6mm)
- Length of Latch Bolt: 3-5/32" (80mm)
- Materia: 100% stainless steel

DOGGING OPTIONS

Less Dogging (LD)

Less Dogging is available on all 5000 Series Panic Exit Devices when users want to remove the dogging option.

Cylinder Dogging (CD)

Cylinder Dogging is available on all 5000 Series Panic Exit Devices to replace the standard hex key dogging. Unit requires a standard 1-1/4" (32mm) mortise cylinder with a straight cam.

CYLINDER OPTIONS

Cylinders are not furnished with device or trim and must be specified when required. Refer to the trim pages for cylinder type.

	Mortise Cylinder	Rim Cylinder
Regular Type	 526	 426
Interchangeable Core Type	 208	 308

NON-LATCHING SWITCH BAR

MSB550

MECHANICAL SWITCH BAR

Non-Latching Push Bar for

- Magnetic Lock Release
- Delayed Egress Trigger
- Access Control Request-to-Exit
- Alarm Shunt
- CCTV or Alarm Activation

UL Listed
Burglary Resistant

MADE IN THE USA

Building codes essentially state that egress through access controlled doors must not require prior knowledge of operational requirements. Meeting this criteria, IDC's MSB550 is designed to release electromagnetic door locks for uninhibited egress. When slight pressure is applied a microswitch is actuated, immediately releasing the electromagnetic door lock.
The MSB5500 is an economical alternative to sensor activated bars.

Only 1/8" Total Bar Movement

The MSB550 has a maximum movement of only .125" (3.2 mm). Trigger activation to release the electromagnetic lock is quick and quiet.

Heavy Duty Construction

The MSB550 utilizes heavy-duty aluminum extrusion and rugged end caps. The mounting assembly is all metal. The rigid construction prevents any malfunction due to sagging or warped doors or tweaked-glass door stiles.

c UL us LISTED

Listed 4J82
Access Control Systems Unit
Burglary Resistant Electronic Locking Mechanism

CSFM Listed
Exit Door Accessories

Narrow Low Profile

The MSB550 has a narrow profile with minimum projection from the door of only 1.875" (47 mm). The unobtrusive design is ideally suited for aesthetically superior glass openings.

Model

Standard Length for 36" Door
PT-2U Power Transfer included

MSB550V 628 Aluminum Anodized
MSB550Y 335 Black Anodized
MSB550C 605 Polished Brass
MSB550S 629 Polished Stainless Steel
MSB550U 630 Brushed Stainless Steel

Options

Contacts
2 Two SPDT 5 Amp Contacts

Bars for Wide Doors
42 For 42" (1,067 mm) wide doors
48 For 48" (1,219 mm) wide doors
Bars may be field cut

Options (Continued)

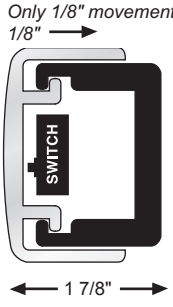

500GL Glass Mounting Kit for full glass and Herculite doors with stiles. Kit includes adhesive and (2) mounting blocks. (See reverse for details)

500SK Shim Kit used to raise bar from door surface. Recommended for wood or hollow metal doors.

How to Specify Options

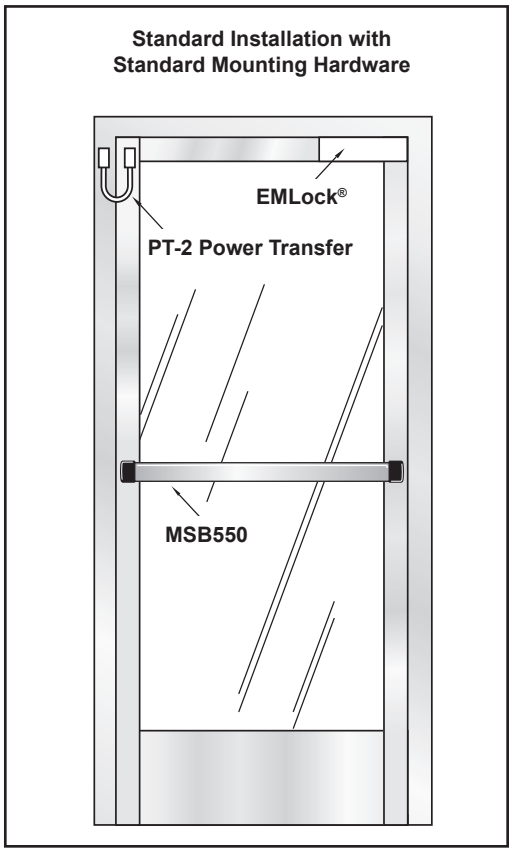

Examples
MSB550V x 500GL
MSB550V-2
MSB550V48

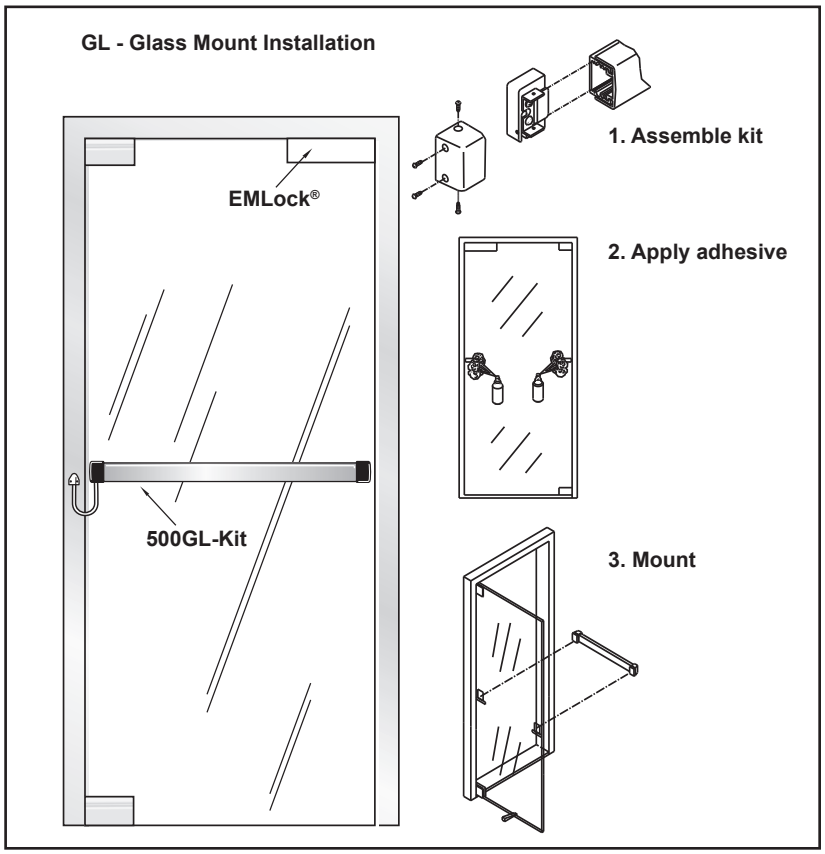

Only 1/8" movement for quick, quiet operation

The smallest profile in the industry to provide ample clearance for egress and maintain superior aesthetics of high profile openings.

NON-LATCHING PUSH BAR

SURE EXIT® PSB560 REX

PRESSURE SENSE BAR

Non-Latching Push Bar for

- *Magnetic Lock Release*
- *Access Control Request-to-Exit*
- *Delayed Egress Trigger*
- *Alarm Shunt*
- *CCTV or Alarm Activation*

Field installed sign
1"h Green Letters

Stable and Reliable Pressure Sense Technology
Building codes essentially state that egress through access controlled doors must not require prior knowledge of operational requirements. Meeting this criteria, IDC's patented PSB560 Sure Exit® Pressure Sense Bar is designed to release electromagnetic door locks for uninhibited egress. When slight pressure is applied to the non-latching bar, either of the two redundant solid state pressure sensors are actuated causing the electronics to immediately release the electromagnetic door locks.

Features

- **Tri-Failsafe.** A third redundant micro switch is automatically activated to release the door if both sensors or the electronics fail. This automatic emergency release switch does not require prior knowledge to find or use. Door operation will continue without the inconvenience of emergency service. The IDC Sure Exit® is the only tri-failsafe exit bar providing unequaled safety and reliability.
- **No Moving Parts, Quick and Quiet Operation.** With no moving parts the pressure sense technology does not suffer wear and provides quick and quiet operation.
- **Temperature Tolerant.** Pressure sense technology operates from 0˚ to 150˚F and tolerates sudden and extreme temperature changes.
- **Human Touch Not Required.** Unlike touch sensors, activation may be accomplished while wearing heavy gloves, by the hip through a coat, or using a briefcase. Superior egress safety is provided for frail, disabled or wheelchair confined persons unable to touch the bar and is easily activated by a cane or bump from a walker or wheelchair.
- **Sensor Calibration Not Required.** Stable pressure sense technology does not require adjustment or tune-in. When desired, pressure sensitivity can be increased up to 15 lbs to inhibit tampering for high security applications.
- **Heavy Duty Construction.** The IDC PSB560 uses heavy duty aluminum extrusion and rugged end caps. The mounting assembly is all metal, and no plastic. The rigid construction prevents any malfunction due to sagging or warped doors or tweaked glass door stiles.
- **Narrow, Low Profile.** The Sure Exit® has a narrow profile with minimum projection from the door of only 1.875" (47mm). The unobtrusive design is ideally suited for aesthetically superior glass openings.
- **Two Outputs.** Two dry contacts for lock release, request-to-exit, alarm shunt, alarm activation or CCTV activation.
- **Armored Power Loop.** 18" flex stainless conduit included. The PT-2 enables wiring from the door to the frame.
- **10Ft Cable.** 8 conductor cable included.
- **Easy Installation and Troubleshooting.** Wires plug into the PC board after the bar is mounted and the extruded cover slides on easily after the wire connections are made. For quick and easy servicing, the extruded cover slides off without removing the bar from the door exposing all internal parts.

QUIET DUO™ LR100 SERIES

700mA Dual Latch Retraction / Dogging Kit

Factory Installed Kits are UL Listed and Field Retrofit Kits are UL Classified

AVAILABLE FOR THESE BRANDS:

- IDC
- Von Duprin
- Yale
- Corbin Russwin
- Dor-O-Matic
- Hager
- Adams Rite
- Stanley K2
- TownSteel
- Arrow
- PHI
- Falcon
- Cal-Royal
- PDQ
- Falcon IR
- Marshall Best
- Sargent
- SDC
- Tell
- Detex
- Dorma
- Jackson

For use with 3Hr fire rated and non-fire rated mechanical exit devices.

Only 700mA inrush / 200mA continuous @ 24VDC provides simultaneous latch retraction, dogging with pushpad depression unless specified otherwise.

APPLICATION

The IDC LR100 Series Electric Latch Retraction Kit enables electric access control and dogging of mechanical exit devices. When energized the motor retracts the exit device latch and pulls the pushpad into the dogged (depressed) position enabling momentary or sustained push and pull operation of the door.

The latch retraction mechanism may be activated by an access control, remote control device or building automation system. The exit device always provides uninhibited egress.

Field Installed Retrofit Kit

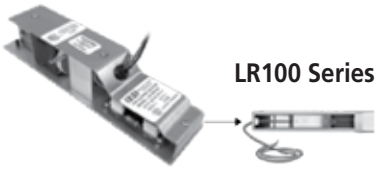

- UL Classified for use with 3hr fire rated & non-fire rated exit devices

IDC Factory Installed Kit

- UL Listed for use with 3hr fire rated & non-fire rated exit devices
- Distributor sends exit device to IDC for kit installation

FEATURES

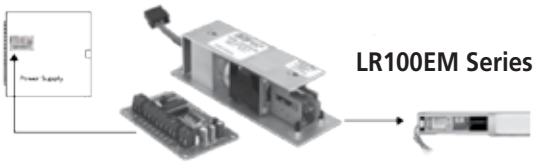

- 700 mA Inrush, 200 mA Continuous @ 24VDC
- For access control and sustained dogging applications
- Simultaneous latch retraction and dogging (pushpad depressed) for most exit devices*
- Pushpad is depressed* electrically for quieter push / pull operation
- Automatic re-trigger if device does not pull on first try * on designated models
- Eliminates need for costly replacement of existing exit device
- Significantly less labor and costs compared to competitive retrofit kits
- Low current enables longer wire runs with smaller gauge wire
- No door sequencers required for pairs of manual doors
- Installs in Von Duprin non-fire rated panic device without removing from the door

GRADE 2 CYLINDRICAL LOCKS

3000 SERIES

NON-CLUTCHED

3000L
(lever)

3000K
(knob)

FEATURES

- **Non-clutched mechanism**
- **3000L** (Lever)
- **3000K** (Knob)
- Heavy duty lever spring return rose assembly
- Bidirectional lever operation, non-handed
- Solid brass latch bolt
- Solid brass Schlage c pin keyway cylinder
- Meets Fire Code (California State Reference Code)
- UL and CUL Listed
- Five year warranty

Grade 2 Cylindrical Locks

IDC 3000L locksets meet ADA requirments. Our 3000L and 3000K medium duty key-in locksets are designed to exceed the ANSI/BHMA A156.2 Grade 2 requirments.

SPECIFICATION

Application	For offices, schools, hospitals, apartments, hotels, motels and other public buildings
For Doors	$1\frac{3}{8}$" to $1\frac{3}{4}$" (35mm to 45mm)
Backset	$2\frac{3}{8}$"(60mm) or $2\frac{3}{4}$" (70mm) standard
Front	Brass, Bronze: $2\frac{1}{4}$" X 1" standard. $2\frac{1}{4}$" X $1\frac{1}{8}$" optional Adjustable for Flat or Beveled doors $\frac{1}{8}$" in 2"
Strike	**ST1** ANSI 1-1/4" x 4-7/8" (Standard)
Roses	Brass or Bronze
Hand	Universal, non-handed
Latch bolt	Brass. $\frac{1}{2}$" Latch bolt standard. Stainless steel, $\frac{1}{2}$"Latch bolt optional
Keys	Two Brass
Cylinder	Brass Schlage C pin keyway standard Weiser. Arrow. Lockwood C 4. Kwikset optional
Masterkeying	Can be masterkeyed or grand masterkeyed. Construction key system available
Non-clutched	Non-clutched mechanism, free Wheeling not available.
Interchangable Core	Interchangeable core will accept compatible 6 or 7 pin cores with BEST or SARGENT
Finishes (US Code)	626 (US26D) Satin Chrome and 613 (US10B) Oil Rubbed Bronze
Split Finishes	Outside finish specified first. Front & Strike finished to match inside trim unless otherwise specified
UL/CUL	Listed for use on fire doors (3 Hour Rated)

FUNCTION	TRIM	IDC	ANSI	DESCRIPTION
	LEVER	10	F75	Passage or Closet Latch - Latch bolt operated by lever, from either side at all times
	LEVER	40	F76	Privacy, Bedroom or Bath Lock – Latch bolt operated by lever from either side. Outside lever is locked by push button unlocked by emergency release outside, operating inside lever or closing door.
	LEVER	53	F82	Entry Lock - Dead locking latch bolt operated by lever from either side except when outside lever is locked by push or turn button. When outside lever is locked, operating key in outside lever or operating inside lever unlocks push button and retracts latch bolt. Closing door does not release push button.
	LEVER	70	F84	Classroom Lock - Dead locking latch bolt operated by lever from either side except when outside lever is locked from outside by key. When outside lever is locked latch bolt is operated by inside lever.
	LEVER	80	F86	Storeroom or Closet Lock – Dead locking latch bolt operated by key in outside lever, or by operating inside lever. Outside lever is always inoperable.
	LEVER	25	F111	Exit or Communicating Passage Lock – Dead locking latch bolt operated by lever one side only at all times. Non removable blank trim or no trim outside.
	LEVER	170		Dummy Trim 1 Side - Used as door pull or as matching inactive trim
	KNOB	53	F109	Entrance – Pushing turn-button in inside knob locks outside knob. Turning inside knob or operating key in outside knob releases button automatically. Closing door does not release button. Button is fixed in the locked position by turning to horizontal position.
	KNOB	80	F91	Double Cylinder - Deadlocking knob operated by either side. Key either locks or unlocks both sides.
	KNOB	170	F111	Exit Non-Key – Blank knob plate outside. Inside knob always unlocked.

GRADE 1 CYLINDRICAL LOCKS

5000L SERIES

CYLINDRICAL LOCKSETS

Grade 1 Cylindrical Locks

IDC locksets are designed for commercial, industrial and institutional use, where dependable operation and longevity is required along with high resistance to vandalism and abuse. Applications include office buildings, government centers, factories, schools and hospitals and more.

Internal clutch provides vandal resistance by permitting lever rotation without retracting latch when locked.

Independent heavy duty springs provide effective lever return and support.

Design & Performance Features

Design
Strong stable design with anti-twisting capacity, dependable operation and longevity

Clutch
Internal clutch provides vandal resistance by permitting lever rotation without retracting latch when locked.

Handing
All M7200 series locksets are non-handed

Backset
2-3/4" backset standard. 2-3/8" (60mm) backset or 5" (127mm) backset extension optional

Faceplate
Brass, bronze or stainless steel. 1-1/8" x 2-1/4" (29mm x 57mm) square corner, beveled.

Chassis
Heavy gauge steel chassis, corrosion resistant zinc dichromate

Latch bolt and Roller Retractor
Stainless Steel, (13.7lbs) throw, deadlocking on keyed and exterior functions. The retractor is equipped with a roller to enhance reliability and long life.

Levers
Durable cast zinc based levers

Rose
Brass or stainless steel, 3-9/16" (90mm) diameter rose

Independent Lever Springs
A durable torsion spring on each side provides positive lever return and prevents lever sagging

Strike
ANSI curved lip strike, 1 ¼" x 4 7/8" x 1-3/8" lip to center standard

Door Thickness, field adjustable
Field adjustable for 1-3/8" - 1-3/4" (35mm - 45mm) thick door

Through Bolt Mounted
Trim assembly is through bolt mounted for superior strength.

Cylinders and Keys
6 pin type keyway with 2 brass keys standard.

Small Format Interchangeable Cores
Interchangeable Core will accept compatible 6 or 7 pin cores with BEST.

Certifications

ANSI / BHMA
ANSI/BHMA A156.2 Grade 1 strength and operational requirements

ANSI A250.13 severe windstorm compliant

UL US LISTED

UL Listed for 3 Hr 'A' label or lesser fire rated single doors, 4' x 8'
UL10C/UBC-2 positive pressure compliant
UL10B neutral pressure compliant

ADA
ADA/ANSI A117.1 accessibility code compliant

California State Reference Code (CSFM)
All levers, G and E, with less than ½" (13mm) return comply with California Fire Safety Codes (Formerly Title 19, California State Fire Marshal)

DEADBOLTS

HEAVY-DUTY DEADBOLTS

40DBB SERIES • ANSI GRADE 1

A Heavy Duty commercial quality deadbolt that provides a maximum deterrent to forced entry. The cylinder recesses into the door to resist blows attempting to move the lock.

- 2-1/2" dia solid steel one-piece design security ring insert. exceeds ANSI Grade 1 security against hammer and crowbar prying attacks.
- 1" (25mm) deadbolt with hardened steel core exceeds ANSI Grade 1 Security against kick-in and saw attacks.
- High precision pick resistant solid brass 6 pin tumbler plug "C". Brass key Meets ANSI Grade 1 Security to prevent key cylinder from being knocked out.
- Drive in deadbolt - Designed to be installed on metal door conveniently. Only one hole is needed on door edge.
- ADA Ergonomic thumb turn.
- Extra thick steel mounting plate
- Sturdy, all steel latch case and mechanism.

• Finishes Available:

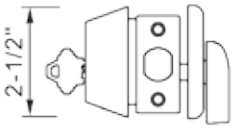

PB - Polished Brass
SB - Satin Brass
AB - Antique Brass
AC - Antique Copper
SN - Satin Nickel
SC - Satin Chrome
CR - Polished Chrome
ORB - Oil Rubbed Bronze
TB - Black Nickel
AN - Antique Nickel

M7800 MECHANICAL

MORTISE LOCKSETS

Grade 1 Mortise Locksets

IDC Heavy Duty Mortise Locks comply with American National Standard Institute requirement ANSI/ BHMA 156.13 Grade 1. All our locks are field reversible and require only simple steps for changing the hand of lock for easy installation.

- ***Reversible without disassembly***
- ***May retrofit other brand lock sets (consult factory)***
- ***Clutch for vandal resistance***

Specifications

Clutch
Internal clutch provides vandal resistance by permitting lever rotation without retracting latch when locked

Handing
M7800 Series locks are field reversible without disassembly.

Door Thickness
For use on 1-3/4" (44mm) thick door standard. Specify thickness if other than standard for up to 2-1/4" thick door.

Backset:
2-3/4" (70 mm).

Armored Front:
1-1/4" x 8" x 7/32"
(32 mm x 203 mm x 6 mm) standard.

Case:
3-15/16" x 6-1/16" x 29/32"
(100 mm x 154 mm x 23 mm)

Bolts:
3/4" (19mm) throw stainless steel latch with anti-friction tongue.
1" (25mm) throw stainless steel dead bolt.

Levers:
Forged brass or bronze and cast stainless steel

Spring Cages
One or two heavy duty spring cages as required per function.

Rose and Escutcheon
Heavy wrought reinforced brass, bronze and stainless steel.

Strike:
ANSI curved lip strike 1-1/4" x 4-7/8" (32 mm x 124 mm) x 1-3/16" (30 mm) lip to center with dust box standard.

Cylinder & Keys Optional:
1-1/8" 6 pin with 'C' type keyway

I-Core
Compatible with Interchangeable Core Cylinders provided by others

Finishes
US26D (626) Dull Chrome
US32D (630) Dull Stainless (upon availability)

UL LISTED

UL listed "A" label (3 hours) fire exit hardware in accordance with UL 10C, UBC 7-2(1997)

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

FUNCTION	MODEL	ANSI	DESCRIPTION
	**M1001**	**F01**	**Passage** - Latch bolt retracted by lever from either side at all times
	**M3004**	**F04**	**Office -** Latch bolt operated by lever from either side except when outside lever is made inoperative by key outside or by turning inside thumb turn. When outside lever is locked, latch bolt is retracted by key from outside or by operating inside lever. Outside lever remains locked until thumb turn is return to vertical position or unlock by key. Auxiliary latch deadlocks latchbolt when doors closed.
	**M2005**	**F05**	**Classroom** - Latch bolt retracted by lever from either side unless outside is locked by key. Unlocked from outside by key. Inside lever always free for immediate exit. Auxiliary latch deadlocks latch bolt when door is closed.
	**M2007**	**F07**	**Storeroom** - Latch bolt retracted by key outside or by knob/lever inside. Outside lever always inoperative. Auxiliary latch deadlocks latch bolt when door is closed.
	**M2009**	**F09**	**Apartment Entrance / Vestibule -** Latch bolt operated by lever from either side, except when outside lever is locked by key from inside. When outside lever is locked, latch bolt is retracted by key from outside or by operating inside lever. Auxiliary dead latch.
	**M2413**	**F13**	**Corridor / Exit** - Latch bolt operated by lever from either side. Dead bolt projected by key from outside and turn from inside. Operating inside lever retracts both bolts and unlocks outside.
	**M3420**	**F20**	**Entrance** - Latch bolt operated by lever from either side, except when outside lever is made inoperative by toggle button. Dead bolt operated by key outside or turn inside. Key outside operates both bolts. Operating inside lever retracts both bolts and outside remains locked. Latch bolt is deadlocked when outside lever is made inoperative or when the dead bolt is projected. When dead bolt is retracted, lever is unlocked by toggle button.
	**M7822**	**F02** **F04** **F22**	**Privacy** - Latch bolt operated by lever from either side except when outside lever is locked by inside thumb turn. Operating inside lever, closing door or operating outside emergency release unlocks outside lever.
	**M0071**		**Single Dummy Trim** - Lever on one side fixed by mounting bar.
	**M0072**		**Double Dummy Trim** - Lever on both sides fixed by mounting bar.
	**M0075**		**Single Dummy Trim -** Lever on both sides fixed. Includes lock chassis and armor front.
	**M0076**		**Double Dummy Trim -** Lever on both sides. Includes lock chassis and armor front.

STRIKES & RESCUE STOPS

DUST PROOF STRIKE

1870 FOR DOORS WITHOUT THRESHOLDS

1872 FOR DOORS WITH THRESHOLDS

- For use with any ABH flush bolts
- Prevents dirt, dust and debris from floor clogging strikes

1870

1872

COMBO DOUBLE LIPPED STRIKE AND RESCUE STOP

- For 5-3/4" and 6-3/4" frame with 1-3/4" door
- To be used with ABH 0127 or 0128 center hung pivot sets. Ideal for hospital or nursing home bathroom doors. Stop can be rotated into frame to allow center hung or 1/8" inset double acting doors to swing out in case of emergency.
- Available in US32D, US32, US3, US4, US10B.
- .093 thick material
- Meets ANSI A1882
- Custom sizes available
- Holdback option available (CR4550,60,70,80 only) - (handed)

CR4550/60

CR4570/80

FOR CENTER HUNG DOORS

- CR4550/CR4591 5-3/4" x 2-3/4"
- CR4560/CR4592 6-3/4" x 2-3/4"

FOR 1/8" INSET DOOR

- CR4570/CR4594 5-3/4" x 2-3/4"
- CR4580/CR4593 6-3/4" x 2-3/4"

CR4591/92

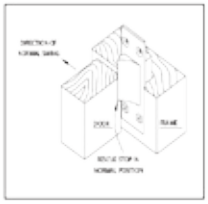

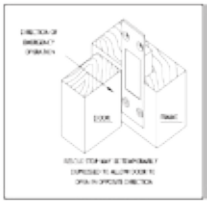

CR4594/93

4590 RESCUE STOP

FOR CONVERTING A DOUBLE ACTING CENTER HUNG DOOR TO SINGLE ACTING

- Allows door to swing open in opposite direction if a hospital or nursing home patient falls and obstructs the normal swing of the door
- Meets ANSI Spec A1882
- Stainless steel, US32D standard
- Pushing in on the spring loaded stop allows emergency operation of the door. Stop automatically returns to normal position when released

FLUSH BOLTS

COORDINATORS

MADE IN USA

AUTOMATIC FLUSH BOLTS

When active door is closed the bolt automatically projects to lock inactive door. Bolt retracts when active door is opened.
BHMA 4.4 TYPE 25: ANSI 156.3 UL Listed

1860P

1862P

1860P PAIRS FOR METAL DOORS

- Fits ANSI prep for Metal doors
- 3/4" throw with 2" vertical adjustment. Adjustment can be made without removing door from frame
- UL listed 3 hrs on metal door up to 4' wide and 8' high
- If strike and bolt are misaligned, override prevents damage to door, frame or flush bolt
- Dust proof strikes - 1870 for and/or threshold, 1872 for threshold only

1862P PAIRS FOR METAL DOORS

- 3/4" throw with 3/4" vertical adjustment. Adjustment can be made without removing door from frame
- UL listed 1-1/2 hrs on wood doors up to 4' and 8' high
- If strike and bolt are misaligned, override prevents damage to door, frame or flush bolt
- Dust proof strikes- 1870 for floor and/or threshold, 1872 for threshold only

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

MANUAL FLUSH BOLTS

Used to lock and unlock an inactive door when the active door is open. When the inactive door is closed, moving the lock lever up locks it and moving the lever down unlocks it. Meets FED SPEC 1049 : BHMA L14081: ANSI 156.16. UL Listed.

1855S

1857S

1855S SINGLE UNIT FOR METAL DOORS

- Non-handed
- 5/8" throw with 7/8" vertical adjustment
- Standard rod length is 12". Other lengths are available on request
- Dust proof strikes - 1870 for floor and/or threshold, 1872 for threshold only
- Available in most architectural finishes
- UL listed for use on metal covered doors up to 4' wide and 10' high

1857S SINGLE UNIT FOR WOOD DOORS

- Same features as 1855 with the addition of a special top guide for wood doors
- Dust proof strikes - 1870 for floor and/or threshold, 1872 for threshold only

1805 ALL STAINLESS STEEL SERIES SURFACE BOLTS

N1805 Custom Lengths Available

- All stainless steel components
- 1" throw
- 8" (N1815) 12" standard (N1825)
- With bracket for lock - suffix L lock by others

- Heavy duty for extreme conditions
- Made of all stainless steel, finish US32D
- 3/4" wide x 3/4" thick bar
- Unit locks automatically. To release press knob toward door while unlatching.

N1805L Custom Lengths Available

- Special lengths available on request
- Sex bolts available
- Top and bottom strikes available
- With bracket for lock - L lock by others with
- Accepts lock (not provided) with 3/8" max diameter shackle and 1-3/4" min. shackle opening height.

N1805DL Custom Lengths Available

- 12" (HD1825TB) and 24" (HD1835TB) standard, custom lengths available
- Sex bolts standard
- Supplied with top and bottom strikes

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

3780 UNIVERSAL COORDINATOR

3780 Universal Coordinator is for pairs of doors up to 8’ wide. The long arm holds the active door open until the short arm is depressed by the inactive door. When the doors are closed, the arms are hidden by the stop-mounted aluminum case.

- One size for all pairs of doors up to 8’ wide
- Non-handed
- Stop mounted
- Matte black finish (Available)
- Meets ANSI 156.3, Type 21 requirements (when used with carry bar)
- Mounting brackets not required when using stop mounted hardware
- UL listed for use with pairs of swinging doors with astragal

Not for use with surface vertical rod panic devices

3760 CARRY BAR

- For pair of doors, where inactive door can be opened before active door
- Mounted on inactive door
- USP standard, plated finishes available

3790 GRAVITY COORDINATOR

- For use on pairs of doors to allow inactive door to close before active door
- UL listed for use with pairs of swinging or doors with astragal
- Non-handed
- Stainless steel
- Use on pairs of doors with astragal on:

- Active door up to 4’
- Inactive door over 3’4”
- Both doors over 2’10”

ROLLER LATCHES

HARDWARE

MADE IN USA

IDC Roller Latches are easily adjustable for roller projection for proper contact between roller and frame strike. Adjustment is made with 2 screws on the face of the roller latch body. Maximum roller projection is 5/16". The nylon roller provides durability and quiet operation. All units are stainless steel construction. Meets ANSI/BHMA A156.16, E19091. Available in most architectural finishes. Custom strikes available.

1890

- Cast full lip strike 1-11/16" wide x 2-1/4"
- Latch face 1" x 3-3/8"
- Fasteners
  Body (2) #10 x 3/4" FH SMS
  Strike (2) #8 x 3/4" FH SMS

1890S

- Custom Strike for double acting doors
- Latch face 1" x 3-3/8"
- Fasteners
  Body (2) #10 x 3/4" FH SMS
  Strike #8 x 3/4" FH SMS
  (Quantity determined by width)

1891

- ASA Strike 1-1/8" wide x 4-3/4"
- Latch face 1" x 3-3/8"
- Fasteners
  Body (2) #10 x 3/4" FH SMS
  Strike (2) #12-24 x 3/8" FH MS

1892

- T Strike 1-1/8" wide x 2-3/4"
- Latch face 1" x 3-3/8"
- Fasteners
  Body (2) #10 x 3/4" FH SMS
  Strike (2) #10 x 3/4" FH SMS

1893

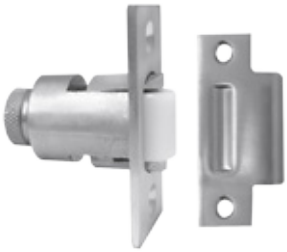

- With integrated angle stop
- Mounts in header with strike at top of door
- Cast strike 1-1/8" wide x 2-1/4"
- Latch face 1-1/2" x 4-1/2"
- Fasteners
  Body (2) #10 x 3/4" FH SMS
  Strike (2) #10 x 3/4" FH SMS

1894

- Extended cast strike
  2-1/8" wide x 2-1/4"
- Latch face 1" x 3-3/8"
- Fasteners
  Body (2) #10 x 3/4" FH SMS
  Strike (2) #8 x 3/4" FH SMS

1895

- Roller projection can be adjusted by turning the knurled knob at the back of the latch
- Maximum roller projection 1/2" to compensate for different door clearances
- Uses standard heavy duty cylindrical lock cut-out
- Standard strike 1-1/8" wide x 2-3/4"
- Body 1-1/8" wide x 2-1/4"
- For roller latch with ASA strike order 1896 (1-1/4" wide x 4-7/8")
- Fasteners
  Body (2) #8 x 3/4" FH SMS
  Strike (2) #10 x 3/4" FH SMS
  ASA Strike #12-24 x 3/4 FH SMS

PUSH/PULL LATCH • MORTISE LOCK

6000 SERIES

HOSPITAL PUSH PULLS

MADE IN USA

Versatility and ease of installation are the hallmarks of products in this series. 6000 Series handles can be mounted up, down, or horizontal. The 6600/6700 can be mounted in any combination without changes in the field. All models meet ADA requirements. Every unit is available with lead lining (suffix L) and engraving (suffix P), and comes in all BHMA finishes. The standard handle covers are 4-1/2" x 2-3/4". All handles have a projection of 2-3/4" from the face of the door. Most latches available with 2-3/4", 3-3/4", 5" or 7" BS & standard or ASA strike. UL Listed for use with doors rated 1-1/2 hours or less, measuring up to 4 ft. in width and 8 ft. in height. All Push/Pull models available with antimicrobial coating.

6000 PUSH/PULL LATCH

Patent No. 6,196,599

- Non-handed (except for engraved models)
- Push/pull latch mounted using (4) thru-bolts
- Push/pull latch can be mounted with the handles up or down without any modification
- Can be mounted horizontally with proper prep
- Available with 2-3/4", 3-3/4", 5" or 7" backset latches
- Standard T-Strike or ASA strike
- Includes all required fasteners
- Compact non-handed covers provide maximum clearance between the handle and door
- UL listed for all fire doors
- Available in BHMA finishes
- Lead lining is available
- Available latch bracket for Roller to Push Pull conversion
- Meets ADA requirements
- Standard for 1-3/4" thick doors
- Junior cover (3-1/2" x 2-3/4") available (prefix J)
- Round cover available (prefix RC)

(RC)

6100 PUSH/PULL LATCH

Patent No. 6,196,599
5,730,478

SERIES

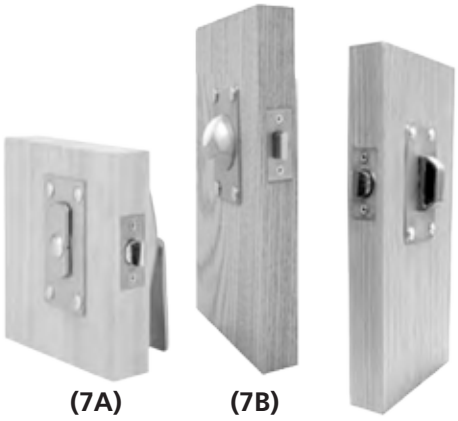

- Push-Pull trim can be mounted with one side vertical, one side horizontal without modification to parts or doors
- Uses government standard #161 door cut-out
  No additional door prep required
- Available with 2-3/4", 3-3/4", 5" or 7" backset latches
- Standard or ASA strike
- UL listed for all fire doors
- Available in all BHMA finishes
- Lead-lining available
- Standard for 1-3/4" thick doors
- Junior cover (3-1/2" x 2-3/4") available (prefix J)
- Round cover available (prefix RC)

(RC)

6200 PUSH/PULL LATCH

(7A) (7B) (7C)

Patent No. 6,196,599

- Can be used on Push, Pull or Both Sides
- Non-handed (except for engraved models)
- Handle can be mounted with the handle up or down without any modification
- Available with 2-3/4", 3-3/4", 5" or 7" backset latches
- Standard or ASA strike
- Includes all required fasteners
- Compact non-handed covers provide maximum clearance between the handle and door
- UL listed for all fire doors
- Available in BHMA finishes
- For institutional use
- Can be used with IDC Mortise Lock and other manufacturer's mortise lock (see 6600/6700)
- No protrusions on Asylum side of door
- No screw access on Asylum side of door
- Round cover available (prefix RC)

6400/6500 PRIVACY HOSPITAL PUSH/PULL LATCH

- Privacy thumbturn lock on one side, emergency unlock on opposite side
- 6400 Pull side thumb lever. 6500 Push side thumb lever
- Available with 2-3/4", 3-3/4", 5" or 7" backset
- Standard or ASA strike
- All standard finishes
- Meets ADA requirements
- Standard for 1-3/4" doors
- UL listed

6600 PUSH/PULL TRIM

(RC)

Patent No. 5,730,478
6,196,599

WITH A MORTISE LOCK

- Trim can be mounted up, down, horizontally or in any combination
- Uses standard mortise lock door prep
- Indicate hand when ordering
- Junior cover (3-1/2" x 2-3/4" available (prefix J).

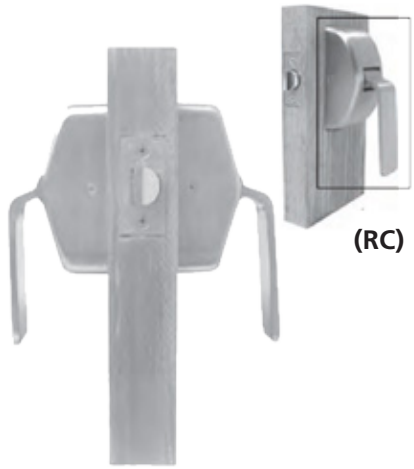

Recommended when mounting push side horizontal.

- Cylinder not provided
- Contact factory for cam requirements if cylinder is used
- 3/4" latch bolt throw
- UL listed
- Asylum knob trim available
- Round cover available (prefix RC)

EX SERIES
Patent No.
5,730,478
6,196,599

- EX Series - 6" extended handle

PSEX 6000 Pushside extended handle

PLEX 6000 Pullside extended handle

PPEX 6000 Both sides extended handles

- Available in stainless steel only
- Ideal for hospital scrub rooms and restaurant kitchen doors

H SERIES
Patent No.
5,730,478
6,196,599

- H Series - oversize paddle on push side trim - Available in most BHMA finishes
- Also available on 6800 series
- Ideal for hospital scrub rooms and restaurant kitchen doors
- Prefix H

X SERIES
Patent No.
5,730,478
6,196,599

- X Series - handle extension - one side
- Ideal for hospital scrub rooms and restaurant kitchen doors
- Prefix X

J PUSH/PULL

SERIES WITH JUNIOR COVER

- Compact 3-1/2" x 2-3/4" cover for handles
- Recommended f or 1/2" clearance between the cover and jamb stop for 2-3/4" backset and mortise lock models when handles are mounted horizontally
- Available for All series (except 6800) (prefix J)
- Available in most BHMA finishes

Patent No. 5,730,478
6,196,599

ROUND COVER SERIES

PUSH/PULL WITH ROUND COVER

RC6000

RC6600/
RC6700

RC6800

- Non-handed covers
- Covers can be used on both sides of unit
- Available in all BHMA finishes
- Available for all Push/Pull Latch units
- Ideal for use in psychiatric facilities for patient safety
- Security screws available
- Patent pending
- Prefix RC

INTERMEDIATE PIVOTS

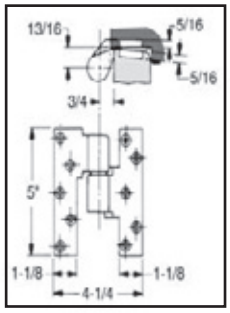

PIVOT SETS

MADE IN USA

Intermediate pivots are used to keep doors in alignment. All intermediate pivots are offset hung and cannot be used on center hung doors. Per NFPA 80, fire doors are to have an intermediate pivot for additional support at 30" or fraction thereof for door heights over 6'. Available in most architectural finishes.

019

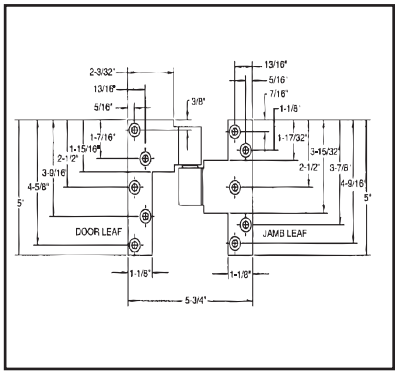

- 3/4" offset, handed
- Full mortise
- Needle bearing supplied standard. Can be used on heavy duty doors
- US32D models listed for use on labeled doors
- BHMA/ANSI C07321/3525

019 x 1 1/2

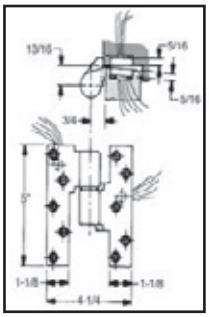

- 1-1/2" offset, handed
- Full mortise
- Needle bearing supplied standard can be used on heavy duty doors
- US32D models listed for use on labeled doors
- BHMA/ANSI C07321

E019

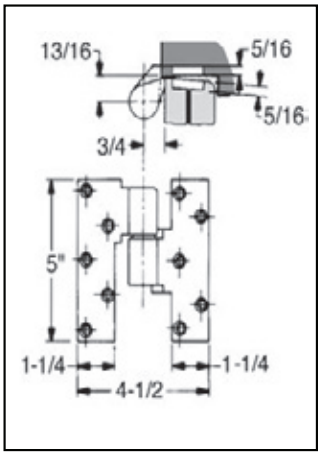

- Intermediate Pivot
- For Power Transfer
- 3/4" offset, handed
- Full Mortise
- Can be used on heavy duty doors
- US32D models listed for use on labeled door
- (8) 28ga. wires supplied standard*
- Door and jamb portions are factory assembled

*Pivot cannot be separated for installation

L019

- Intermediate Pivot
- For 1-3/4" lead lined doors
- 3/4" offset, handed
- Full mortise
- Needle bearing supplied standard
- US32D models listed for use on labeled doors
- BHMA/ANSI C07311

OFFSET PIVOT SETS

PIVOT SETS

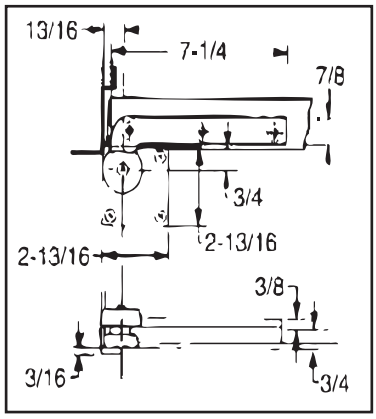

MADE IN USA

Pivot sets include top and bottom pivots. Offset pivot sets are handed and require an intermediate pivot to accommodate the door weights listed for each set. Door edges must be beveled 1/8" in 2". All sets are available in standard architectural finishes.

0117

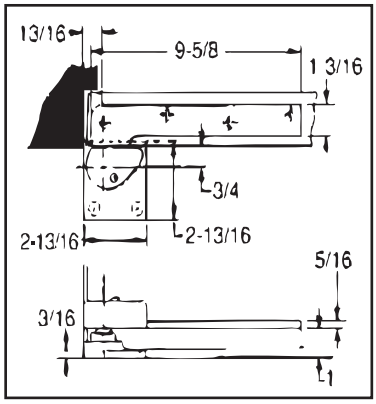

- 3/4" offset
- For interior doors up to 4'0" x 8'0"
- Weight to 300 lbs.
- 0180 top pivot included
- 019 intermediate pivot required
- Bottom pivot mortised into floor
- US32D models listed for use on 3 hour fire doors
- Extended spindles available
- BHMA/ANSI C07162/3530A (modified)

0147

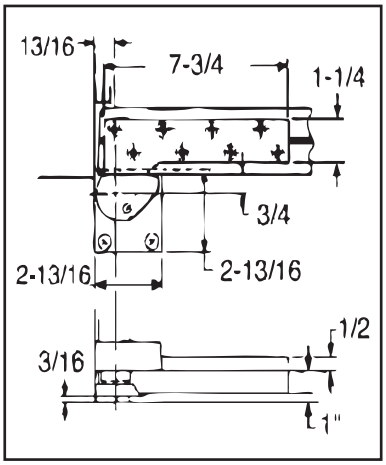

- 3/4" offset
- For interior doors up to 4'0" x 8'6"
- For exterior doors up to 3'6" x 7'0"
- Weight to 600 lbs.
- 0180 top pivot included
- 019 intermediate pivot required
- Bottom pivot mounted to floor
- US32D models listed for use on 3 hour fire doors
- BHMA/ANSI C07162/3530A (modified) Extended spindles available

L0147

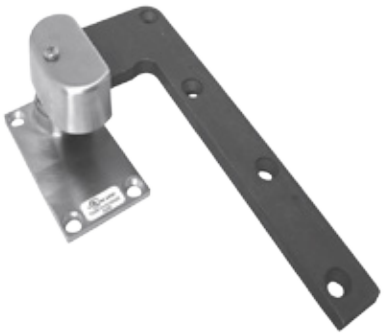

- 3/4" offset
- 1-3/4" lead lined doors
- For interior doors up to 4'0" x 8'0"
- Weight to 1000 lbs.
- L0180 top pivot included
- L019 intermediate pivot required
- Bottom pivot mounted to floor

STAINLESS STEEL CONTINUOUS HINGES

MADE IN USA

IDC stainless steel hinges are full height piano hinges that provide support for the full height of the door.

- For doors up to 600 lbs.
- 4'0" maximum door width
- Hinge leafs are 14 Ga., 304 stainless steel
- Pin is 1/4 diameter 304 stainless steel, barrel .438 diameter
- Knuckles are 2" long with Delrin TM bearings between each
- Hinges -Nominal Sizes 7' (83-1/8"), 8' (95") & 10' (118-3/4") are non-handed. 6'8" (78-3/4") & 7'2" (85") are handed
- Special lengths available
- Standard finish-US32D

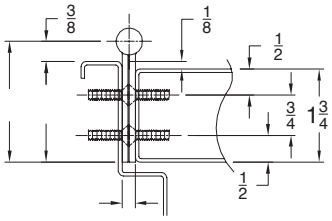

All dimensions in ( ) are actual hinge lenghts.

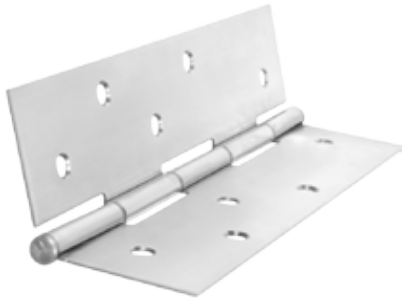

- Self-drilling screws standard, security screws available (wood or machine)

- Fire Rating-UL and ULC fire Listed
  - 3 hours-hollow metal door
  - 90 min.-hollow metal and composite core wood fire door
  - 20 min.-wood door
- Custom Cutouts available

IDCA500 EDGE MOUNT CONCEALED

- For beveled or square edged doors
- For 1-3/4" doors
- For high traffic, high abuse doors
- Heavy-duty 14 Gauge 304 Stainless Steel
- US32D Satin Stainless Steel
- No exposed fasteners when door is closed
- Self drilling screws
- Supports door weights up to 600 lbs. 4'0" Maximum door width
- Electrical modifications available
- UL & ULC fire listed

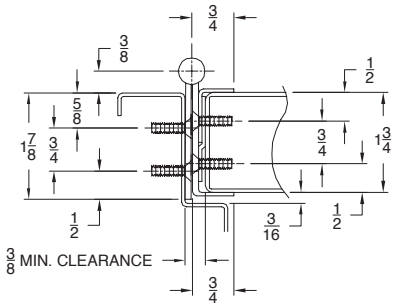

IDCA500 Full Concealed Edge Mount

IDCA505 EDGE GUARD

- Concealed
- For square edged doors
- For 1-3/4" doors
- For high traffic, high abuse doors
- Heavy-Duty 14 Gauge 304 Stainless Steel
- US32D Satin Stainless Steel
- No exposed fasteners when door is closed
- Self drilling screws
- Supports door weights up to 600 lbs.
- 4'0" Maximum door width
- Door edge lip on both faces of door
- Protects door edge
- Adjustable to accommodate slight variances in door thickness
- For specialty door – Use with A538CS or A538CB
- Electrical modifications available
- UL & ULC fire listed

ELECTRIC POWER HINGE WITH CONCEALED WIRES

PTH HINGE

POWER TRANSFER

PTH Power Transfer Hinge

- UL10B listed for 3Hr fire rated doors. If the hinge you are presently using does not bear the (UL) F mark, it is not listed for use with fire doors.
- Wire replacement warranty

PTH

F
10B Listed
for 3hr Fire Rated Door

Applications

Installed in the center hinge position of the door, PTH Power Transfer Hinges provide the concealed wires required between the door and the frame, for the purpose of powering and monitoring electric door hardware.

- Electric Lock Power and Control
- Door and Lock Status Signaling
- Request-to-Exit Signaling

Electric Power Transfer Device

- IDC's heavy duty Electric Power Transfer Device provides a concealed and secure means of transferring electric lock and exit device power and signal wires from the frame to the door.
- Completely concealed when the door is closed.
- The PTD Electric Power Transfer Device is ideal for heavy traffic and applications requiring higher security to inhibit tampering and abuse.

PTD

Model

PTH-2+4	16 Amp Inrush, 6 conductor power transfer hinge 1-pair 16 Amp inrush, 4 Amp continuous; 2-pair 1 Amp @ 12/24V 4.5" x 4.5" standard weight 626 Dull Chrome finish
PTH-4	Four (4) Conductor Power Transfer Hinge 1 Amp @ 12/24V per pair 4.5" x 4.5" standard weight
PTH-10	Ten (10) Conductor Power Transfer Hinge 1 Amp @ 12/24V per pair 4.5" x 4.5" standard weight

Finish

All base material, steel.
626 Dull Chrome (*standard*)
605 Bright Brass
613 Oil Rubbed Bronze
625 Bright Chrome

Options

PTH hinge with door position switch

DPS Concealed Door Position Switch
SPDT, 250mA @ 30VDC
Consult factory for 3 knuckle, and special size

DOOR STOPS

1801 APPLIED STOP

- For use with single or double doors without stops
- Available in all BHMA finishes
- Supplied with machine & woodscrews

1803 FLOOR STOPS

1803	2"diameter x 1-3/8"high bumper rod 5/8"diameter x 3"long
H1803	4"diameter x 1-3/8"high bumper rod 5/8"diameter x 3"long
HD1803	Bumper diameter x height as required rod 1-1/4"diameter x 18"long
EHD1803	3-1/4"diameter x 2"high bum For use in high abuse areas

- Ideal for correctional facilities, schools and institutions
- No exposed fasteners
- Installed with quick set cement

H1803 1803 HD1803 EHD1803

1803HO FLOOR STOP & HOLDER

- Ideal for high abuse installations like schools, heavy doors and correctional facilities.
- Installed with quick set cement
- Door is hooked to portion with a stainless steel hook

1804 PIPE STOP & HOLDER

- Heavy duty construction for use in schools, institutions and correctional facilities
- All stainless steel components with rubber bumper
- The rubber bumper on the door hits the portion when used as a stop
- Door is hooked to portion with stainless steel hook when used as holder
- Floor portion secured in cement
- Door portion - installed with (4) #8 x 1-1/4"screws (supplied standard), sex bolts optional
- Floor portion is solid 1"diameter x 1'long stainless steel rod

JAMB BRACKETS

HARDWARE REINFORCEMENTS

MADE IN USA

FRAME REINFORCEMENTS

- Hollow metal frame reinforcements for most IDC concealed overhead holder/stop jamb brackets

R4401

- Frame reinforcement for 4000 series concealed holders/stops
- Holes pre-drilled and tapped 10-32
- 3/4" wide x 1/8" thick x 7" long, zinc plate CRS
- Part is non-handed but must be installed with stamped arrow toward butt jamb

R90541

- Frame reinforcement for 1000 and 1000SL concealed overhead holders/stops
- Holes pre-drilled and tapped 1/4-20
- 1" wide x 1/8" thick x 7" long, zinc plate CRS
- Part is non-handed but must be installed with stamped arrow toward butt jamb

R4401 R90541

ANGLE JAMB BRACKETS

- Used to change standard surface mounted overhead holders to flush transom or hinge side mounted. Attaches to standard jamb bracket.
- 44443 for 4400 & 3300A
- 70377 for 7000 flush transom only
- 90541 for 8000 (hold open or stop flush transom, stop only hinge side) and 9000
- Available in all BHMA finishes

ANGLE JAMB BRACKETS

- To drop surface mounted overhead holder/stops (i.e. to clear blade stops) or to fill jamb bracket mortise when removing a concealed holder/stop
- 7000JF for 7000
- 9000JF (1/4" thick) for 1000, 1000SL, 8000, 9000, 9000A
- 4000JF (3/16" thick) for 4000, 3300A, 4400
- Available in all BHMA finishes

ELECTRO-MAGNETIC DOOR HOLDERS

The 2000 Series Electro-magnetic Door Holders is Tri-Voltage . Each model (except 2500) can be wired 12V DC, 24V AC/DC or 120V AC. Units can be used on fire/smoke barrier doors held open until released by a remote switching device. They can also be used to just hold a door open. The armature is thru-bolted to the door for security and can be provided with any projection required. When ordering indicate, model, total projection, finish and door thickness if other than 1-3/4".

- 30-45 pound holding power (except 2500 - 300 lbs.)
- Underwriters US and Canada Listed
- California State Fire Marshal Listed
- New York City MEA
- ANSI/BHMA 156.15
- Most models available in US28, sprayed finishes and US32D
- Easy wire installation with quick insert connector
- Armature has 360° Mobility
- No Plastic Parts

- Products are UL10B and CAN4-S104-80M classified, complies with NFPA 80 and NFPA 252 for application to steel fire doors rated up to 3hrs., and wood type fire doors rated up to 1-1/2 hrs.
- Positive Pressure UL10C Classified, Category "J" Complies with IBC UBC7-2 (1997) NFPA 80 & 252
- Smoke & Draft Control Gaskets, Category "H" Complies with IBC7-2 (1997) Part 2, UL1784, NFPA 105 for use on "S" labeled Positive Pressure Steel Fire Doors up to 3 Hours and Wood Type Fire Doors Rated up to 1-1/2 hours
- Air Filtration Tested to ASTM E283, Standard Test Method for Determining Rate of Air Leakage
- #6 x 3/4" Stainless Steel SMS Furnished and Screw Holes are Slotted for Adjustment
- Made in USA

IDC97V

IDC-601 - Nylon Brush Seal

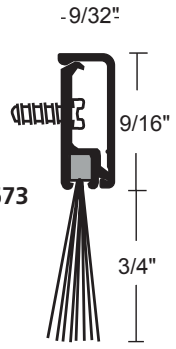

- Synthetic Polymer: Polyamide Bristles
- Excellent Abrasion Resistance, Flexibility and Memory
- Moisture Resistant
- Retains Insecticides Well
- Temperature Range -70F to 160F
- BHMA Certified to ANSI A156.22 Performance Test for Heat, Cold, Air Leakage and Smoke Control in most Common Profiles
- Not Effective Against Water Penetration
- #6 x 3/4" Stainless Steel SMS Furnished and Screw Holes are Slotted for Adjustment
- Made in USA

IDC-673 - Concealed Fastener Nylon Brush Sweeps

- Synthetic Polymer: Polyamide Bristles
- Excellent Abrasion Resistance, Flexibility and Memory
- Moisture Resistant
- Retains Insecticides Well
- Temperature Range -70F to 160F
- BHMA Certified to ANSI A156.22 Performance Test for Heat, Cold, Air Leakage and Smoke Control in most Common Profiles
- Not Effective Against Water Penetration
- #6 x 3/4" Stainless Steel SMS Furnished and Screw Holes are Slotted for Adjustment
- Made in USA

SEDCO 59 SERIES

4 1/2" Square

PUSH PLATE SWITCHES

PRODUCT DESCRIPTION

The 59 Series push plate switches are designed to provide reliable activation of any automatic door.

The 59 Series features 4" square face plates in either stainless steel or blue powder coated alumi- num with etched and paint filled legends. A 4 1/2" square formed stainless steel back plate elimi- nates possible wall damage from standard use.

Designed as a universal switch, the 59 Series fit single-gang or 2-gang electrical boxes with no adapters necessary. A surface mount box is also available.

Each unit is built utilizing heavy gauge stainless steel, aircraft quality rivets and screws, durable finishes and the most reliable microswitch in the industry.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

SEDCO 59J SERIES

Jamb Style

PUSH PLATE SWITCHES

PRODUCT DESCRIPTION

The 59J Series jamb style switches are designed to provide reliable, unobtrusive activation of any automatic door.

The 59J Series features 1 1/2" x 4 1/4" face plates in either stainless steel or blue powder coated aluminum with etched and paint filled legends. A formed stainless steel back plate eliminates possible wall damage from standard use.

Mount the 59J Series directly onto the jamb of an automatic door (fits a 1 3/4" frame) or in MS SEDCO's optional surface mount box.

Each unit is built utilizing heavy gauge stainless steel, aircraft quality rivets and screws, durable finishes and the most reliable microswitch in the industry.

Vestibule

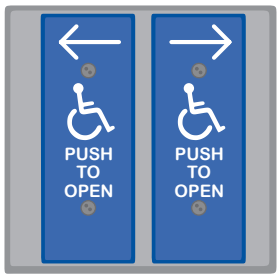

PUSH PLATE SWITCHES

PRODUCT DESCRIPTION

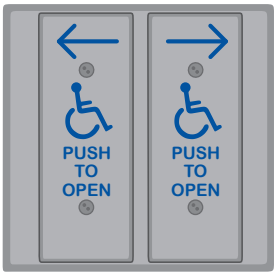

he 59V Series vestibule push plate switches are designed to provide reliable activation of any pair of automatic doors from inside a building vestibule.

The 59V Series vestibule switches feature two separate face plates that will allow for independent activation of two automatic doors. Both face plates are integrated onto a single 4 1/2" x 4 1/2" formed stainless steel back plate that will fit a 2-gang electrical box or MS SEDCO's optional surface mount box.

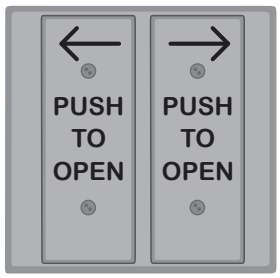

Each unit is built utilizing heavy gauge stainless steel, aircraft quality rivets and screws, durable finishes and the most reliable microswitch in the industry.

INFRARED "TOUCHLESS"

DOOR ACTIVATOR SWITCHES

#216

#216-L

1½" Self-Sticking Mylar Face Plate Decal
(Blue Background/ White Legend)

#216-N

PRODUCT DESCRIPTION

The 216 Series touchless switches are active infrared devices designed to activate full and low energy automatic doors.

Their hands free operation makes them ideal for ADA applications. Other applications include clean-room access points, request-to-exit devices (3 amp contact) and point-of-purchase displays. The 216 is microprocessor controlled allowing for superior operation in a smaller unit.

The 216 Series faceplates are available in three sizes.

TECHNICAL DATA

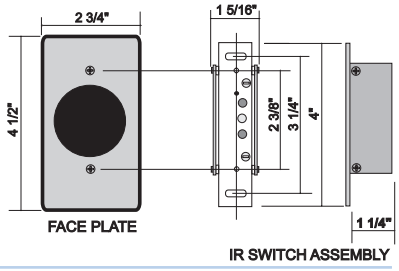

- ADA Compliant Hands-Free Operation
- Faceplates Available in 3 Sizes and Various Finishes
- Microprocessor-Controlled Active Infrared
- Automatic Self-Changing ID Coding Eliminates Possible Electrical Interference
- Adjustable Reaction Time (0.05-1 Sec.)
- Digital Circuit Design
- 12 to 24V AC or DC Operation
- Form C Relay Output
- Heavy Duty 3 Amp Contact
- Selectable Failsafe
- Multiple Operating Modes

SPECIFICATIONS

Detection Method	Amplitude modulated, coded carrier active infrared
Frequency Codes	Automatic self-changing
Avg. Radiated Power	Less than 18mW
Input Voltage	12V to 24V AC or DC, not polarity sensitive
Input Current	Approx. 100mA @ 18V AC
Relay Contacts	Form C rated at 3 amps @ 24V DC (resistive)
Relay Operation Modes	Normal or "fail-safe" (jumper selectable)
Response Time	Less than 0.3 seconds
Reaction Time	Adjustable from 0.05 to 1 sec.
Operating Distance	6 in. to 2.5 ft.
Unit Size	1 5/16"W x 4"H x 1 1/4"D
Mounting Options	Single-gang, 2-gang or door jamb mount
Face Plate Sizes	Fits Single-gang or 2-gang Box (216) 4 1/2"W x 4 1/2"H Fits Single-gang Box (216-L) 2 3/4"W x 4 1/2"H Fits Door Jamb (216-N) 1 11/16"W x 4 1/2"H
Face Plate Finish	Standard: Brushed Stainless Steel For Special Finishes Contact Factory
Temperature	-13°F to 140°F (-25°C to 60°C) Recommended For Interior Use

216TX SERIES

INFRARED WIRELESS TOUCHLESS

DOOR ACTIVATOR SWITCHES

216TX-TG

PRODUCT DESCRIPTION

The 216TX Series wireless touchless switches are infrared devices designed to activate full and low energy automatic doors. The built-in wireless transmitter offers the added benefit of easy installation, requiring no wiring to the switch.

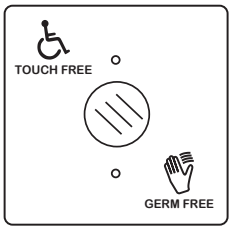

The hands free operation of the 216TX makes them ideal for ADA applications and locations where hygiene is important such as restrooms, health care facilities or cleanrooms. The 216TX is microprocessor controlled, allowing for superior operation in a smaller unit.

The 216TX has a 4 1/2" stainless steel faceplate and comes installed in the 1020 box complete with a transmitter.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

TECHNICAL DATA

- ADA Compliant Hands-Free,Germ-Free Operation
- Microprocessor-ControlledActive Infrared
- Digital Circuit Design
- Wireless Transmitter Features ClearPath™ Technology With Three User-selectable Frequency Settings (300 MHz, 390 MHz,HDRC™)
- FCC Licenses For All Three Frequency Settings
- SignalLock™ Guarantees Signal Transmission When PresenceIs Detected
- Integrated Signal Radiating Antenna Boosts Signal Strength
- Compatible With Most 300 MHz,390 MHz, and ClearPath™ CP/TX Receivers

216TX-TG

216TX-HT

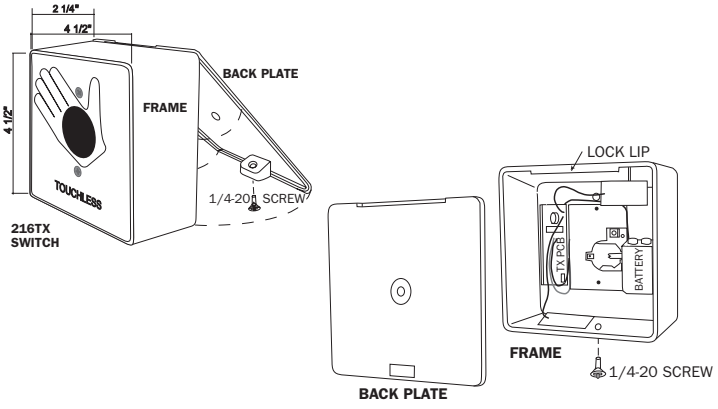

216TX-WT

216TX-HG

SPECIFICATIONS

Detection Method	Amplitude modulated, coded carrier active infrared
Avg. Radiated Power	Less than 5 mW/cm²
Input Voltage	216: 3.3 Volts DC Coin Cell Battery (CR2032) TX: 9 Volt DC Battery
Response Time	<300m Seconds
Operating Distance	±1 - 5 inches
Unit Size	4 3/4"W x 4 3/4"H x 2 1/4"D
Mounting Options	Includes wall mount box
Face Plate Sizes	4 1/2" square
Face Plate Finishes	Standard: Brushed Stainless Steel For Special Finishes & Legends, Contact Factory
Temperature	-4°F to 140°F (-20°C to 60°C)

614 SERIES

EXTREME SWITCHES

DOOR ACTIVATOR SWITCHES

PRODUCT DESCRIPTION

The 614 Series extreme switches are designed to provide reliable activation of any automatic door in extreme environments.

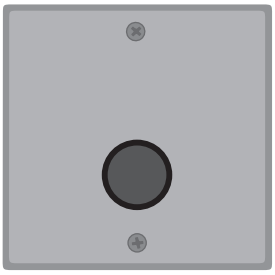

The 614 series are virtually indestructible switches. The 1" diameter red anodized aluminum button utilizes a piezo material that has no moving parts. Ideal for industrial clean rooms or other wet environments, the 614 is completely waterproof.

Two different size face plates are available. Both are formed, heavy gauge stainless steel. The 614 series switches will fit a single-gang electrical box or a 1 3/4" door frame. Surface mount boxes are also available.

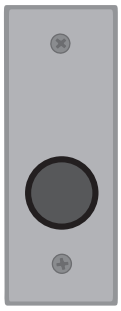

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

TECHNICAL DATA

- Virtually Indestructible Switch
- 1" Diameter Red Anodized Pressure Sensitive (5 lbs.) SPST Button
- Face Plate Sizes:
  Single-gang – 4 1/2" x 4 1/2"
  Jamb – 1 11/16" x 4 1/2"
- Waterproof – Completely Sealed
- Weatherproof (-40°F to 257°F)
- No Moving Parts – Patented Solid State Piezo Technology
- Tested To 50 Million Cycles
- Radio Control Versions Available

NEXGEN CAPTOUCH SERIES

CAPACITIVE TOUCH

DOOR ACTIVATOR SWITCHES

#NG-CT-HSS

#NG-CT-P

PRODUCT DESCRIPTION

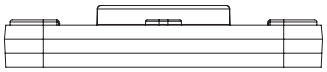

The NexGen CapTouch Series actuator is the next generation of automatic door activation switch. The NexGen CT combines the latest advances in capacitive sensing technology with durable composite plastics, to create an actuator that is both stylish and tough. NexGen switches are extremely thin and utilize no moving parts. The 4" faceplate is bordered by a clear bezel edge that illuminates upon activation.

Their hands free operation makes them ideal for ADA applications. Other applications include clean-room access points, request-to-exit devices (1 amp contact), and point-of-purchase displays. The NexGen Capacitive Touch switch is microprocessor controlled, allowing for superior operation in a smaller unit.

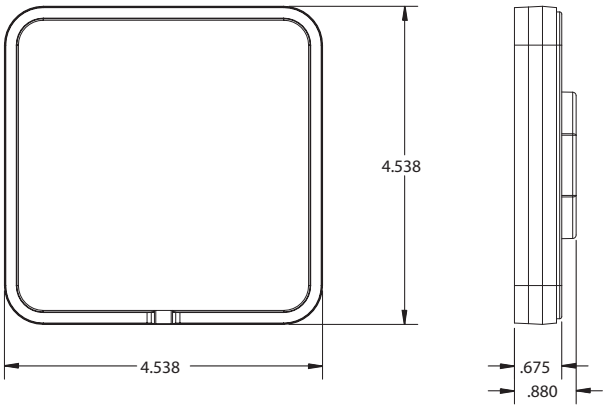

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

TECHNICAL DATA

- ADA Compliant Operation
- Faceplates Available in Various Finishes
- Microprocessor-Controlled Capactive Touch
- 12 to 24V AC or DC Operation
- Form C Relay Output
- Heavy Duty 1 Amp Contact

DIMENSIONS

SPECIFICATIONS

Activation Method	NexGen technology using digital burst mode charge transfer sensor for detecting near proximity or touch.
Input Voltage	12V to 24V AC or DC, not polarity sensitive
Input Current	Nominal ± 15mA @24V AC Activated ± 40mA @ 24V AC
Relay Contacts	Form C rated at 1 amp @ 24V DC (resistive)
Operating Distance	Adjustable from touch (0") to 1"
Unit Size	4.5"W x 4.5"H x 0.75"D
Face Plate Sizes	Standard: Brushed Stainless Steel For Special Finishes Contact Factory
Face Plate Finish	4 1/2" square
Temperature	-13°F to 140°F (-25°C to 60°C) Recommended For Interior Use

830 SERIES

Heavy Duty Keyswitches

PRODUCT DESCRIPTION

The 830 Series heavy duty keyswitches are a reliable and economical way to momentarily activate or turn on and off low voltage electrical devices.

When used with automatic doors, the 830 series keyswitches can be used to turn an operator or any activation device on and off. They are also a simple way to provide secure activation of any automatic door.

The 830 series keyswitches are available with a maintained or momentary contact switch. An additional switch of either type can be added. The 830 series also features a choice of three different size stainless steel faceplates. The heavy duty switch bracket features a switch activator dead stop which prevents the key cylinder from damaging a single switch.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

#830 (4 1/2" x 4 1/2" Face Plate)

830-59J-H-R

830-59J-HSS-RG

830-59J-H

830-59J-WSS-RG

PRODUCT DESCRIPTION

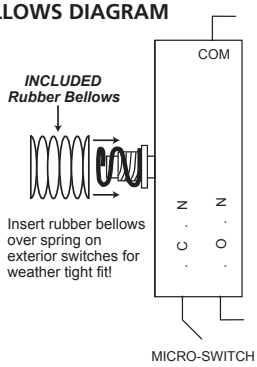

The 830 Series combination keyswitches and push plate switches are designed to provide reliable and secure activation of any low voltage device.

These unique devices are two switches in one. The keyswitch and the push plate switch can be set up to work independently of each other or the keyswitch can turn the push plate switch on and off, providing an economical way to secure the push plate switch after hours.

The keyswitch is available with either a momentary or maintained contact switch. The push plate switch utilizes the 59J series face plates. The 830 series combination switch can also be used with radio control transmitters.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

Mounting Boxes and Escutcheons

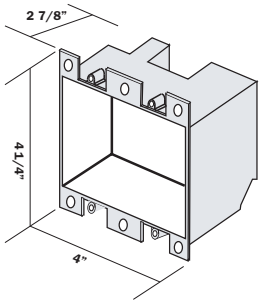

PRODUCT DESCRIPTION

All mounting boxes are exterior grade polycarbonate surface mounting boxes designed so the switch will recess mount for superior weather protection and to eliminate potential snagging.

ONE PIECE MOUNTING BOXES

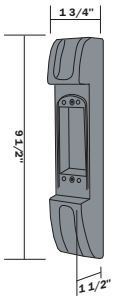

1035 Series
2" deep jamb box. Compatible with 59J Series switches and many other switches designed for jamb mount.

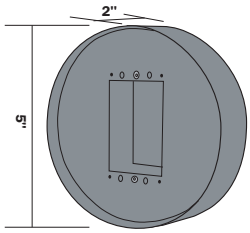

255R Series
2-gang recessed mount box.

TWO PIECE MOUNTING BOXES

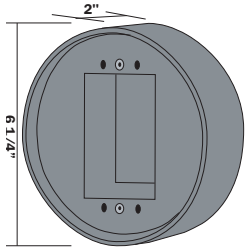

Two piece mounting boxes are designed to make battery replacement quick and easy for wireless applications.

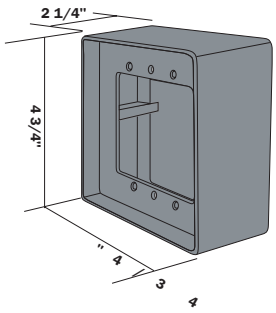

1010 Series
Compatible with 59J Series switches.

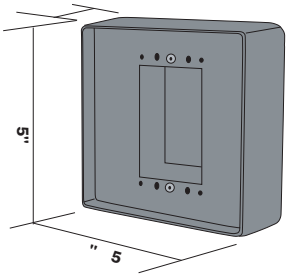

1025 Series
1025 SeriesRound boxes compatible with all 59R4 Series switches.

1030 Series
Round boxes compatible with all 59R6 Series switches.

1015 Series
Compatible with 59, 59V, 1078, 216, 830 & 614 Series switches.

1020 Series
Compatible with 59, 216 and 614 Series switches.

DECORATIVE ESCUTCHEONS

ESC-59R4: Plate for 59R4 Series
ESC-59R6: Plate for 59R6 Series

Dress up the appearance of your MS Sedco round switch with a stainless escutcheon plate. Plates are available for the R4 and R6 switches, and can be mounted directly to the wall or to a single or 2-gang electrical box.

CLEARPATH™ CP/TX

TRANSMITTERS

(Pictured with 59-H—Switches availableseparately or included in ClearPath Kits)

PRODUCT DESCRIPTION

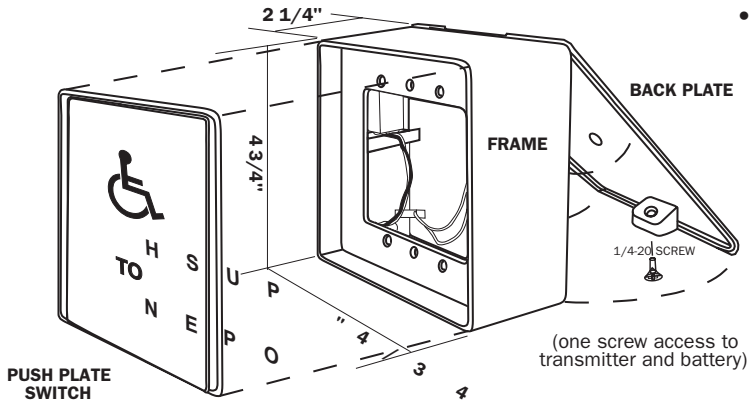

The CP/TX wall mount transmitter is part of the ClearPath Radio Control Push Plate Switch Activation System that provides the most reliable wireless activation of automatic doors available.

The CP/TX transmitter comes prewired and installed with battery in a surface mount box making installation quick and easy. The CP/TX can transmit three different frequencies. If interference is encountered on one frequency, simply switch to one of the other frequencies to solve the problem. The CP/TX can also be used interchangeably with other manufacturer's products that operate on its frequencies as well. Only ClearPath offers this flexibility.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

TECHNICAL DATA

- Utilizes Proprietary High Definition Radio Control™ (HDRC™) For Unsurpassed Signal Transmission Clarity
- Three User Selectable Frequencies Available In Single Unit: HDRC™, 300 MHz, 390 MHz
- FCC License For All Three Frequencies
- SignalLock™ Guarantees Signal Transmission When Push Plate Switch Is Pressed
- Power Saving Circuitry Extends Battery Life
- Integrated Signal Radiating Antenna Boosts Signal Strength
- Transmitter And Battery Factory Prewired And Installed In Mounting Boxes
- Powered By Standard 9V Battery
- Quick Battery Access
- Sequencing Transmitter Available (CP/STX)
- Temperature Range: -4°F to 140°F (-20°C to 60°C)

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

CLEARPATH™ CP/STX

SEQUENCING TRANSMITTERS

(Pictured with 59-H—Switches availableseparately or included in ClearPath Kits)

PRODUCT DESCRIPTION

The CP/STX wall mount transmitter is part of the ClearPath Radio Control Push Plate Switch Activation System that provides the most reliable wireless activation of automatic doors available.

The ClearPath™ sequencing radio control transmitters provide reliable activation of two automatic doors. They share the same PCB as the standard transmitter, however each sequencing version has a software upgrade that enables them to transmit two separate signals with an adjustable delay between them in order to sequence vestibule doors one after the other from either direction. Several styles are available - each comes with a sequencing transmitter PCB, antennas and battery completely assembled in a surface mounting box.

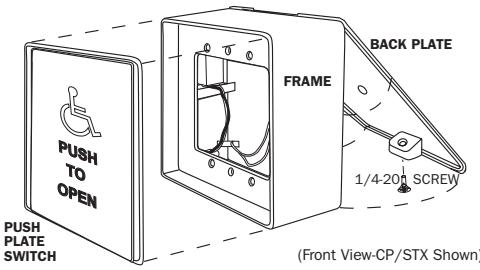

- CP/STX = Sequencing version of the CP/STX (Use with 59 Series Switches)
- CP/STX-R4 = Sequencing version of the CP/STX-R4 (Use with 59R4 Series Switches)
- CP/STX-R6 = Sequencing version of the CP/STX-R6 (Use with 59R6 Series Switches)
- CP/STX-J = Sequencing version of the CP/STX-J (Use with 59J Series Switches)
- CP/STX-P = Sequencing version of the CP/STX-P (Use with 608 Series Bollards)

All ClearPath sequencing transmitters have 3 selectable frequencies - High Definition Radio Control™ (HDRC™), 300 MHz and 390 MHz. A simple slide switch allows them to be used interchangeably with past MS SEDCO and other competitor's products utilizing these frequencies.

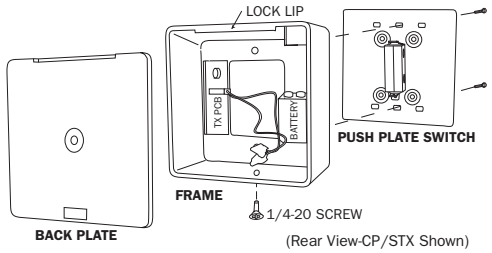

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

CLEARPATH™ CP/TX-J

TRANSMITTERS

(Pictured with 59J-H—Switches availableseparately or included in ClearPath Kits)

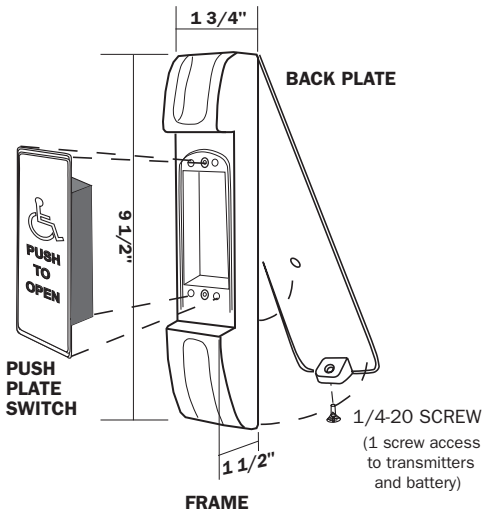

PRODUCT DESCRIPTION

The CP/TX-J jamb mount transmitter is part of the ClearPath Radio Control Push Plate Switch Activation System that provides the most reliable wireless activation of automatic doors available.

The CP/TX-J transmitter comes prewired and installed with battery in a surface mount box making installation quick and easy and the entire assembly will fit on a 1 3/4" door frame.

The CP/TX-J can transmit three different frequencies. If interference is encountered on one frequency, simply switch to one of the other frequencies to solve the problem. The CP/TX-J can also be used interchangeably with other manufacturer's products that operate on its frequencies as well. Only ClearPath offers this flexibility.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

CLEARPATH™ RADIO CONTROL

VESTIBULE SYSTEM

PRODUCT DESCRIPTION

The ClearPath vestibule system provides reliable wireless sequenced activation of automatic vestibule doors.

The CP/STX and CP/STX-J receive a programming upgrade from the basic transmitters that enables them to be sequencing transmitters. They mount on the interior and exterior of the vestibule entrance and are capable of transmitting two separate signals with an adjustable time delay between them to sequence vestibule doors one after the other from either direction.

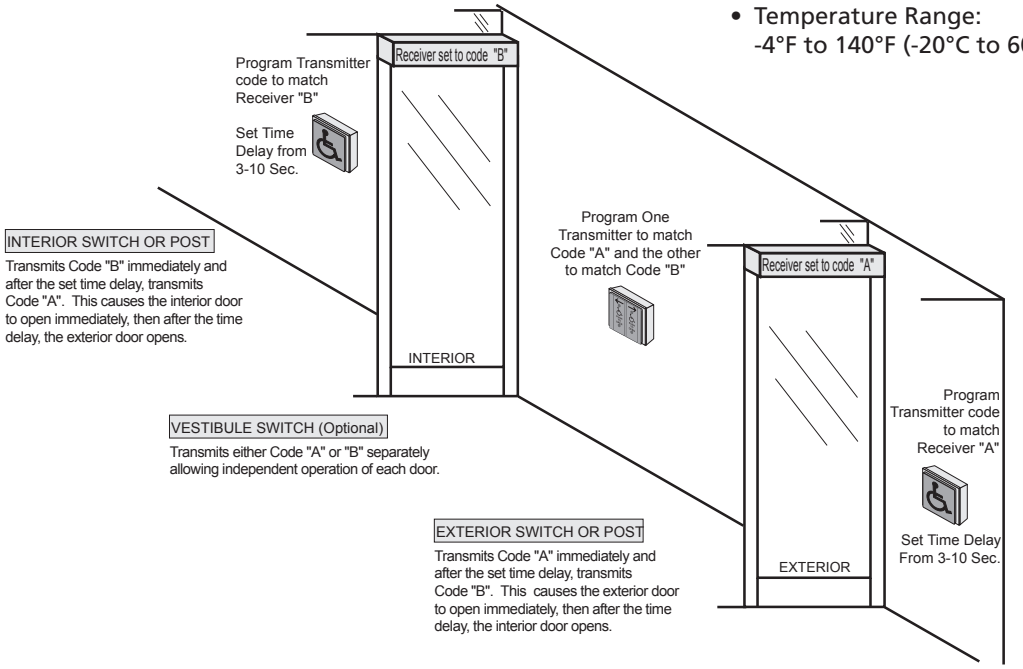

The CP/TX-V is a dual transmitter that mounts in the vestibule between the doors allowing independent activation of each door.

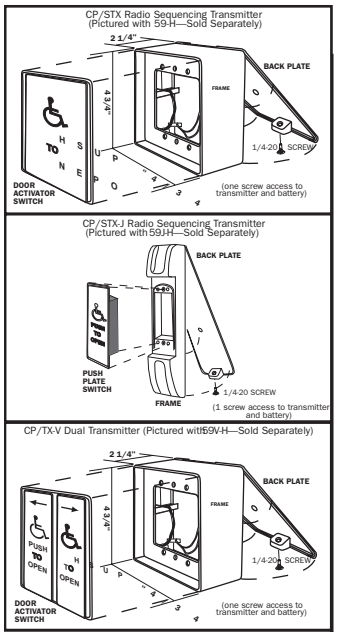

Radio Control Components for the ClearPath Vestibule System (See Diagram):

- Interior: 1-CP/STX (wall mount) or 1-CP/STX-J (door jamb mount) Sequencer
- Inside Vestibule: 1-CP/TX-V Dual Transmitter
- Exterior: 1-CP/STX (wall mount) or 1-CP/STX-J (door jamb mount) Sequencer
- Interior Door Operator: 1-CP/RX Receiver
- Exterior Door Operator: 1-CP/RX Receiver
- *ClearPath transmitters & sequencers require push plate switches that are sold separately.

TECHNICAL DATA

- Utilizes Proprietary High Definition Radio Control™ (HDRC™) For Unsurpassed Signal Transmission Clarity
- Three User Selectable Frequencies Available In Single Unit: HDRC™, 300 MHz,390 MHz
- FCC License For All Three Frequencies
- SignalLock™ Guarantees Signal Transmission When Push Plate Switch Is Pressed

CLEARPATH™ CP/RX

MULTI-MODE RECEIVER

ClearPath™ CP/RX
Multi-Mode Receive

PRODUCT DESCRIPTION

he CP/RX receiver is part of the ClearPath Radio Control Push Plate Switch Activation System that provides the most reliable wireless activation of automatic doors available. All ClearPath transmitters communicate with this one receiver.

In addition to being a receiver, the CP/RX can be easily programmed to become a timer, dual receiver or a sequencing receiver.

The CP/RX accepts three different frequencies. If interference is encountered on one frequency, simply switch to one of the other frequencies to solve the problem. The CP/RX can also be used interchangeably with other manufacturer's products that operate on its frequencies. Only ClearPath offers this flexibility.

American National Standards Insti-tute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

CLEARPATH™ CP/TX-P

TRANSMITTERS

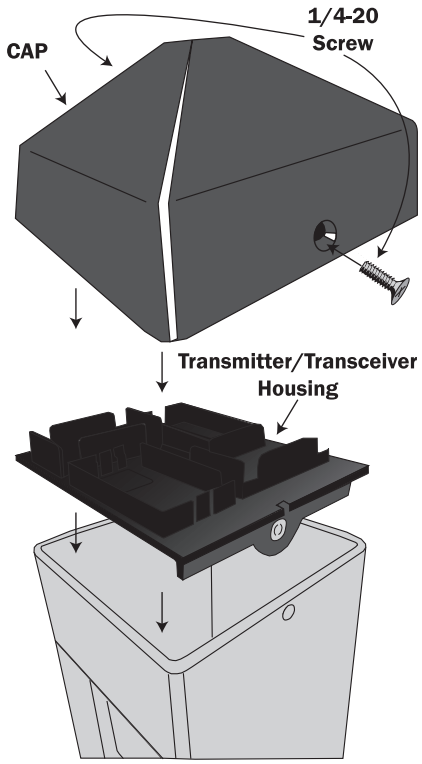

ClearPath™ CP/TX-P
In-Post Transmitters

PRODUCT DESCRIPTION

The CP/TX-P post mount transmitter is part of the ClearPath Radio Control Push Plate Switch Activation System that provides the most reliable wireless activation of automatic doors available.

The ClearPath radio control transmitters provide reliable activation of any automatic door. When a 608 Series Bollard is ordered from the factory with a wireless option, the Bollard will come complete with the appropriate transmittercomponents installed in the integrated cap assembly that attaches to it.

The CP/TX-P can also be used interchangeably with other manufacturer's products that operate on its frequencies as well. Only ClearPath offers this flexibility.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

CLEARPATH™ CP/TX-HH

HAND-HELD TRANSMITTERS

(CP/TX-HH2 Pictured)

PRODUCT DESCRIPTION

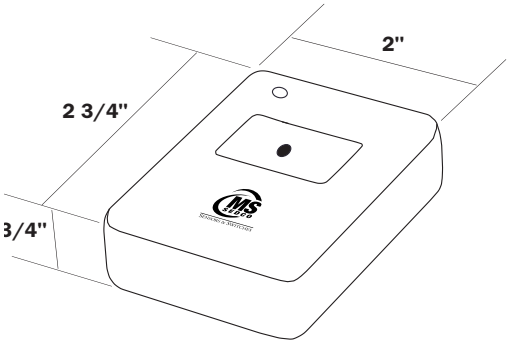

The CP/TX-HH hand-held micro-transmitters are available in either a one button (CP/TX-HH1) or two button (CP-TX-HH2) versions and are a part of the ClearPath Radio Control Door Activation System that provides the most reliable wireless activation of automatic doors available.

The CP/TX-HH hand-held micro-transmitters are small enough to wear as a necklace yet have large, easy to activate buttons. The CP/TX-HH can transmit three different frequencies. If interference is encountered on one frequency, simply switch to one of the other frequencies to solve the problem. The CP/TX-HH can also be used interchangeably with other manufacturer's products that operate on its frequencies as well. Only ClearPath offers this flexibility.

CLEARPATH™ S-TRX TRANSCEIVERS

(Pictured with 59-H—Switches availableseparately or included in ClearPath Spectrum Kits)

PRODUCT DESCRIPTION

The S-TRX Transceiver is a part of the ClearPath Spectrum Wireless System. When used in conjunction with the S-COR Coordinator, the S-TRX functions in a similar role as traditional wireless trans-mitters, but this is where the similarities end. The Spectrum Wireless System provides several industry firsts:

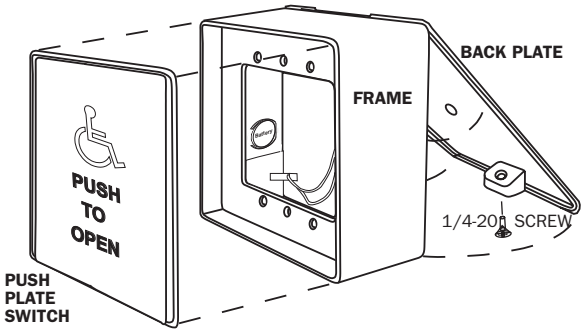

- Digital two-way communication allows for greater security and ensures successful signal transmission between devices.
- LCD screen (S-COR) for quickand easy programming.
- Upon switch activation, the Transceivers communicate valuable information that is displayed on the LCD screen including: device ID, signal strength and battery monitoring.
- Pairing of multiple Transceivers with Coordinators.
- Two built-in outputs (S-COR).
- 3 year battery life (S-TRX).

ClearPath Spectrum products operate at 2.4 GHz, making the wave length more than 5 times shorter than commonly-used frequencies. Shorter waves pass through cracks and barriers easier, and transceivers will continue to attempt to contact the Coordinator until it receives an acknowledgement.

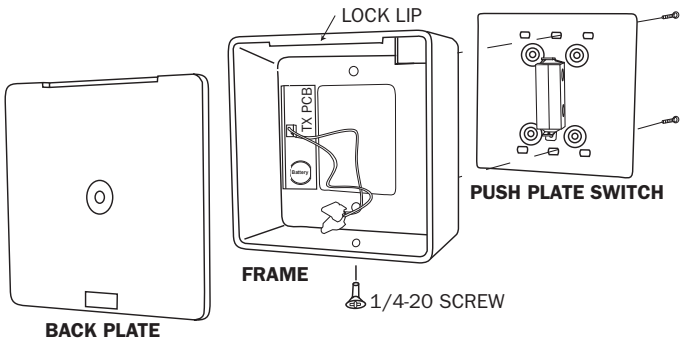

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

FEATURES

- Smaller, refined design makes an ideal application for many knowing act applications
- Beveled edges are less susceptible to damage by deflecting harsh impacts from any side
- Stainless steel finish is scratch/scuff resistant and will not deteriorate or rust from exposure to liquids and other cleaning agents
- Graphics are etched onto the faceplate for maximum durability
- Available in various styles to fit almost any application, hard wired or wireless

PREMIUM PUSH PLATES

6" SQUARE

PBS6 SERIES

A larger solution of the square push plate, this 6" plate is more visible, easier to use, and doesn't distract from the architecture.

- Greater surface area of the push plate makes this push plate easy to use
- Beveled edges provide a tamper and vandal resistant solution
- Universal touch area at any "push" location
- Stainless steel finish is scratch/ scuff resistant and will not deteriorate or rust
- Text and logo are baked onto the surface for maximum durability
- Available in multiple styles to meet specifications and customer requests

36" FACEPLATE FOR MAXIMUM ACCESSIBILITY

LPR36 PUSH PLATE

ACCESSIBILITY SERIES

1ST PEDESTRIAN DOOR PUSH PLATE LISTED UNDER UL325

DAMAGE RESISTANT TO HEAVY DUTY IMPACTS

IDEAL FOR INDIVIDUALS WITH LIMITED MOBILITY

c UL US LISTED

The LPR36 maximizes accessibility and independence for people with disabilities. The entire surface is "all-active" with four redundant membrane switches for consistent coverage. The LPR36 is constructed from a stainless steel faceplate that makes it highly durable and able to withstand harsh weather conditions, while keeping it rust and corrosion free.

FEATURES

- 36 × 6 inch activation area
- Low profile and 1-inch thick with a stainless steel faceplate
- Clear, powdercoat finish reduces unwanted fingerprinting
- "All-active" faceplate allows activation from any angle
- Listed under UL325 for both US and Canada
- Exceeds the California Building Code: Section 1117B.6
- Can be mounted to either a wall or bollard in a few easy steps
- Ideal for users with limited mobility or when accessibility is key
- Optional built-in wireless transmitter is pre-installed in the top end cap

PBDGP SERIES

DUAL VESTIBULE PUSH PLATE

PREMIUM PUSH PLATE
FOR KNOWING ACT APPLICATIONS

PBDGP SERIES

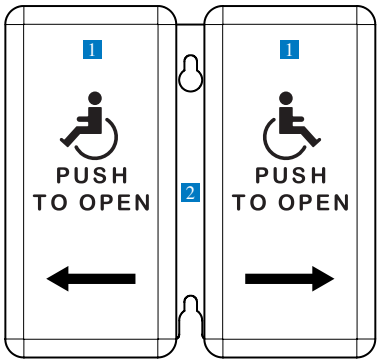

10PBDGP1
Push To Open
Text and Logo

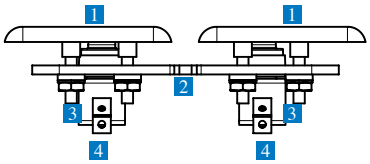

The PBDGP Series, dual vestibule push plate, provides an aesthetically pleasing solution for vestibule applications. This provides an option to open one set of doors independently from the other set. Also, this push plate is an ideal addition to any automatic sequencing application.

COMPONENTS VIEW

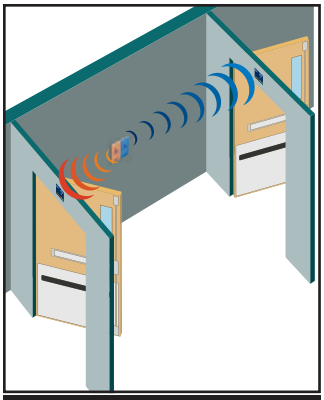

1 Faceplates
2 Backplate
3 Cherry Switches
4 Contacts

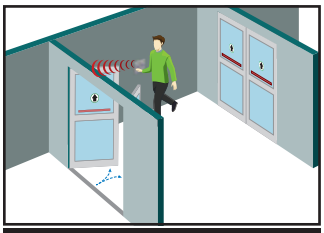

FEATURES

- Provides a more efficient design for vestibule applications by eliminating the need for two separate push plate on a wall
- Beveled edges reduce accidental damage from any side
- Stainless steel faceplate is scratch/scuff resistant and will not deteriorate or rust from exposure to liquids and other cleaning products
- Graphics are etched onto the faceplates for maximum durability
- A weather boot is located between the faceplates and the backplate for all-weather applications

TOUCHLESS TECHNOLOGY ACTIVATION SENSORS

MS08 SERIES

MAGIC SWITCH

10MS08U (above) contains single and double gang, black faceplates with wave to open text
MS08U CUSTOM offers a choice of faceplate styles

FEATURES

- Touchless technology is ideal for use in sterile environments (i.e. clean-rooms, healthcare facilities, food processing plants)
- Can be hidden from view by installing the microwave sensor behind non-metallic surfaces (i.e. mounted behind drywall)
- Variable adjustment of detection zone from 4 to 24 inches
- Water-resistant foam gasket provides increased reliability when exposed to water or cleaning products
- Low profile, beveled design reduces accidental damage

APPLICATIONS

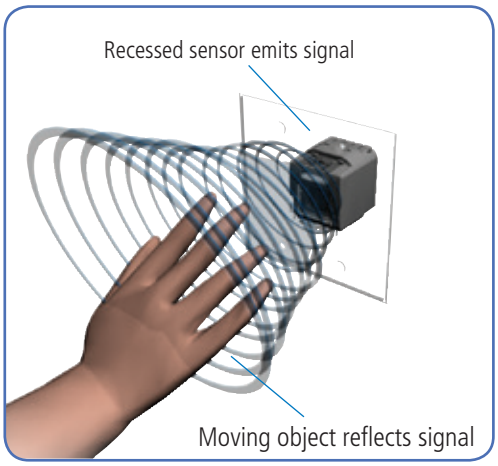

- Sterile environments (clean-rooms, operating rooms, pharmaceutical, manufacturing, etc.)
- Healthcare facilities (hospitals, assisted living, eldercare, etc.)
- Food processing plants (reduces cross-contamination)
- Architectural specific applications (low-profile requirement)

Easy Installation

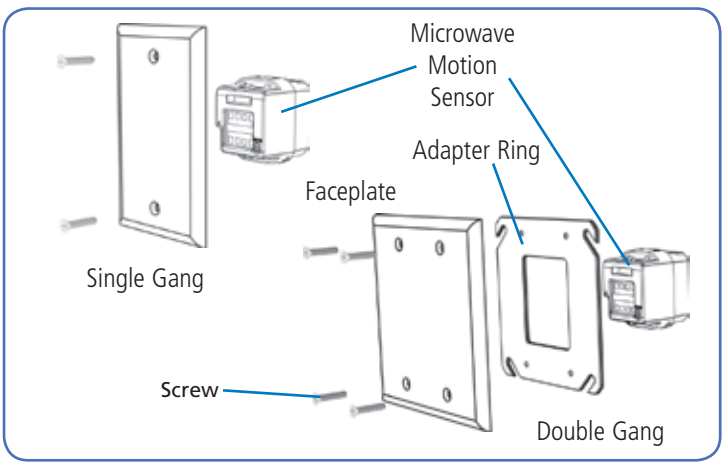

The MS08 utilizes microwave technology and the Doppler Radar effect. This Doppler Radar effect emits a signal that, when reflected by a moving object (i.e. a hand, cart, wheelchair, etc.), activates the door.

This touchless feature greatly reduces the spread of bacteria commonly found on push plates requiring a physical touch for activation.

The MS21 is a state-of-the-art touchless activation plate that utilizes capacitance technology to detect and trigger activation in automatic doors. The low profile, hands-free MS21 includes a stainless steel faceplate and illuminated LED mounting ring for maximum durability and visibility. Other innovative features include adjustable detection zones, audible alerts, NEMA 4-rated enclosure and customizable faceplate text and logos.

The MS21 combines form and function into an aesthetically pleasing design that is ideal for healthcare facilities, clean rooms, washdown areas and a variety of other applications.

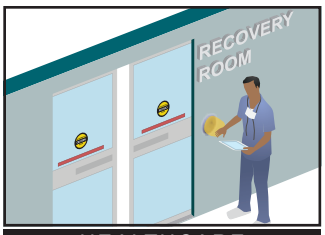

TOUCHLESS SOLUTION ELIMINATES SPREAD OF GERMS

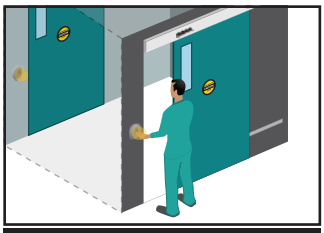

FEATURES AND BENEFITS

- Touchless design reduces spread of bacteria, disease and contamination
- LED illumination increases plate visibility
- Stainless steel faceplate improves durability and reduces deterioration caused by liquids and other cleaning agents
- Low profile, beveled design reduces accidental damage from errant objects like carts or hospital beds
- Various design options available to match any application
- Audible alert can be turned on or off to signal activation
- Adjustable detection zone provides added levels of customization

KEY SWITCHES

Application

IDC key switch assemblies provide an economical method of providing authorized control for a variety of applications. A choice of several contact configurations ensure compatibility with virtually any system.

- Access Control
- Automatic Gate Operation
- Roll Up Door Operation
- Alarm Shunt
- Alarm Reset
- Machine Operation

New Construction or Retrofit

IDC key switch assemblies are compatible with U.S. standard, 1.125" and 1.25" mortise key cylinders and interchangeable core cylinders (not included). Compatibility with a new or existing facility mechanical key system is maintained. Standard switch assemblies are single gang box mounted. Assemblies equipped with narrow faceplates are mounted directly to the door frame.

Functions

- Momentary
- Timed Actuation (1-60 seconds)
- Alternate Action (On-Off)
- Tamper resistant, recessed cylinder (all except 700N)
- Tamper resistant spanner screws
- Heavy duty all steel assembly
- Stainless steel faceplates of 20 gauge or 0.25" thickness of aluminum
- Large actuator for positive and consistent activation
- 6 Amp @ 30 VDC
- 7", 22 gauge wire leads
- Compatible with 1.125" or 1.25" mortise cylinder (not included)

700

700N

- Spanner security screws and tool
- 20 Gauge stainless steel
- Optional plated finishes

700 Single gang, wall mounted, anti-tamper recessed key cylinder
700N Narrow 1.75" wide, frame mounted

800

800N

- 0.25" Aluminum faceplate
- Spanner security screws and tool
- Anti-tamper plugs for mounting screws
- Anti-tamper recessed key cylinder

800 Single gang, wall mounted
800N Narrow, 1.75" wide frame mounted
Four mounting screws provide increased integrity

700T
- Two Gang
- 4 Security screws
- 20 Gauge stainless steel

Two gang faceplate provides for the use of a larger junction box to accommodate time delays, audible annunciation and increased wiring.

300 MHZ TRANSMITTERS & RECEIVERS

RF-300

DIGITAL RADIO TRANSMISSION

FEATURES

- Hand-held transmitters outfitted with flag connectors, plug directly into most of IDC's push plate switches.
- Analog radio control for strong, short-range, transmissions
- Transmitters are programmed to the receiver through dip switch settings which offer up to 1,024 unique identifier codes.

Easy Installation And Programming

IDC's 300 MHz frequency analog radio control transmitters and receivers are universally compatible with any type of automatic door application. With the ability to recognize 1,024 unique codes per receiver, the RF–300 offers an easy-to-install alternative and makes adding new transmitters simple.

RF-390

DIGITAL RADIO TRANSMISSION

FEATURES

- Transmitters with pre-wired flag connectors plug directly into any push plate
- The digital transmitter and receiver are set up easily with a “Learn Code” button instead of using DIP switches
- The red indicator LED allows technicians to monitor when the transmitter is activated to determine range and battery life

Easy Installation And Programming

IDC’s 390 MHz, digital, radio control transmitters and receivers are universally compatible with any type of automatic door application.

The RF–390 bridges the gap from analog to digital. This setup offers digital transmission, narrowing the frequency band for less interference as well as limiting the number of devices that have access.

900 MHZ TRANSMITTERS & RECEIVERS

RF-900

COMPACT

FEATURES

- A combination of the industry's most compact 900 MHz transmitters and receiver for optimal installation convenience
- Multi-color LEDs on receiver provides installer with visual notification of signal strength and activation status
- Frequency hopping allows consistent transmission in areas with other 900 MHz devices
- A compact battery-powered, hardwired transmitter is ideal for push plate applications
- 1, 2, 3 and 4 button hand-held transmitters provide flexibility where multiple receivers are used
- Extended hold and toggle/pulse functionality is integrate for various application needs
- Delay and no-delay learn modes provide either instant or delayed activation for sequencing doors

Primary Application

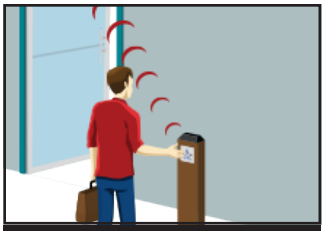

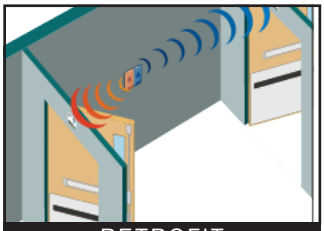

IDC's 900 MHz compact transmitters and receiver allow wireless activation of any door control. FCC Part 15 certification ensures proper compliance with federal radio frequency regulations.

900 MHz wireless technology provides greater line-of-sight transmission distance than legacy wireless frequencies. It also provides better penetration of obstacles such as walls, partitions, doors or low-emissivity glass.

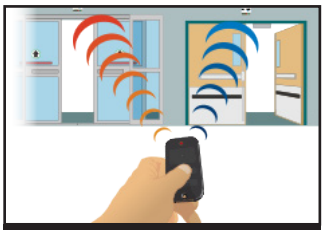

IDC's 900 MHz series of wireless devices includes the touchless retrofit transmitter for easy upgrade of touch push plates to touchless solutions, which typically require additional wires to be run for installation.

THE BOLLARD

FEATURES

Constructed with durable carbon steel and will mount IDC 4 ¾" square and 4 ½" round push plate lines

- Can be mounted on either existing concrete or newly poured concrete
- Available in silver, bronze, and black
- Stainless steel mounting bracket
- UV Resistant ABS plastic cap allowing for wireless transmissions

EASY INSTALLATION
MULTIPLE APPLICATIONS
VERY DURABLE

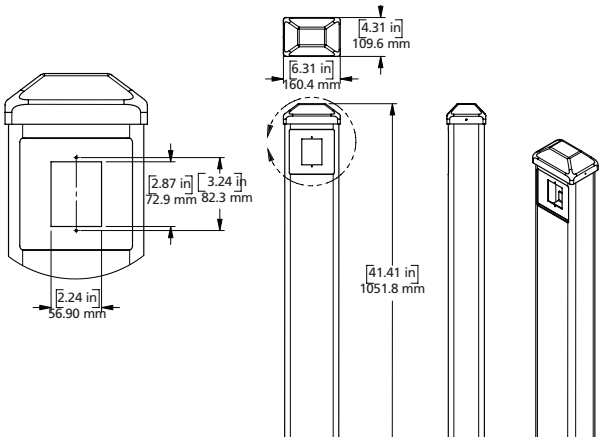

The Bollard is used for mounting pushplates that activate automatic doors.

It will accept IDC's 4 ½" Square Pushplate, 4 ¾" Square Pushplate, 4 ¾" Panther Pushplate, Dual Vestibule Pushplate and 4 ½"Round Pushplate. The post is made of durable carbon steel and the mounting bracket is made of stainless steel for strength. It can be mounted on either existing concrete or newly poured concrete.

628 SERIES

2-SWITCH BOLLARDS

HEAVY DUTY 2-SWITCH BOLLARDS

(Shown with 59-HSS & 59-H)

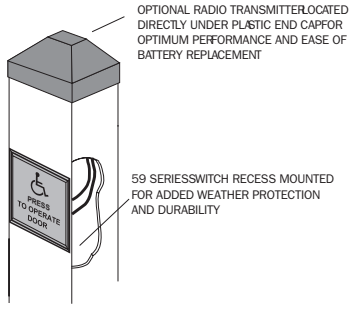

PRODUCT DESCRIPTION

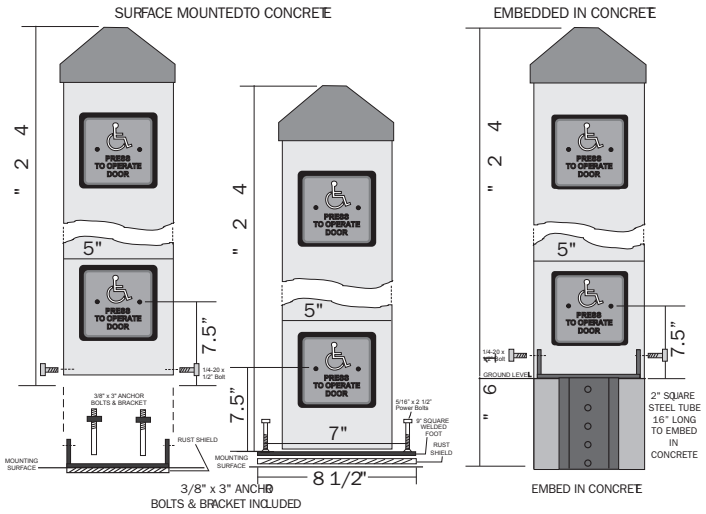

The 628 Series Switch Bollards are designed to provide a free standing self-contained door activation device that can be installed at any location. The 628 features a second switch with a centerline 7.5" above the floor in compliance with the 2007 California Building Code.

Attractive and built to withstand the toughest conditions, the 628 Series bollards are made of 5" square tubular steel that is 1/8" thick. The durable LongLife™ Finish protects against rust and consists of two coats: a zinc rich base coat on all surfaces and an industrial grade exterior powder coat finish. An innovative ABS plastic rust shield fits under the mounting shoe to help block the corrosive action of concrete to steel contact. The integral plastic cap allows superior wireless signal range.

The 628 Series bollards come stan-dard with two single recess mounted switches or blank (without preps) so that equipment can be custom fit in the field. MS SEDCO Also offers custom machining and special finishes. All versions can be ordered for either hardwired or wireless operation.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

514 SERIES

Push Plate Switch Posts

HEAVY DUTY

PRODUCT DESCRIPTION

The 514 Series Switch Posts are designed to provide a free standing self-contained door activation device that can be installed at any location.

As an economical alternative to larger bollards, the 514 offers a sleek look. The 514 features a surface external foot for stability and easy installation, and an ABS rust shield. The 514 bollard is constructed for use with jamb-width switches, and is best complimented with a 59J switch in a 1010 surface box.

The 514 comes standard prepped for wiring, and can be customized in the field. It is available stand alone, with a switch installed, or with a switch and wireless transmitter installed.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

HEAVY DUTY KEYPADS

ENTRYCHECK™ SERIES DIGITAL KEYPADS

The IDC EntryCheckTM series consists of stand alone digital keypads designed to control access of a single entry point for facilities with up to 500 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock. Optional Prox Readers are available for selective models

FEATURES

- Weather Resistant
- Heavy Cast Vandal Resistant Housing
- Heavy Cast Metal Blue Backlit Keys
- Keypad programmable
- 500 Users, 4-6 digit PIN codes
- 4 outputs, 2 relay and 2 solid state outputs timed or latching (on/off)
- Assign entry PIN's to relays 1 and/or 2
- LED Status: Access, lockout
- Tactile keys with loudness selectable audible volume for key depression or output activation
- Timed anti-passback, anti-tailgate
- Keypad tamper lockout
- Request-to-Exit/Enter input
- Choice of door sense/relay inhibit input functions
  - Forced entry
  - Door ajar
  - Inhibit relay 1 or 2
  - Auto relock when door closes
- Choice of 2 solid states outputs functions:
  - Alarm shunt
  - Forced entry
  - Door ajar
  - Tamper lockout
  - Keypad active

PROX Only:

3 User Modes:

- PIN or Card
- Card Only
- Card and PIN

Outputs	Relay 1 - SPDT 5 Amps @ 30VDC Relay 2 - SPDT 2 Amps @ 30VDC Switch to Common Outputs 3 & 4 – 100mA @ 30VDC
Temperature	-20°F to + 130°F (-30°C to + 54°C)
Humidity	5% to 95% non-condensing
Finish	918 Brushed Stainless Steel

PROGRAMMING OPTIONS

The EntryCheckTM series includes a Door Sense/ Inhibit Input feature. When programmed for "Door Sense", a door position switch wired into the input and detects a "forced entry" or "door ajar" condition. When programmed for "Inhibit Input", a maintained switch or automatic timer wired into a the input will disable the activation of the main relay.

The EntryCheckTM also has a request-to-exit input for connection to an exit switch and/or fire access key switch for fire/emergency access.

When access is granted, the shunt option is activated shunting alarm contacts on the door or gate. This prevents triggering of an alarm during authorized access.

E5 ACCESS

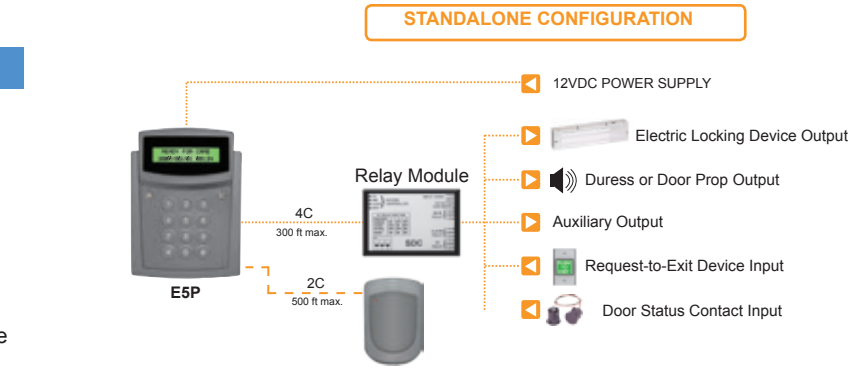

CONTROL SYSTEM

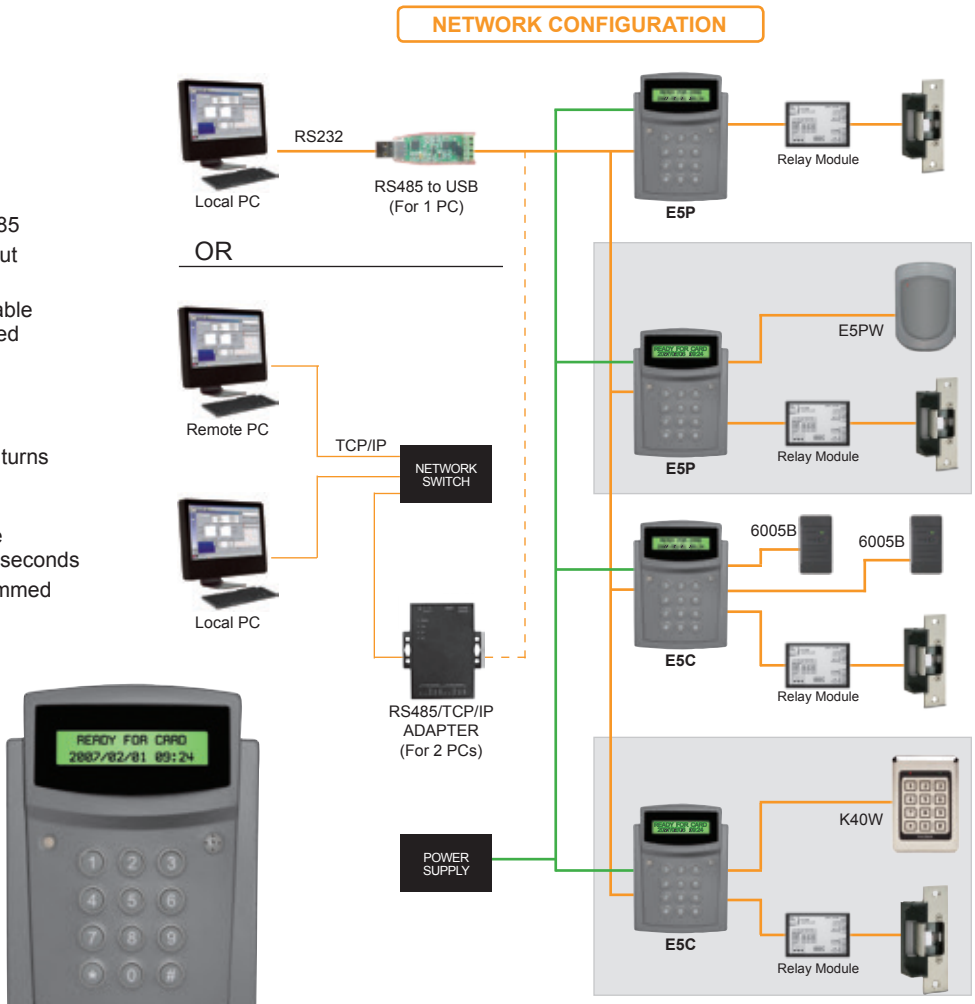

Choice of Prox Card, Fingerprint or Keypad Entry

- ***Standalone or PC Managed***
- ***Network up to 99 Readers***

Features

- HID Compatible Proximity reader
- Up to 4" read range
- 3000 cardholders
- Network configuration up to 99 devices
- Anti-passback
- Access mode
- 6 time zones
- 12 month programmable holiday schedule
- Password Required time zone
- Guard Patrol Function
- Door prop open alarm
- Forced entry alarm
- Access mode selectable
  1. Proximity card only
  2. Proximity card + PIN
  3. Key-in card number only
- Communication interface: RS232 or RS485
- Can be used as stand alone device without personal computer connected
- Use of password is time zone programmable if card data with password access selected
- Two types alarm status available
  1. Force entry
  2. Door prop open alarm
- Power saver function. The LED backlight turns itself off after 3 minutes
- Lock relay activation time, alarm function, anti-duress and door prop open alarm are individually programmable from 1 to 255 seconds
- Communication baud rate can be programmed via keypad
- Memory Buffer – 3500 transactions
  1. Invalid Card.
  2. Restricted time.
  3. Time zone unmatched.
  4. Code unmatched.

UL LISTED ELECTROMAGNETIC LOCKS

MAGLOCKS

ULTIMATE PROTECTION

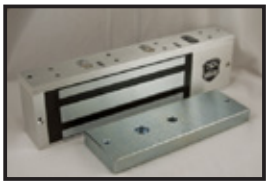

FEATURES

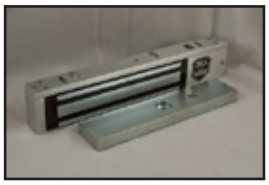

- Lock status sensor (bond sensor) and visual LED on 600 and 1200 lb models
- Includes adjustable relock time delay (0 – 90 secs)
- Field selectable 12/24V DC
- Installation hardware included for typical applications
- Convenient plug-in wire terminals
- Available for single doors and double doors without center mullion

IDC Maglocks offer the ultimate protection for most access control applications.

WR MAGLOCKS

UL LISTED WEATHER RESISTANT

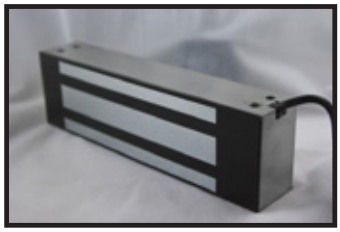

FEATURES

- Built-in remote lock status sensor – ideal for remote monitoring
- Available in a front mount model with a ¾ inch male universal threaded conduit fitting and a side mount model for swinging doors and gates.
- No residual magnetism
- Field selectable 12 or 24 VDC
- Built-in surge protection
- UL and ULC Listed for use on fire rated doors for up to 1½ hours

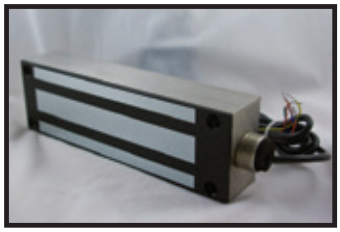

Designed with a rugged stainless steel housing, these electromagnetic locks are the ideal solution for sliding and swinging gates and high security doors.

1583 CABINET EMLOCK®

MAGNETIC LOCK

Micro Cabinet EMLock®
Security Made Easy

IDC's 1583 Micro Cabinet EMLock® is a compact specialized electromagnetic lock that produces 300lbs. of holding force. Versatile mounting capability with face drilled and surface mounting holes. The 1583 operating voltage is field selectable for either 12/24 VDC. Aluminum housing is standard.

Applications

- Cabinets
- Drawers
- Display cases
- Machine equipment housings
- Gun safes
- Package pass through doors
- Dark rooms

Failsafe Operation
Security and safety with no moving parts. Positive and instantaneous failsafe un-locking operation is guaranteed.

Easy Installation
Compact size allows easy installation in small cabinets or restricted spaces. No special tools are required.

Durable, No Maintenance
With nothing to wear out and no moving parts, the 1583 EMLock® is virtually maintenance free.

Solid State Protection
The EMLock® provides spike and surge protection for solid-state devices on the same line.

Features

- 300lbs. of holding force
- An electronics module provides spike and surge protection for the EMLock®
- Dual voltage and modular design
- Strong enough even for large cabinet doors
- Protection of the EMLock® and other devices on same line without additional parts
- Operates on 12 or 24VDC

Specifications

1583V	EMLock® 300lbs. holding force, 12/24VDC
Dimensions	
EMLock®:	6.5"L x 1.125"W x 1.5"H (159 x 29 x 38mm)
Armature:	5.125"L x 1.125"W x 0.25"H (130 x 29 x 6mm)

Electrical Specifications

Connection:	Wire leads with in-line spike and surge protection
Input Voltage:	12 or 24 VDC +/- 10%
Current:	500mA @ 12VDC 250mA @ 24 VDC

Battery back up capability when used with a power supply and battery,

Note: Not recommended for life safety on pedestrian doors.

HI/SHEAR®

ELECTROMAGNETIC LOCK

Hi/Shear® Magnetic Door Locks

IDC Hi/Shear® magnetic lock utilizes several of the most innovative and unique design attributes. The Hi/Shear is the magnetic lock that gives those who want a better shear lock all the latest features.

The IDC Hi/Shear® is a totally concealed, high security, failsafe locking mechanism with superior appearance. The patented Hi/Shear® electromagnetic lock design incorporates a “floating” armature assembly and special alloy steel locking “tabs” on both the lock and armature assemblies, that may be adjusted both vertically and laterally to compensate for wide door gaps and warped or misaligned doors.

Hi/Shear® magnetic locks are ideal for use on commercial grade hollow metal and wood doors and frames and Herculite doors with top rails.

Concealed

Semi-Concealed

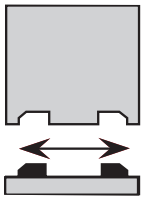

Surface Mount

Hi/Shear® Magnetic Lock Features

Door Static and Alignment Sensor
The door static sensor ensures that the door is at rest and aligned, before the magnet is permitted to energize, eliminating potential for lock misalignment.

Lateral Alignment Adjustment
Lateral adjustment of shear tabs to compensate for warped or misaligned doors, permitting accurate locking.

Adjustable Tabs

Vertical Alignment Adjustment
Vertical adjustment of both the armature and the adjustable delay relock sensor compensates for wide door gaps.

Floating” Assembly
A unique “floating” action makes for easier armature lift when the magnet is energized and provides the ability to overcome wide door gaps.

2000 or 2700 Lbs Holding Force
2000 or 2700lbs. of holding force without current inrush or high operating temperature normally associated with shear locks.

Alloy Steel Shear “Tabs” on Lock and Armature
Alloy shear tabs are used on both the lock and the armature to ensure continued high holding force. There is no profiling of the soft armature steel that may be prone to wear and reduced holding force.

Advanced Electronic Circuitry
Advanced electronic circuitry that incorporates door static, positioning and timed relock sensor and automatic voltage sensing for 12/24VDC input.

Quieter Operation
Noise dampeners greatly reduce the noise associated with locking and unlocking of other shear locks on the market.

Surface Mount Hi/Shear®

Surface mount configurations incorporate the innovative 2000 lb holding force Hi/Shear® electromagnetic lock in a compact housing smaller than many mini surface mount direct pull magnetic locks. The surface mount design also provides the advantage of mounting the Hi/Shear® on the secure side of the door opening, eliminating potential for tampering.

1561S Surface mounted to the push side of an out-swing door. For metal door and frame, glass door with top rail and metal frame, or wood door and frame

1561TJ Surface mounted to the pull side of an in-swing door. For metal door and frame, glass door with top rail and metal frame, or wood door and frame. This mounting configuration eliminates the need for cumbersome and unsightly top jamb Z brackets normally associated with pull side mounted of magnetic locks

1561S Surface Mount

Semi-Concealed Hi/Shear®

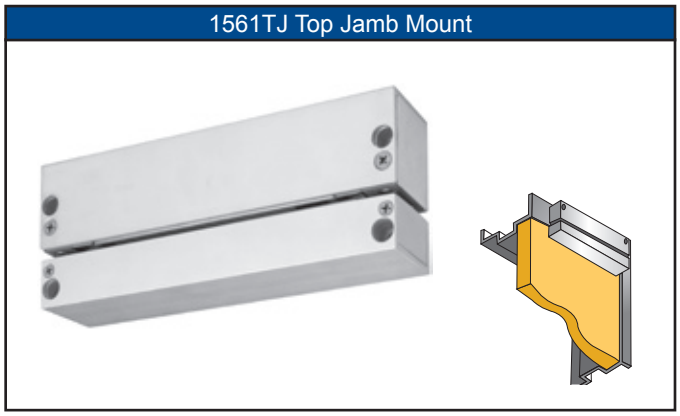

The semi-concealed configuration incorporates the innovative 2000 lb Hi/Shear® concealed electromagnetic lock with a surface mounted armature assembly. The semi-concealed design also provides the advantage of mounting the Hi/Shear® on the secure side of the door opening, eliminating potential for tampering.

1562SC Semi-concealed mounted to the push side of an out-swing door. The mortise magnet is concealed in the frame and the armature is surface mounted on the door. For metal door and frame, glass door with top rail and metal frame, or wood door and metal frame.

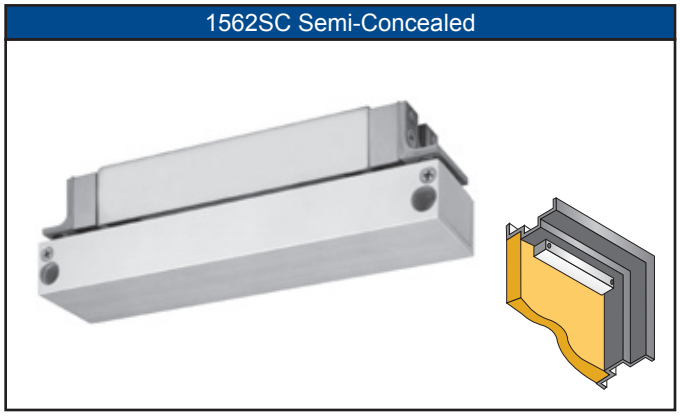

1562SCHDB 1/2 Semi-concealed mounted to the push side of an out-swing glass door. The mortise magnet is concealed in the frame and the armature is surface mounted on the ½" glass door where no top rail is present utilizing the Herculite door bracket.

1562SCHDB 3/4 Semi-concealed mounted to the push side of an out-swing glass door. The mortise magnet is concealed in the frame and the armature is surface mounted on the ¾" glass door where no top rail is present utilizing the Herculite door bracket.

VERBAL EXIT INSTRUCTIONS OR ALARM TONE ONLY AND DIGITAL COUNTDOWN DISPLAY

101-DE EXIT CHECK®

DELAYED EGRESS CONTROLLER

Verbal Exit Instructions or Alarm Tone Only and Digital Countdown Display

- ***Stop Employee Theft***
- ***Stop Retail Shoplifting***
- ***Restrict Airport Patrons***
- ***Restrict Wandering Patients***

The integral verbal message, digital countdown display and sign provide comprehensive and clear instructions of the door operation for persons without prior knowledge of the exit delay, including the sight and hearing impaired.

The digital keypad eliminates the need to carry and locate keys for reset and bypass functions.

Application

When unauthorized egress is initiated IDC Exit Check® delays egress through the door for 15 or 30 seconds. Meanwhile, the person exiting must wait, while personnel or security responds. The door unlocks after 15 or 30 seconds have elapsed permitting egress. When powered by a fire control supervised power supply, the lock will release immediately in an emergency.

Exit Check® applications include:

- Theft protection for technology, merchandise and other valuables, such as museum artifacts.
- Restriction of airport patrons and public facility visitors for security and public safety.
- Restricting the egress of patients for their own safety.

Benefits

Designed for low to medium security applications, Exit Check® benefits include:

- Use of smaller or less obtrusive EmLocks® with a choice of 650 lbs.,1200 lbs. or 1650 lbs. holding force.
- Direct eye contact with egress status annunciation and easy to reach controls for alarm reset, sustained bypass and momentary bypass functions.

CSFM

Egress Delay
- 15 or 30 second exit delay
- 1 or 2 second nuisance delay

Built-In 3 Function Keypad
- Alarm and lock reset
- 1 to 30 second bypass
- Sustained bypass
- Additional keyswitch optional

Control Inputs
- 1 to 30 second request-to-exit and access bypass with anti-tailgate
- Alarm reset

Built-in Annunciation
- Armed mode
- Nuisance mode
- Irreversible egress mode
- Release mode
- Digital countdown display
- Field selectable voice notification or tone
- Field selectable male voice with security message or female voice with safety message

Monitoring Outputs
- Armed status
- Egress initiation status
- Released status

Optional EMLock Outputs
- Door position sensor - indicates door open and door closed, commonly used to verify egress after release
- Magnetic bond sensor - indicates locked with full holing force, low holding force, unlocked and tampering

Choice of Mounting
- Recessed mounted (3 gang plaster ring included)
- Surface mounted with optional 3 gang box (DEC-J)

Trigger Modes
- Egress alarm triggered by door movement when used with IDC 1500DE series EmLocks.
- Trigger input from external device field selectable (N/O or N/C)

Power-Up Modes
- Field selectable automatic or manual power up after emergency release or power loss. Use of manual power up complies with California Building Code (OSHPD) requirements

Display Modes

15	
00	Alarm countdown period has ended, door is unlocked and alarm sounding until reset.
: :	Door has been opened after REX, Bypass or Alarm.
- -	Door unlocked and alarm is shunted (REX or Bypass)

Code Compliance

EXIT CHECK® DELAYED EGRESS LOCKS

DELAYED EGRESS LOCK

Exit Check® Delayed Egress Lock
Proprietary Features:

- ***Voice and digital display provides informative annunciation for people without prior knowledge, including the blind and hearing impaired***
- ***Field selectable voice & tone or tone only***
- ***Voice provides warning or safety message, countdown and time of door release***
- ***Digital countdown display also indicates if door was open after lock release.***
- ***Fixed 15 second delay or selectable 15 or 30 second exit delay***

Application

Airport & Public Facility Security & Safety
Control pedestrian traffic in government, public facilities and transportation facilities, including airport jetways and tarmacs.

Loss Prevention
Provide theft protection of merchandise, technology and other valuables such as, art and museum artifacts.

Wandering Patient and Infant Protection
Restrict the egress of psychiatric and drug rehab patients, elderly patients in assisted living facilities and restrict the movement of nursery infants for their own safety and security.

Operation
Typically used on exit doors, when unauthorized egress is initiated when in the locked mode, the IDC Exit Check® delays egress through the door for 15 or 30 seconds. Meanwhile, the person exiting must wait while personnel or security respond. The door unlocks after 15 seconds have elapsed, permitting egress. A signal from the fire life safety system will release the lock for uninhibited egress in an emergency. 30 second delay available where approved.

Facility Applications

- **Airports**
- **Convention Halls**
- **Wholesale Stores**
- **Retail Stores**
- **Long Term Care**
- **Drug Rehab**
- **Psychiatric Care**
- **Infant Nurseries**
- **Museums**
- **Art Galleries**
- **Warehouses**
- **Technology Facility**

Code Compliance

Exit Check® models comply with todays building and fire life safety codes.
See page 4

IBC, International Building Code
1008.1.8.6 Delayed Egress Locks

IFC, International Fire Code
1008.1.8.6 Delayed Egress Locks

NFPA 101, Life Safety Code

BOCA, National Building Code
1017.4.1.2 Special Locking Arrangements

Chicago Building Code
10 (13-160-269) Electro-Magnetic Locking Devices. Certificate of approval available

Patient & Infant Tracking Systems

The IDC Exit Check® is compatible with patient tracking systems, like those used for protection against infant abduction from hospital nurseries, and for the protection of patients in long term care facilities who may be endangered if they leave their care facility without supervision.

Access Control

Access controls may be utilized for authorized egress, access and lock reset. Access from the exterior of latching doors requires an additional means of mechanical lock release, such as a mechanical key or electric strike.

Local Approval

All installations must be approved by the Authority Having Jurisdiction (AHJ).

Single Model

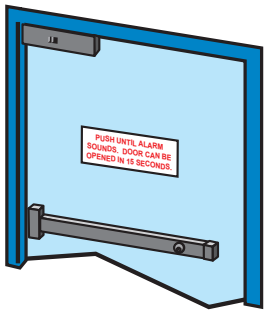

For use with single doors equipped with:

- Mortise or rim mount exit devices
- Surface or concealed vertical rod exit devices with surface or concealed strikes and triggers
- Mortise or cylindrical locksets

1511S

Tandem Model

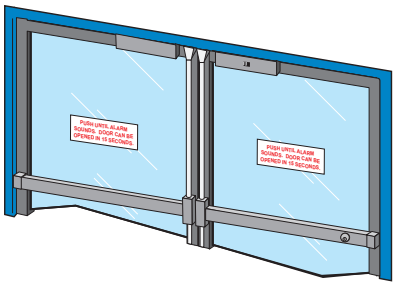

Activating either door unlocks both doors.
For use with pairs of doors equipped with:

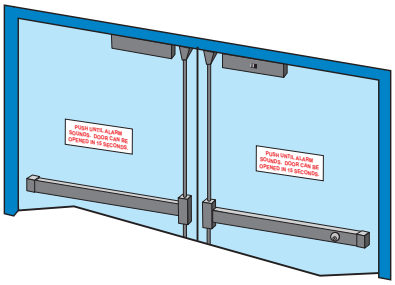

- Mortise or rim mount exit devices
- Surface or concealed vertical rod exit devices with surface or concealed strikes and triggers
- Mortise or cylindrical locksets

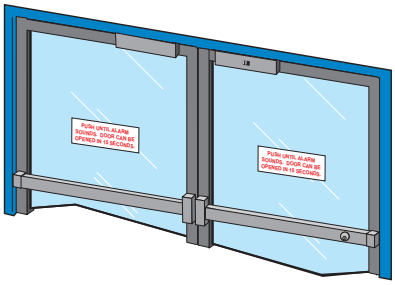

1511T

Code Compliant Door Sign

PUSH UNTIL ALARM SOUNDS. DOOR CAN BE OPENED IN 15 SECONDS.

Verbal and Digital Annunciation

The Exit Check® series incorporates an alternating verbal message, verbal count-down and alarm tone, plus a large digital countdown display and door release indicator that provides a clear warning for the safety of persons without prior knowledge of door operation, including the blind and hearing impaired.

Features

- Field selectable voice message and alarm tone, or alarm tone only, 75 db @ 3 ft
- The visual display provides a digital countdown, indicates lock release and verifies if the door was opened for egress.
- Choice of fixed 15 second exit and 1 second nuisance delay or field selectable 15 or 30 second exit delay and 1 or 2 second nuisance delay
- Field selectable security or safety message
- Field selectable activation:
  Door movement
  Exit device with switch kit
  Exit sense bar for non-latching doors
- Field selectable automatic or manual power up after emergency release or power loss.
- Integrated 3 position key switch provides:
  Lock and alarm reset
  Manual power-up*
  Sustained bypass
  Timed bypass, adj. for 1, 15, 20 or 30 seconds
- Field selectable door prop alarm:
  Alarm sounds when door is left open after selected bypass time has elapsed.
- Anti-tailgate feature
- Single or multi-door zone control and reset capability

Control Inputs

- Remote access control and REX input, field adjustable for 1,15, 20 or 30 seconds
- Remote reset input
- Manual power-up input*
- Emergency release input
- Anti-tailgate input

Monitoring Outputs

- Door secure and unlocked output
- Delayed egress activation alarm output

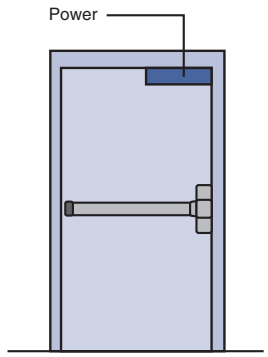

Options

- Custom message, language or shortened exit delay times
- Energy Saver, 1200lb holding force 400/275mA @ 12/24VDC
- Magnetic Bond Sensor output
- Door Status Sensor output
- Anti-tamper sensor output

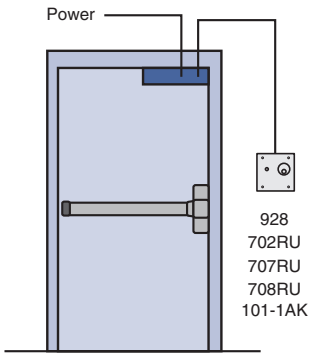

* Not available with (BD) Chicago and BOCA code compliant models

Station Controls and Annunciators

While the Exit Check® is equipped with a standard built-in key switch for reset and bypass functions, wall mounted stations provide for convenient alarm reset, sustained bypass or timed bypass.

Remote annunciators provide quick identification of activated openings, enabling security or care personnel to respond rapidly. Annunciators are equipped with an audible alarm and each station is identified by one tri-color LED that identifies specific mode status.

Secure -Green
Activation - Amber x Audible Tone
Unlocked - Red x Audible Tone

Self Adjusting Door Movement Sensor

The built-in door movement sensor may only be used with doors equipped with a latch assembly, such as a mechanical lockset or exit device.

The mechanical latch mechanism must be locked on the exterior and unlocked on the interior. From the inside, retracting the door latch and applying pressure causes limited door movement. The built-in activation trigger senses the door movement and initiates delayed egress operation. The self adjusting sensor helps prevent false triggering.

External Device Trigger Imput

Activation For Non-Latching Doors
The external activation trigger input must be used with doors without latch assemblies, such as latchless glass and herculite doors.

Activation may be triggered by the IDC MSB550 Switch Bar or the IDC Sure Exit®, request-to-exit push bar. A power transfer device is required. Pushing on the request-to exit push bar immediately activates the delayed egress operation.

Activation For Latching Doors
Where preferred, activation may be accomplished by a latch monitoring strike, or a switch installed in a standard latching exit device or lockset. A power transfer device is required for exit devices equipped with a trigger switch.

See IDC datasheets for detailed information on IDC MS Series Latch Monitoring Strikes, Exit Device Switch Kits and Power Transfer Devices.

Automatic or Manual Power-up

Field selectable method of lock power-up, automatic or manual, after power loss or emergency release.

Auto Power-Up
When selected, regardless of the means of deactivation, relocking of the Exit Check® occurs when power is restored and/or the fire life safety panel is reset.

Manual Power-Up
UBC, California Building Code (OSHPD) Compliant Reset
When selected, regardless of the means of deactivation, relocking of the Exit Check® is by manual means only at the door. Only after power restoration and/or fire life safety panel reset, the door may be relocked by actuating the standard built-in key reset or optional wall mounted key switch, push switch or digital keypad located adjacent to the door.

Keyless Control (optional)

928 Entry Check Digital Keypad
While the Exit Check® is equipped with a standard built-in 4 function key switch for reset, manual power up, momentary bypass and sustained bypass functions, the IDC 928 wall mounted keypad provides the convenience of keyless operation for:

- Alarm Reset
- Manual Power-Up (UBC & California required)
- Momentary or Sustained Bypass

1511T NA K V Tandem, Adj 15/30, Aluminum

Operation

NA Operation

1) When the door is closed, latched, and the lock is energized, field selectable “15” or “30” is displayed, indicating the door is secure.

2) Applying pressure and retracting the door latch activates a warning tone and digital display countdown. If the door is released in 1 or 2 seconds, the warning tone stops and the door stays locked.

Non Latching Glass Doors: Activation by PSB560 Exit Sense Bar (see page 6)

3) When activation exceeds the nuisance time (1 or 2 seconds) an irreversible process begins that will unlock the door in 13 or 14 seconds. The voice message, tone and countdown annunciation continue.

MALE VOICE WITH SECURITY MESSAGE
Tone.... “Exit in twelve seconds, Security has been alerted”
Tone.... “Exit in five seconds”
Tone.... “Exit now”, Tone....”Exit now”

FEMALE VOICE WITH SAFETY MESSAGE
Tone.... “Exit in twelve seconds, Facility Staff has been alerted”
Tone.... “Exit in five seconds”
Tone.... “Exit now”, Tone....”Exit now”

TONE ONLY (In Lieu of Message)
Activation: Short beeps
Lock Release: Long beeps

4) The door unlocks when delay time has elapsed and the digital display indicates “00” and annunciation continues.

5) The lock is manually reset by built-in key (K) or optional wall mount keypad or kewswitch

6) The door will unlock upon signal from the fire life safety system or power loss.
Auto Power-Up: Lock will re-arm automatically when power is restored and fire alarm system is rest.
Manual Power Up: Lock is re-armed by manual means only at the door by key reset (K) or optional wall mounted reset keypad or keyswitch

Infant and Pediatric Protection & Wandering Patient System Application

The Exit Check is unlocked when in maintained bypass or momentary bypass (access/REX) mode. When a tagged patient walks near or infant carried towards the door protection system sends a signal to the Exit Check®, locking the door immediately. Should a person then initiate unauthorized egress, the Exit Check® will provide voice and tone annunciation and delay egress for 15 or 30 seconds.

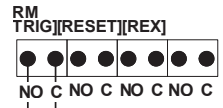

Keypad In Lieu of Built-In Keyswitch

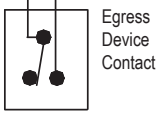

Eliminates Problem of Lost Keys, Easy To Reach for Reset, Bypass And Authorized Exit. See 928 keypad page 6. Contact IDC for Wiring instructions

SMALL, SLIM DESIGN /650LB HOLDING FORCE

1581S DELAYED EGRESS

MINI EXIT CHECK

- ***Small, Slim Design***
- ***650lb Holding Force***

PUSH UNTIL ALARM SOUNDS. DOOR CAN BE OPENED IN 15 SECONDS.

Application

When unauthorized egress is initiated, the Mini Exit Check® delays egress through the door for 15 seconds. Meanwhile, the person exiting must wait while personnel or security respond. The door unlocks after 15 seconds have elapsed, permitting egress. A signal from the fire/life safety system will release the lock for uninhibited egress in an emergency.

Exit Check® applications include:

- Restricting the egress of patients for their own safety.
- Restricting the egress of commercial center patrons for minimum security application needs.

Wondering Patient Systems

The IDC Exit Check® is compatible with wandering patient systems, like those used for protection against infant abduction from hospital nurseries, and in long term care facilities for the elderly.

Access Control

Access controls may be utilized for authorized egress or access. Access from the exterior of latching doors requires an additional means of mechanical lock release, such as a mechanical key or electric strike.

Local Approval

All installations must be approved by the Authority Having Jurisdiction (AHJ).

c UL us LISTED

Fire Marshall Listed

Size Matters

The Mini Exit Check® is designed to meet the needs of long term care and commercial facilities that require a smaller, less obtrusive, and less expensive delayed egress lock that is better suited for minimum security needs.

In addition, the subdued alarm tone is less disruptive to patients and staff. IDC has also maintained all the features and status outputs found in most higher holding force delayed egress locks on the market.

1581SND

- UBC, NFPA 101, NFPA 1, UFC, IBC, IFC and California Building Code Compliant
- 15 second exit delay, 2 second nuisance delay
- Station control required for lock reset following unauthorized egress
- Field selectable automatic or manual power-up after power outage and fire emergency release. Manual power-up is a UBC and California State requirement.

1581SBD

- BOCA & Chicago Building Code Compliant
- 15 second exit delay, 1 second nuisance delay
- Automatically resets and locks 30 seconds after door closure
- Manual reset station not required

Standard Features

- 650 lbs Holding Force
- Subdued alarm with 2 distinct tones
  Alarm activation - intermittent
  Door release - continuous
- Choice of activation trigger
  Door movement
  Latching exit device with switch kit
  Non-latching REX bar
- Self-aligning and vandal resistant proximity sensor trigger
- 5 foot cable

Imputs and Outputs

- Sustained bypass input
- Access control / REX input, timed
- Door secure / unlocked output
- Alarm activation output
- Door Position Status (optional)
- Magnetic Bond Sensor (optional)

1581SND Field Selectable Automatic or Manual Power-Up Modes

After a power outage or fire alarm release

- When selected, automatic power-up occurs when facility power is restored and/or the fire panel is reset.

- Manual Power-up is an **California Building Code Compliant.** When selected, only after power restoration and fire panel reset, may the lock be manually energized by the reset switch adjacent to the opening

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

More Standard Features

Slave Lock Output
The slave lock output enables the use of two units for pairs of doors and ensures that pushing on one door leaf will cause both doors to release.

Activation Triggers
The Exit Check® is equipped with a built-in activation trigger and a remote trigger device input.

Built-In Activation Trigger
The built-in activation trigger may only be used with doors equipped with a latch assembly (i.e. exit device or mechanical lockset).

The mechanical latch mechanism must be locked on the exterior and unlocked on the interior. From the inside, retracting the door latch and applying pressure causes limited door movement. The built-in activation trigger senses the door movement and initiates delayed egress operation.

Remote Activation Trigger Input Activation Trigger For Non-Latching Doors
The remote trigger activation input must be used with doors without latch assemblies (i.e. latchless glass and herculite doors).

Activation may be triggered by the IDC MSB550 Switch Bar or the SDC PSB560 Sure Exit®, request-to-exit push bar. A power transfer device is required.

Pushing on the request-to-exit push bar immediately activates the delayed egress operation.

Activation Trigger For Latching Doors
Where preferred, activation may be accomplished by a latch monitoring strike, or a switch installed in a standard latching exit device or lockset. A power transfer device is required for exit devices equipped with a trigger switch.

Specifications
- Auto sensing 12/24VDC input.
- Current: 320 mA @ 24VDC
  500 mA @ 12VDC
- Size: 10"L x 2"H x 2-3/8"D

Functions

ND **UBC, California Building Code, OSHPD, NFPA 101, IBC & IFC Compliant**
15 second fixed exit delay, 2 second nuisance delay. Field selectable manual power up after emergency release for California and OSHPD compliance

NH **IBC, IFC, NFPA 101 Compliant**
30 second fixed exit delay, 2 second nuisance delay

BD **BOCA National Building Code Compliant**
15 second fixed exit delay, 1 second nuisance delay, auto reset 30 seconds after door closure

BH **BOCA National Building Code Compliant**
30 second fixed exit delay, 1 second nuisance delay, auto reset 30 second after door closure

ANNUNCIATORS

Annunciators

Compatible with all Exit Check® systems, the 101 series annunciators provide door status at a remote location such as a nurse's station, guard station or office. The tri-color LED provides precise delay mode status.

101-1A Single Door Annunciator
- Audible alarm
- Tri-color LED status indicator

101-4AM Four Door Annunciator
- Audible alarm
- Alarm mute switch
- Four tri-color LED status indicators

101-1AK Single Door Annunciator with Key Control
- Dual function key switch for bypass (on/off) and reset. Key cylinder not included
- Audible alarm
- Tri-color LED status indicator
- Must be located adjacent to the door

101-PAM Single Door Annunciator with Push Switch Control
- Three push switches: momentary access, bypass (on/off) and audible mute
- Audible alarm
- Tri-color LED status indicator

Specifications

Faceplate: 20 gauge stainless steel

LED: Tri-color, 20 mA @ 12/24VDC
Green - Secure
Amber - Alarm/door locked
Red - Alarm/door unlocked

Local Reset and Bypass

Used in lieu of the standard built-in reset and bypass, the wall mount controls provide a more accessible method of reset and bypass using the existing facility key system. All reset controls must be located adjacent to the door. (Key cylinder not included)

708RU On/Off Bypass and Reset Key Switch
- Left - SPDT, maintained contact for bypass (on/off)
- Right - SPDT, momentary contact for lock/alarm reset

707RU Momentary Bypass and Reset Key Switch
- Left - SPDT, momentary contact for bypass (on/off)
- Right - SPDT, momentary for lock / alarm reset

702RU Lock/Alarm Reset Key Switch
- SPDT, momentary contact for lock/ alarm reset

Specifications

Key Switch: 6 Amp @ 30VDC Max

15 SERIES

ELECTRIC STRIKES

Features

The IDC 15 Series electric strike is designed for use with cylindrical and mortise locksets. The 15 series electric strikes incorporates all stainless steel deadlocking mechanism and an internally mounted solenoid.

- For use with 5/8" latchbolt, or up to 3/4" latchbolt with 1/8" door gap
- Choice of failsafe or failsecure
- Non-handed
- All stainless steel parts with durable die case body for corrosion resistance'
- 630 Satin stainless steel face plate
- ANSI A156.31 compliant

Screw terminal connections

Model

15-4S24U Failsecure, 24VDC
15-4F24U Failsafe, 24VDC

25 SERIES

ELECTRIC STRIKES

25 Series Electric Door Strike

- ***Low Profile - 1.25" Backset***
- ***Reversible Failsafe - Failsecure***
- ***Latch Status Output Standard***

The IDC 25 Series electric strike is designed for use with cylindrical and mortise locksets with up to 5/8” (15mm) throw latchbolt. The compact low profile design with an internally mounted solenoid and factory supplied mounting tabs enable quick and easy installation where jamb space is limited. The heavy duty construction makes the 25 Series ideal for high traffic installations.

Features

- Fail-Secure
- Field reversible for failsafe operation
- For 1/2” latch or 5/8” latch with 1/8” door gap
- Latch status output, 3Amp - SPDT
- Non-handed, reversible
- All stainless steel parts with durable die cast body for corrosion resistance
- 630 Stainless steel standard finish
- ANSI A156.31 compliant

Options

RMB Buzzer 12/24V AC/DC operation
BR64XL Rectifier for AC operation

Model

25-4U: 4-7/8" (124mm) faceplate for aluminum, wood and hollow metal frames.

30-4 SERIES

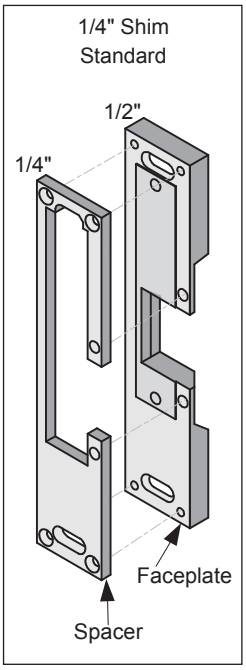

ELECTRIC STRIKE

Features

The IDC 30-4 Series electric strike is designed for use with rim mount exit devices having pullman type latchbolts or the top pullman latch of a surface vertical-rod exit device.

- All stainless steel for corrosion resistance and strength
- Tamper resistant, heavy-duty construction
- Set screws for adjustment lockdown
- Milled ramps to better accommodate deadlatches
- Integrated shim for quick customization of faceplate thickness (3/4" to 1/2")
- In-frame horizontal adjustability
- Pullman keeper
- Non-handed, reversible
- Failsecure (standard) Failsafe (optional)
- ¾" keeper depth
- Static strength 1,500 lbs.
- Dynamic strength 70 ft-lbs.

Model

30-4 Electric Strike with 0.75" (19mm) faceplate. Except .5" (12.7mm) without 1/4" spacer.

Specifications

12 0.51 Amp @ 12VDC, 24 OHMS
24 0.25 Amp @ 24VDC, 96 OHMS

Finish

RETROFITS EXISTING ANSI 4-7/8" STRIKE PREP – NO CENTERLINE RELOCATION

UNIFLEX™ 55 SERIES

UNIVERSAL APPLICATION STRIKE

55-A For cylindrical locksets and locksets with ANSI centerline latch entry with up to ¾" latchbolt

55-B & 55-C for mortise locksets with up to 3/4" latch

55-D & 55-E For mortise locksets with deadbolt, with or without a deadlatch below the latchbolt

55-F for mortise locksets with deadbolt and deadlatch located above the latchbolt

For New or Retrofit Construction
Retrofits Existing ANSI 4-7/8" Strike Prep – No Centerline Relocation

UniFLEX™ 55 Series heavy duty electric strikes are designed for installation in hollow metal frames for access control of cylindrical and mortise locksets and mortise exit devices. The choice of 6 application faceplates eliminates the need for centerline relocation, making them ideal for new or retrofit, high security access control applications.

Features

- No Centerline Relocation
- UL 1034 Barglary Resistant
- Up to ¾" Latchbolt and 1" Deadbolt
- Field Reversible, Failsafe/Failsecure
- 1/8" Horizontal alignment adjustment
- ANSI/BHMA A156.31 Grade 1
- Factory tested 2500 lbs, exceeds 1,000,000 cycles
- UL teste 1500 lb Static strength
- 70 ft-lb Dynamic strength
- Internally Mounted Solenoid, No Heat in Keeper
- Dual Voltage 12/24VDC
- Tamper Resistant
- All Stainless Steel Corrosion Resistant Parts and Heavy Cast Body and Keeper
- Non-handed (Deadbolt status handed)
- Plug-in pig tail connectors

5 YEAR LIMITED WARRANTY

Reversible Failsafe/Failsecure

Fail-Secure (Power-to-Unlock): Unlocked when energized.
Locked when de-energized and during power failure.

Application: For non fire rated and fire rated doors (exception, may not be used on stairwell doors). May not be maintained in the unlocked (energized) state when used with fire rated doors.

Fail-Safe (Power-to-Lock): Locked when energized. Unlocked when de-energized and during power failure.

Application: Non-fire rated doors only.

CAUTION: Fail-safe is not permitted with the UL Fire Door Accessory label.

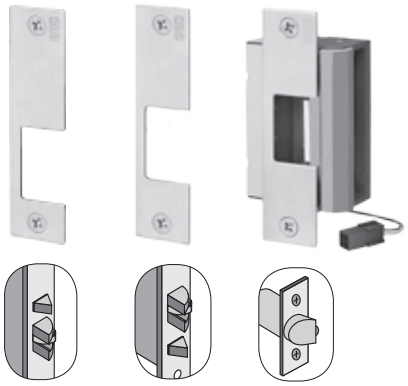

Warnock Hersey Tested according to:
UL 10C, 3 Hr Fire Rated, 4' x 8' single door
NFPA-252
CAN4-S104 (ULC-S104) (Fail-Secure only).

Monitoring

All strikes less monitoring are non-handed

A, B, C with monitoring are non-handed

D, E, F with monitoring are handed
L - Left hand R - Right hand
Example: 55-DU x LBM/LCM-L

LBM Latchbolt Monitor
Signals the door is closed and latched or unlatched and open.

Applications
- Door prop open monitoring
- Airlock and Interlock logic
- Access control door ajar input
- Access control anti-tailgate input

LBM/LCM Door Secure Monitor
Signals door is closed latched and the keeper is deadlocked. Also signals the door is unlatched or unlocked.

Applications
- Door secure and unlocked monitoring
- Mantraps

LBM/LCM/DBM Deadbolt and Door Secure
D, E & F functions only.

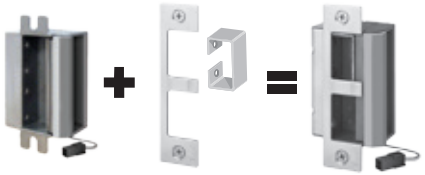

DBM signals deadbolt projected or retracted.

LBM/LCM signals the door is latched and the keeper is deadlocked, whether the deadbolt is extended or retracted. Also signals the door is unlatched and unlocked when deadbolt is retracted.

Applications
- Deadbolt night latch monitoring
- Access control lockout monitoring
- Door secure and unlocked monitoring
- Mantraps

UniFLEX™ Pro Stocking System

Universal Application Open Stock
For Stocking Installers & Distributors

Enables order fulfillment for multiple applications while reducing stocking requirements and limitations of application specific electric strikes.

How Universal Application Open Stock Works

1. Stock UniFLEX™ 55 series strike bodies and different application faceplates separately.

2. For order fulfillment, package application faceplate with model 55 strike per order specification.

UniFLEX™ Pro Strike Body

Indicate quantity and monitoring required.

55 Electric strike body, 12/24VDC

Monitoring Options
See ordering info on left

SURFACE MOUNTED ELECTRIC STRIKE

IDC-10STRIKE RE

RIM EXIT STRIKE

c UL us LISTED

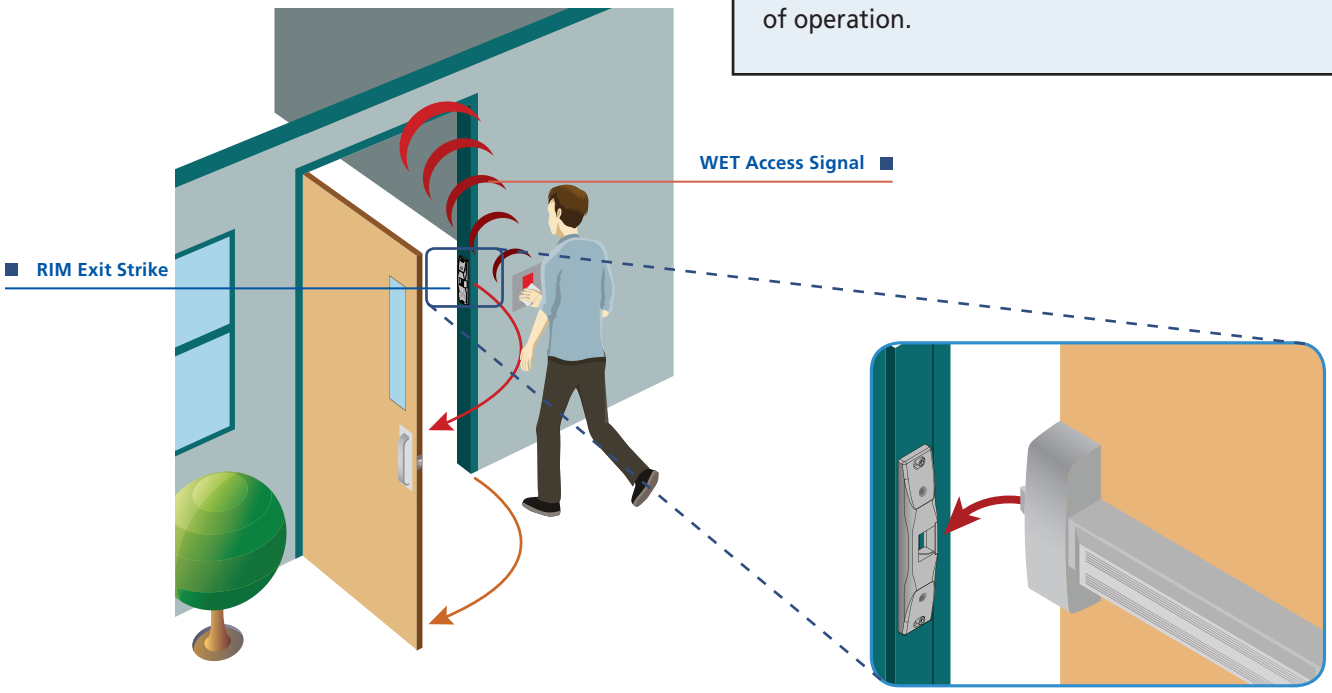

FEATURES

- **IDC-10STRIKE RE**
- UL/ULC listed for up to 1500 lbs of static strength
- Conventional keeper design promotes even-load distribution in the event of a forced entry
- Reinforced housing reduces twisting on imperfect frames
- Brushed, US32D, stainless steel provides a complementary finish to existing door hardware.

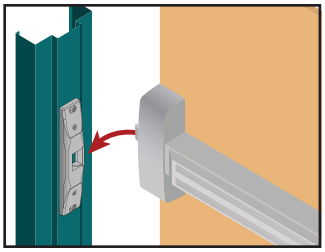

FRAME MOUNTED LOCKING DEVICE

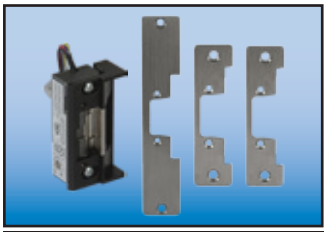

The **Rim exit strike** is designed specifically for rim exit devices. This strike is completely surface mounted, which eliminates the need to cut into the door frame. The Rim Exit strike has a 3-hour fire rating and has been independently tested for over 4 million cycles of operation.

STRIKES & RESCUE STOPS

DUST PROOF STRIKE

1870 FOR DOORS WITHOUT THRESHOLDS

1872 FOR DOORS WITH THRESHOLDS

- For use with any ABH flush bolts
- Prevents dirt, dust and debris from floor clogging strikes

1870

1872

COMBO DOUBLE LIPPED STRIKE AND RESCUE STOP

- For 5-3/4" and 6-3/4" frame with 1-3/4" door
- To be used with ABH 0127 or 0128 center hung pivot sets. Ideal for hospital or nursing home bathroom doors. Stop can be rotated into frame to allow center hung or 1/8" inset double acting doors to swing out in case of emergency.
- Available in US32D, US32, US3, US4, US10B.
- .093 thick material
- Meets ANSI A1882
- Custom sizes available
- Holdback option available (CR4550,60,70,80 only) - (handed)

CR4550/60

CR4570/80

FOR CENTER HUNG DOORS

- CR4550/CR4591 5-3/4" x 2-3/4"
- CR4560/CR4592 6-3/4" x 2-3/4"

FOR 1/8" INSET DOOR

- CR4570/CR4594 5-3/4" x 2-3/4"
- CR4580/CR4593 6-3/4" x 2-3/4"

CR4591/92

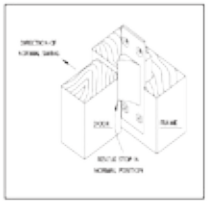

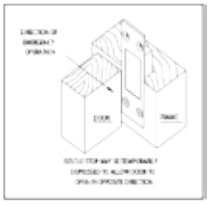

CR4594/93

4590 RESCUE STOP

FOR CONVERTING A DOUBLE ACTING CENTER HUNG DOOR TO SINGLE ACTING

- Allows door to swing open in opposite direction if a hospital or nursing home patient falls and obstructs the normal swing of the door
- Meets ANSI Spec A1882
- Stainless steel, US32D standard
- Pushing in on the spring loaded stop allows emergency operation of the door. Stop automatically returns to normal position when released

SURFACE MOUNT BOLT LOCKS

Universal Mounting Capability Provides Controlled Access of Doors, Closets and Cabinets.

The IDC universal surface mount electric bolt locks are available in failsafe and failsecure. The addition of a card reader, digital keypad or remote control provides access control and convenience of use for a variety of applications.

Applications

The IDC 180 and 280 series locks provide the ability to electronically secure several door configurations.

- Swinging or sliding doors
- Outswing or inswing doors
- Closet doors
- Pharmaceutical cabinets
- Gun cabinets
- Utility cabinets
- Museum display cases
- Retail display cases

Models

180ALIV	Surface mount, left hand, failsafe, with auto relock
180ARIV	Surface mount, right hand, failsafe, with auto relock
180ALRIV	Top Jamb, left hand reverse, failsafe, with auto relock
180ARRIV	Top Jamb, right hand reverse, failsafe, with auto relock
280LHV	Surface mount, left hand, or top jamb mount right hand reverse, failsecure less auto relock
280RHV	Surface mount, right hand, or top jamb mount, left hand reverse, failsecure less auto relock

1090/ 1290 SPACESAVER®

BOLT LOCKS

The Spacesaver®

Fully concealed and easily installed in 1.75" (4.44cm) frame or door stile

The Spacesaver®, first designed and patented by IDC, is a fundamental innovation in electric locking technology for access control applications.
The stainless steel bolt projects at right angles to the lock mechanism, allowing installation of Spacesaver® locks, by means of a simple cutout, in virtually any standard 1.75" frame, or in most door lock stiles.
With the entire lock concealed, esthetic acceptability is complete, security is greater and installation in old or new construction is fast, easy and economical.

Stainless Steel Bolt

Greater security is provided by the 0.625" (1.6cm) diameter solid stainless steel bolt. The bolt rotates freely, making attempts to tamper or cut extremely difficult.

Specification Grade Solenoid

All Spacesaver® lock solenoids are manufactured by IDC to precision specifications. IDC solenoids are capable of superior overall performance in both force and longevity, providing years of service compared to commercial grade solenoids.

- Auxiliary Locks

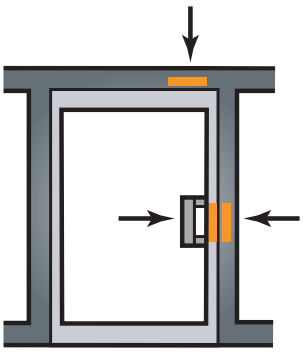

c UL us LISTED

- Complies with "positive pressure" requirements of standard UL10C
- Listed US & Canada

Code Compliant

Classified in accordance with Uniform Building Code standard 7-2, "Fire Test for Door Assemblies"
IDC Spacesaver® locks may be mounted in the frame header, side jamb or door lock stile.

Three Point Installation

Field Adjustable Auto-Relock Switch

The automatic relock switch keeps the bolt retracted while the door is open. The door depresses the ball switch assembly on closure, causing the bolt to project automatically, locking the door. In addition, the ball switch assembly is bidirectional, permitting the locks to be used on swinging and sliding doors.

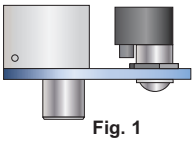

Fig. 1

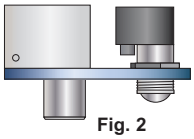

Fig. 2

The auto relock assembly is field adjustable to compensate for wide door gap. (See Figure 1 & 2.)

1091A Failsafe

The 1091A is locked when energized. Recommended for safety applications, it is intended that the door unlock automatically when power is interrupted by the access control, power failure or signal from a fire life safety system.

- Bolt Throw 0.75" (19.05mm)

1091ADL Deadlocking Failsafe
The 1091ADL is equipped with a deadlocking mechanism that prevents the bolt from being tampered with and pried to unlock. The 1091ADL has all the operational features of the 1091A (above) and is recommended for failsafe applications requiring a higher level of security.

- Bolt throw 0.75" (19.05mm)

1291A Failsecure

The 1291A is locked when de-energized and unlocked when energized. Recommended for security applications only, it is intended that the door lock when power is interrupted by a power failure.
- Bolt Throw 0.625" (15.875mm)

1190/2090 SPACESAVER®

BOLT LOCKS

1190A

2090A

Spacesaver® Extra Heavy Duty

Fully concealed and easily installed in 1.75" (4.44cm) frame or door stile

The Spacesaver®, first designed and patented by IDC, is a fundamental innovation in electric locking technology for access control applications.

The stainless steel bolt projects at right angles to the lock mechanism, allowing installation of Spacesaver® locks, by means of a simple cutout, in virtually any standard 1.75" frame, or in most door lock stiles. With the entire lock concealed, esthetic acceptability is complete, security is greater and installation in old or new construction is fast, easy and economical.

Powerful Extra Heavy Duty Design

The 1190 and 2090 Spacesaver® bolt locks are the most powerful commercial grade units available on the market. They are designed to provide years of trouble free operation. There are only three moving parts within the hefty solid metal body of the 1190A and five in the 2090A.

Powerful Extra Heavy Duty Solenoid

The solenoids are the strongest found in the industry for commercial or industrial grade applications. The power and strength of the solenoids far surpasses any competitive models.

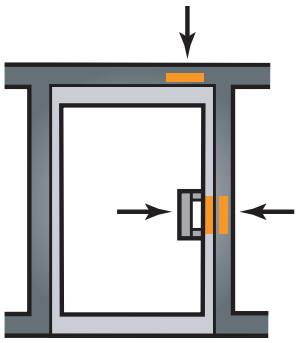

All Spacesaver® lock solenoids are manufactured by IDC to precision specifications. IDC solenoids are capable of superior overall performance in both force and longevity, providing years of service.

Solid Stainless Steel Bolt

Greater security is provided by the 0.75" (19 mm) diameter solid stainless steel bolt. The bolt rotates freely, making attempts to tamper or cut extremely difficult.

Three Point Installation

IDC Spacesaver® locks may be mounted in the frame header, side jamb or door lock stile.

Field Adjustable Auto-Relock Switch

The automatic relock switch keeps the bolt retracted while the door is open. The door depresses the ball switch assembly on closure, causing the bolt to project automatically locking the door.
In addition the ball switch assembly is bi-directional, permitting the locks to be used on swinging and sliding doors.

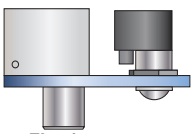

Fig. 1

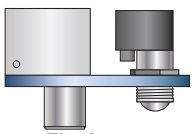

Fig. 2

The auto relock assembly is field adjustable to compensate for wide door gap. (See Figures 1 and 2.)

1190A Failsafe

The 1190A is locked when energized. Recommended for safety applications, it is intended that the door unlock automatically when power is interrupted by the access control, power failure or signal from a fire life safety system.

- Bolt Throw 0.75" (19 mm)

2090A Failsecure

The 2090A is locked when de-energized and unlocked when energized. Recommended for security applications only, it is intended that the door automatically locks when power is interrupted by the access control or power failure.

FS23M Dual Failsafe Spacesaver®

BOLT LOCK

Dual Failsafe Spacesaver®

CSFM Listed for locking of perimeter entry and emergency exit doors after business hours

Tested to 1 Million Cycles

Fully concealed and easily installed in 1.75" (4.44cm) frame or door stile

Dual Failsafe

The FS23M dual failsafe feature is available only from IDC. Conventional failsafe locking bolts rely solely on a spring to retract the bolt while the FS23M bolt will unlock with or without the assistance of the spring. This is the only electric bolt lock listed by the California State Fire Marshal for locking of perimeter entrance and emergency exit doors after-hours.

Large repelling magnets are located within the bolt and strike. When power is interrupted the bolt is retracted and held back by a spring. Should the spring fail, repelling magnets eject the bolt from the strike, unlocking the door.

CSFM Bi-Annual Testing

The IDC FS23M has been thoroughly tested by Underwriters Laboratories and cycled for 1 million operations. In addition, an unannounced follow-up inspection is conducted bi-annually by a California State Fire Marshal approved independent test laboratory. Locks are selected by the inspector at random from stock. They are then tested for operation without the assistance of the spring.

Bolt Design

The bolt is made of a lightweight and extremely resilient nylon material. While lack of weight enables the magnet to eject the bolt, an inherent feature is powerful and smooth operation. The longevity of this lock is unsurpassed compared to electromechanical locks with steel bolts with abrasive metal to metal interaction. Additional bolt features include:

- *2500lbs bolt strength*
- *Hardened Margnet Core, Resistant to metal cutting saws*

All Spacesaver® lock solenoids are manufactured by IDC to precision specifications. IDC solenoids are capable for superior overall performance in both force and longevity, providing years of service compared to other manufacturers off-the-shelf or commercial grade designs

Specifications Grade Solenoids

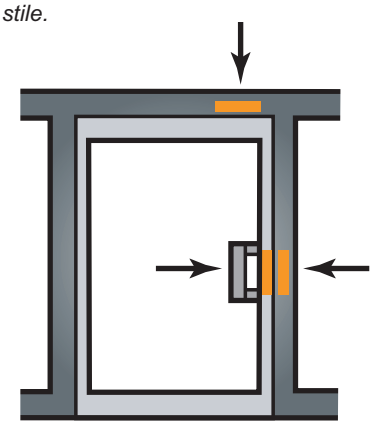

The IDC designed and patented FS23M is locked when energized. Recommended for safety applications, the door unlocks automatically when power is interrupted by the access control, power failure or a signal from the fire life safety system.

Application

While designed for perimeter applications the performance characteristics of the FS23M make it the first choice for all interior or exterior openings where the use of an electric bolt lock is applicable.

Three Point Installation

IDC Spacesaver locks may be mounted in the frame header, side jamb or door lock stile.

626 Dull Chrome
629 Satin Stainless Steel

Options

Bolt and Door Status

Door and lock status monitoring sensors are installed and concealed in the lock. The need for additional door and frame preparations is eliminated. Magnetic status sensors are behind the faceplate to inhibit tampering. The DPS mechanical status switch is recommended for minimum security applications only.

Applications include: Remote Door and Lock Status; Mantraps; Air/Clean Rooms; Communicating Bathrooms; Door Hold Open Alarms and CCTV Activation.

B *Magnetic Bolt Status Switch*
SPDT 0.25 Amp @ 30VDC
Indicates bolt locked and bolt unlocked.

D *Mechanical Door Position Switch*
SPDT 5 Amps @ 30VDC
Integral to the auto relock ball switch assembly. Indicates, door closed and door open. Recommended for minimum security applications only

AC Operation

BR64XL *Rectifier for AC operation*

Field Adjustable Auto-Relock Switch

The automatic relock switch keeps the bolt retracted while the door is open. The door depresses the ball switch assembly on closure, causing the bolt to project automatically, locking the door. In addition, the ball switch assembly is bidirectional, permitting the locks to be used on single swing and sliding doors.

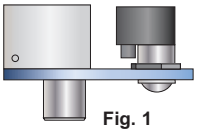

Fig. 1

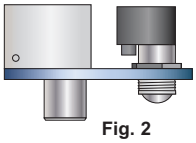

Fig. 2

The auto relock assembly is field adjustable to compensate for wide door gap.
(See Figure 1&2.)

290 MICRO

CABINET LOCK

Applications

The 290 Micro Cabinet Lock is designed to electronically secure cabinets and drawers. The need for keys is eliminated and the addition of a keypad or remote control of your choice provides true access control and convenience of use.

- Pharmaceutical cabinets and drawers
- Retail display cases and drawers
- Gun cabinets
- File cabinets
- Utility cabinets and drawers
- Museum display cases

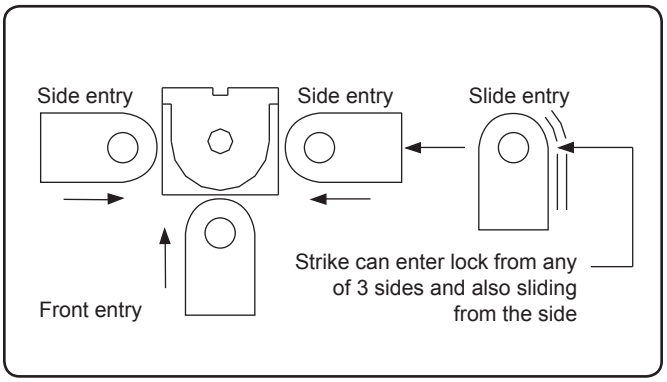

Features

- For swinging or sliding doors
- Failsecure continuous duty
- Field reversible solenoid for failsafe operation
- Dual 12/24VDC
- Nonhanded
- 600lbs of holding force

ACTIVE INFRARED & MICROWAVE

X-ZONE T

DOOR SENSOR

Combined Active Infrared and Microwave Door Sensor

MONITORING CAPABILITY

X-Zone T has built-in monitoring capability. The X-Zone T monitors all its critical functions and notifies compatible controls when an error occurs. Self Monitoring capability ensures a higher level of performance over the life of the sensor.

Complies with new ANSI standard

BLUE ZONE

When the presence area detects a person or object, the sensor will activate the door and enable the "BLUE ZONE"; the area through the threshold. As long as the sensor remains in detection, the sensor will keep the door in the open position. Once the detection area is cleared , the "BLUE ZONE" will ignore the door panels and allow the door to safely close.

Optional cover line up

Mirror

Silver

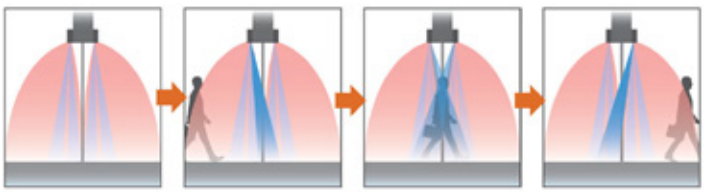

White

BLACK

DIRECTIONAL DETECTION

The X-Zone T can be adjusted to ignore traffic moving away from the sensor and reset more quickly. This will allow the door to close more quickly which reduces airflow between environmentally-controlled areas and the outdoors. This feature will save your customer money over the life of the sensor. Reduce power consumption and protect the environment with the X-Zone T from OPTEX.

ACTIVE INFRARED DOOR SENSOR

OA-AXIS SERIES

THRESHOLD SAFETY AND ACTIVATION

BLACK SILVER

The OPTEX OA-Axis series is the new active infrared door sensor standard for use on automatic sliding doors. The OA-Axis series is developed as a combination sensor for threshold safety and activation.

COMBINATION

The OPTEX OA-Axis series utilizes OPTEX's unique active infrared technology, combining activation and safety into one sensor. By using the unique OPTEX presence detection technique the OA-Axis series provides maximum safety around the threshold as well as a large motion detection area for door activation.

EASY ADJUSTMENT

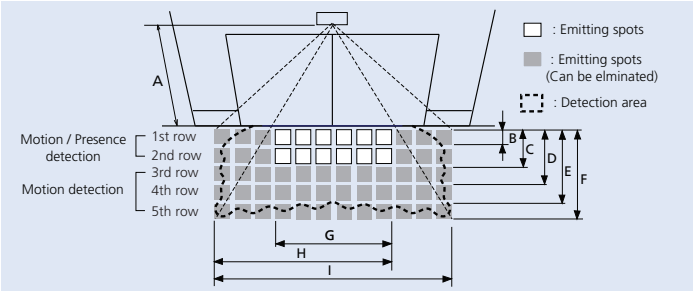

Installation time can be reduced to a minimum by using easily set switches and adjustments. The sensor can be quickly adjusted for many different applications.

SAFETY

The active infrared presence detection of the OA-Axis series can be set very accurately and can be moved 6° towards or away from the door. The sensor detects a person or object and holds the door open as long as they are in or near the threshold area, even if they are motionless.

MOTION DETECTION

The large detection area provides fast detection for any humans or carts approaching from any angle. The sensor's enhanced pattern depth enables it to detect people and objects farther away and allows the door to open conveniently for them. The presence and motion detection areas can be adjusted independently.

Mounting Height A	7′ 2″	8′ 2″	8′ 10″	9′ 10″
Area Depth B	5 1/2″	6″	7″	8″
Area Depth C	1′ 5″	1′ 7″	1′ 8″	1′ 11″
Area Depth D	2′ 8″	3′ 1″	3′ 3″	3′ 7″
Area Depth E	4′ 5″	5′ 1″	5′ 5″	6′ 1″
Area Depth F	6′ 3″	7′ 1″	7′ 8″	8′ 6″
Area Depth G	4′ 4″	4′ 11″	5′ 4″	5′ 11″
Area Depth H	6′ 9″	7′ 7″	8′ 3″	9′ 2″
Area Depth I	9′ 2″	10′ 4″	11′ 2″	12′ 5″

The actual detection may differ according to the size/material/entry speed of the object and the installation environment.

VARIETY

By offering different types of output contacts the OA-Axis series meets the requirements and local standards in many different markets.

OA-Axis I: relay output for activation and safety.
OA-Axis II: one relay for safety and a second relay for motion/activation.

ACTIVE INFRARED DOOR SENSOR

i-oneX T

EXTRA-WIDE DETECTION AREA

Complies with new ANSI standard

BLACK

MONITORING CAPABILITY

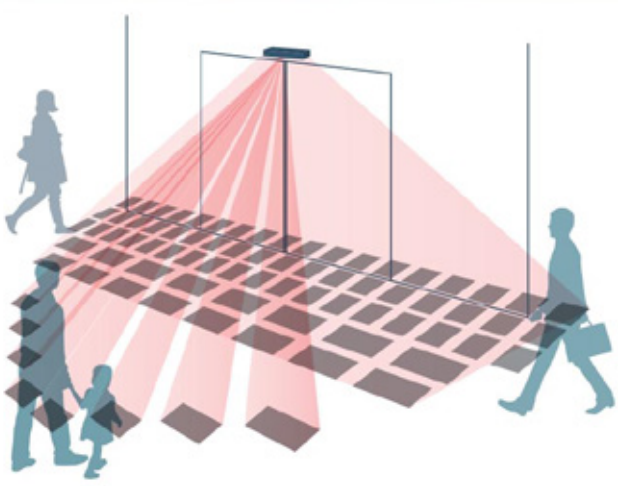

i-oneX T has built-in "monitoring capability". The i-oneX T monitors all its critical functions and notifies compatible controls when an error occurs. Self monitoring capability the life of the sensor.

BUILT IN SUPPLEMENTAL SIDELIGHT SAFETY

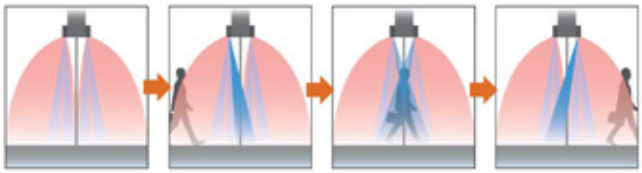

The i-oneX T has a wide and deep detection area that can cover not only the threshold area, but the sidelight area as well. The i-oneX T provides supplemental sidelight safety all from a single sensor. Provide your customers with the highest level of safety and functionality with the i-oneX T.

BLUE ZONE

When the presence area detects a person or object, the sensor will activate the door and enable the "BLUE ZONE"; the area through the threshold. As long as the sensor remains in detection, the sensor will keep the door in the open position. Once the detection area is cleared, the "BLUE ZONE" will ignore the door panels and allow the door to safely close.

The extra-wide detection area covers the door opening plus sidelights, providing fast detection for traffic approaching from any angle.

The OA-Edge series are based on the Optex Active Infrared Triangulations Technology. Due to the modular design, you can upgrade the safety level of the sensor by adding additional modules.

The OA-Edge T is in compliance with the lastest European and local regulations as DIN 18650 and tested and approved by the German test organization TUV.

ACTIVE INFRARED DOOR SENSOR

ELITE T

DOOR-MOUNTED PRO-SWING

Complies with new ANSI standard

FULL-TIME PRESENCE DETECTION

The Advantage of the door-mounted Pro-Swing ELITE T is that the presence detection stays on even when the door is in motion. The Pro-Swing ELITE T can detect a person or object at any point in the door's swing path, providing complete safety and convenience for swinging doors. When a person or object is in the detection area, the sensor will cause the door to slow, stop, or reverse direction. Knowing Act Doors - ELITE T system satisfies the requirement for secondary activation sensor. No additional sensor required.

NO OVERHEAD SAFETY SENSOR REQUIRED

The Pro-Swing ELITE T provides a full detection pattern that covers the entire swing of the doors in full open and full close position, there is no need for an overhead safety sensor.

LARGE AND ADJUSTABLE DETECTION AREA

The Pro-Swing ELITE T has a large detection area which can detect beyond the normal area around the moving part of the door. The sensor creates a layer of awareness around the door to ensure safety. By simply selecting dipswitches both the function and detection area of the sensor can be adjusted.

MONITORING CAPABILITY

ELITE T has built-in "monitoring capability". ELITE T monitors all its critical functions and notifies compatible controls when an error occurs. Self-monitoring capability ensures a higher level of performance over the life of the sensor.

FULL TIME PRESENCE DETECTION

The Optex Pro-Swing ELITE T is designed to detect moving or stationary people in the swing path of the door. The Optex Pro-Swing ELITE T stays active even when the door is in motion, providing safety all of the time!

MICROWAVE DOOR SENSOR

REACTION ONE/TWO

FOR SLIDE AND SWING DOORS

BLACK SILVER

OPTEX Reaction microwave sensors are specially designed to increase efficiency on opening all types of automatic doors. The OPTEX microwaves provide fast detection for all automatic door installations and particularly for applications with highspeed entries. The Reaction series is the most flexible line of microwave activation sensors available today.

DETECTION AREA

The OPTEX microwave series offers a narrow or wide detection area that makes it suitable for all types of installations. The narrow setting is easy to set by just clicking the narrow lens on to the radar module. By turning the module left or right and tilting it up and down the microwave can be adjusted quickly and simply for many different applications. No external set-up device is needed.

VERSATILITY IN SWING DOOR ACTIVATION

The Reaction Two includes a uni-directional detection option and can be surface mounted on the door header or the ceiling. This allows the sensor to be used with center pivoted or surface applied operators and in one way traffic or two way traffic applications. An optional recessed ceiling mount is available if desired.

Note: When mounting the Reaction on the swing side of the door the sensor must be located past the swing path of the door.

UNI-DIRECTIONAL SETTING

The Reaction Two is equipped with a dipswitch for Uni-directional or Bi-directional mode. In Bi-directional mode the sensor will detect motion either towards or away from the sensor and open the door. In Uni-directional mode the sensor will only detect when movement is towards the sensor. This allows for the door to close more quickly and saves energy by reducing airflow.

AUTO-CAUTION MODE

Auto Caution mode gives a higher level of sensitivity when persons linger in the detection area. In conjunction with Uni-Directional mode, it provides high safety with maximum efficiency.

ANSI COMPLIANCE

When adjusted properly this sensor meets the current requirements for Motion Sensors in Section 8 of the ANSI/BHMA A156.10 Standard For Power Operated Pedestrian Doors.

MICROWAVE MOTION SENSOR

MICROSTAR™ M

HUMAN PRESENCE RADAR™

MONITORING CAPABILITY

The microStar M is a flush-mount microwave motion sensor with Human Presence Radar™ (HPR™) for activating all types of automatic doors. The microStar M provides unparalleled protection to even the slowest moving pedestrians from doors closing prematurely.

The microStar M is the first motion sensor to feature an "installation mode," which allows the installer to set the detection area without having to physically activate the door.

Like other conventional microwave sensors, for the microStar M to activate an automatic door, it utilizes Doppler shift radar to detect movements of at least 2" per second. However, once the door has been activated, the microStar's second level of detection — Human Presence Radar™ — is enabled. Now motion down to 1/4" per second can be detected. This means with HPR™ enabled, persons virtually standing still will continue to be detected anywhere in the detection zone.

Since conventional Doppler shift radar must initially activate the door before enabling Human Presence Radar™, there is no additional chance for false activation of the door because HPR™ alone cannot activate the door.

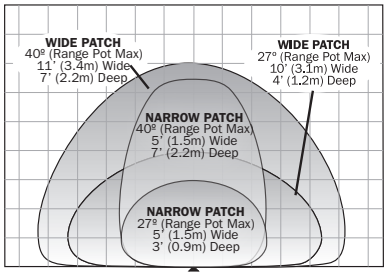

Human Presence Radar™ gives slow moving, elderly or disabled persons the confidence that once they have been initially detected, they can safely approach an automatic door at any speed without the door closing prematurely.

MS-BDB
(Optional Mounting Bracket)

MSRC
(Optional Rain Cover)

COVERAGE PATTERN

TECHNICAL DATA

- Human Presence Radar™ (HPR™) Provides Additional Level of Motion Detection After Initial Door Activation
- Unidirectional & Bidirectional, Narrow & Wide Patterns, and Variable Elevation, In One Unit
- Two Planar Antennas Included
- Can Be Mounted Up To 15 Feet Above Floor
- Easy To Install and Set-Up Without Proprietary External Devices
- Easy Sensitivity and Time Delay Adjustments
- Install Mode To Set Up Activation Pattern Without Physically Activating Doors
- Fits 1 3/4" Door Frames
- Bidirectional Pattern Adjustment (Left/Right, In/Out)
- Visible LEDs To Verify Activation In Normal Operating Mode
- UV Stabilized ABS Plastic Enclosure

SPECIFICATIONS

SLIDING PEDESTRIAN DOOR

SAFEPATH™ DH100-CT

MOTION & PRESENCE SENSOR

MONITORING CAPABILITY

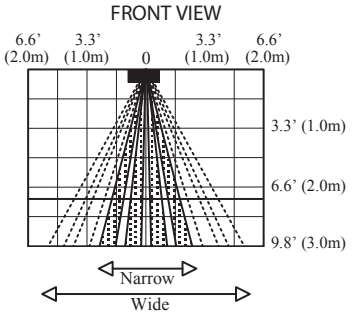

The SafePath™ DH100-CT is an active infrared presence sensor that is designed to provide both activation and safety detection for automatic sliding and folding doors in a single device.

The DH100-CT is based on the most reliable active infrared (AI) technology available—Floor Reflection Method (FRM).

With FRM-AI, up to 48 individual detection points are precisely reflected off of the floor in a rectangular pattern meeting and exceeding ANSI A156.10 guidelines.

The DH100-CT is designed for easy field installation and adjustment. The pattern width and depth are both mechanically adjustable. In addition, the depth can be altered electronically from 5 to 2 rows. All adjustments are available without the use of proprietary set-up devices.

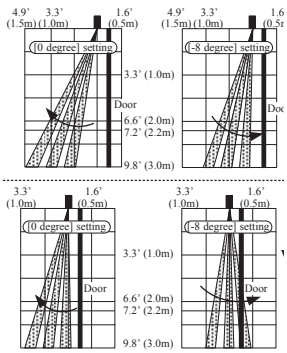

COVERAGE PATTERN

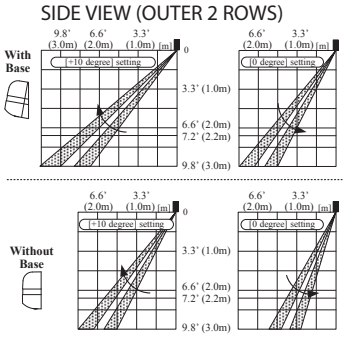

TECHNICAL DATA

- Floor Reflection Method Active Infrared Technology (FRM-AI)
- One Sensor Provides Complete Presence Detection
- Test Input provides sensor monitoring capabilities as required by the latest industry standard.
- Pattern depth and width are adjustable using mounting height, dip switches, detection area depth, and detection area width adjustments.
- Frequency can be changed to prevent interference from other sensors in close proximity.
- Self-Diagnostic means the sensor continuously monitors itself.
- Monitor Mode Switch ensures against false operation caused by snow, leaves, insects, etc.
- Programmable Presence Timer (2 sec., 30 sec., 60 sec., or infinity).

AUTOMATIC SLIDING AND FOLDING DOORS

SAFEPATH™ DHR3

MOTION & PRESENCE SENSOR

MONITORING CAPABILITY

The SafePath™ DHR3 is a combination microwave and active infrared motion/presence sensor designed to provide both activation and safety protection for automatic sliding and folding doors.

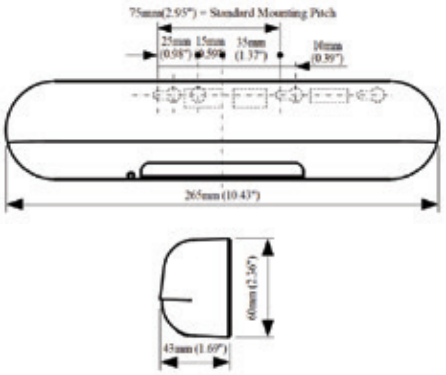

The DHR3 is based on the most reliable microwave and active infrared (AI) technology available—Floor Reflection Method (FRM).

The DHR3 provides motion detection as far as 10.5 feet (3.2m) from the door while simultaneously providing a dense zone of presence detection at the threshold of the door.

The DHR3 is designed for easy field installation and adjustment. The pattern width and depth are both mechanically adjustable. In addition, the depth can be altered electronically from 5 to 2 rows. All adjustments are available without the use of proprietary set-up devices.

Floor Reflection Method™ (FRM™) sensors with Maximum Pattern Infrared™ (MPI™) provide better safety than other infrared sensors.

SafePath Maximum Pattern Infrared (MPI™) sensors use more beams than other manufacturers—and provide a level of safety not found in other standalone infrared sensors.

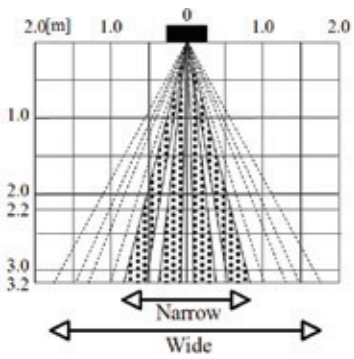

TECHNICAL DATA

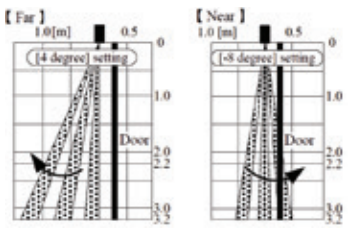

- Doppler Shift Radar & Active Infrared Reflection Technology
- One Sensor Provides Complete Motion & Presence Detection
- 4 Presence Timer Settings
- Mounts Up To 10.5' (3.2m)
- Electronic Depth Adjustment
- Quick-Connect Wiring Harness Included
- Four Frequency Settings
- 12V to 24V AC or DC Operation

SWING DOOR MOUNTED

SAFEPATH™ SSS-5

PRESENCE SENSOR

MONITORING CAPABILITY

The SafePath SSS-5 is a door mounted presence sensor designed to provide safety protection for any swing, bi-fold, revolving and low energy automatic doors. On swing doors, while the door is opening, the SSS-5 will sense and protect a person in it's path and either slow or stop the door. When the door is closing, the SSS-5 will sense a person in it's path and reopen the door.

The SSS-5 combines the most reliable active infrared technology available with Position Sensitive Detection (PSD) technology found in auto focus cameras to ensure precise pedestrian detection within the path of a moving door panel.

The SSS-5 mounts near the top of the door panel out of harms way. PSD sensor technology automatically focuses the sensor lenses to dipswitch controlled height settings.

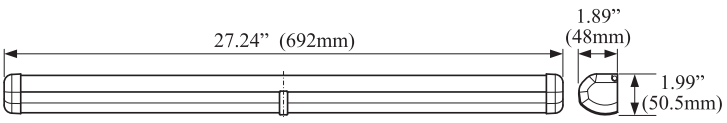

The PSD sensor module consists of a transmitter (TX) and a receiver (RX) that emits a precise detection pattern.

The SSS-5 mounts on either side or both sides of a door panel depending upon the application. They can also be used to stand alone or in conjunction with other sensors for complete swing door safety. Consult ANSI A156.10 to ensure proper usage and to meet all safety requirements.

TECHNICAL DATA

- Combines reliable active infrared and Auto Focus Position Sensitive Detection (PSD) technologies for precise detection
- Mounts at top of door to eliminate potential damage from shopping carts and hospital beds
- SSS-5M1
- Works with any manufacturer's operator
- Adjustable detection angle, distance and width
- Quick-Connect wiring harnesses
- Infinite presence timer
- 12V to 24V AC or DC Operation
- Form C Dry Relay Contact; Output Logic Dipswitch Selectable

FRM-AI COMBINATION

SAFEPATH™ DH400

HIGH MOUNT PRESENCE SENSOR

MONITORING CAPABILITY

The SafePath™ DH400 is a high mount active infrared presence sensor designed to provide both activation and safety protection for automatic sliding and folding doors.

The DH400 is based on the most reliable active infrared (AI) technology available—Floor Reflection Method (FRM).

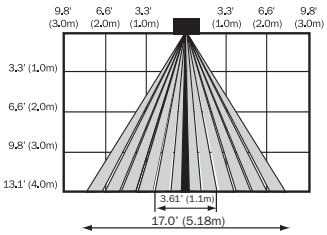

With FRM-AI, up to 60 individual detection zones are precisely reflected off of the floor in a rectangular pattern meeting and exceeding ANSI A156.10 guidelines.

The DH400 provides detection as far as 13.1 feet (4.0m) from the door while simultaneously providing a dense zone of presence detection at the threshold of the door. With a sensing area of up to 60 separate detection zones, the DH400 provides the highest density pattern available.

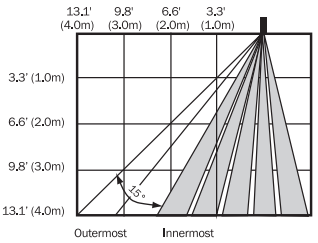

The DH400 is designed for easy field installation and adjustment. The pattern width and depth are both mechanically adjustable. In addition, the depth can be altered electronically from 5 to 2 rows. All adjustments are available without the use of proprietary set-up devices.

FRM-AI COMBINATION

SAFEPATH™ DH94

HIGH MOUNT PRESENCE SENSOR

FRM-AI technology with Maximum Pattern Infrared™ (MPI™)

MONITORING CAPABILITY

The SafePath DH94 is a 4-row presence sensor designed to provide both activation and safety protection to automatic sliding entrances with shallow approaches such as those found in a typical “strip center” shopping complex.

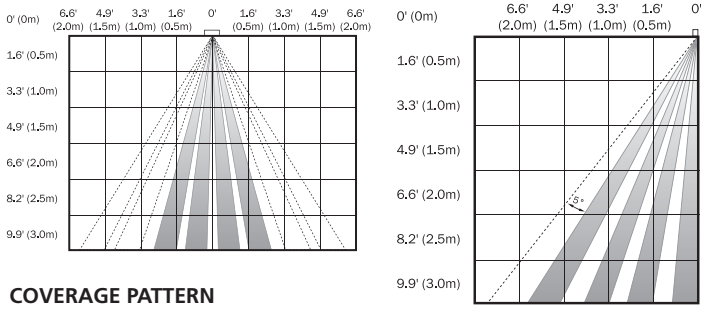

The DH94 is based on the most reliable active infrared (AI) technology available — Floor Reflection Method (FRM). Floor Reflection Method™ (FRM™) sensors with Maximum Pattern Infrared™ (MPI™) provide better safety than other infrared sensors.

With FRM-AI up to 32 individual detection zones are precisely reflected off of the floor in a rectangular pattern meeting and exceeding ANSI A156.10 guidelines.

The DH94 is designed for easy field installation and adjustment. The pattern width and depth are mechanically adjustable. In addition, depth can be altered electronically from 4 rows to 1 row thus providing either a pattern deep enough for both activation and safety or shallow enough for curtain-like safety protection at the threshold. All adjustments are available without the use of proprietary set-up devices.

Floor Reflection Method™ (FRM™) sensors with Maximum Pattern Infrared™ (MPI™) provide better safety than other infrared sensors.

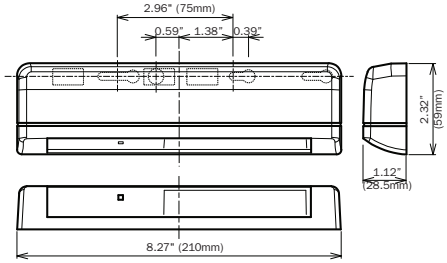

SafePath Maximum Pattern Infrared (MPI™) sensors use more beams than other manufacturers— and provide a level of safety not found in other standalone infrared sensors.

COVERAGE PATTERN

TECHNICAL DATA

- Floor Reflection Method Active Infrared (FRM-AI) Technology
- Up To 32 Detection Zones
- Quick-Connect Wiring
- Mount Up To 9.8’ (3m) High
- Programmable Presence Timer (2, 30, 60 or ∞ Seconds)
- Tape-Free Masking
- No Lens Changing
- Electronic Depth Adjustment (From 4 to 1 Rows)
- Snow Mode
- Indicator LED
- Elevation Angle Adjustment
- 12V or 24V AC or DC Operation
- Rain Cover Available (

SPECIFICATIONS

Model	SafePath DH94
Detection Method	Floor Reflection Method Active Infrared (FRM-AI)
Max. Installation Height	9.8 Feet (3m)
Detection Area Adjustment	
Pattern Width:	(Wide & Narrow)
Pattern Depth:	(4 to 1 Rows)
Pattern Depth:	(0° to 5°)
Power Requirements	12V to 24V AC or DC ± 10%
Power Consumption	AC12V: 1.35VA Max AC24V: 1.5VA Max DC12V: 65mA, DC24V: 35mA
Output Contact	Form C Relay: DC50V 0.1A (Resistor Load)
Output Holding Time	Approx. 0.5 Seconds
Presence Timer	2, 30, 60 or ∞ Seconds Programmable Via Dip Switch
Temperature Range	-4°F to 140°F (-20°C to 60°C)
Weight	Approx. 0.40 lbs. (0.180 kg)
Cover Color	Black
Accessories	Cable: 8 ft. (2.5m)

LONG RANGE INDUSTRIAL

SAFEPATH™ ID20

MICROWAVE MOTION SENSOR

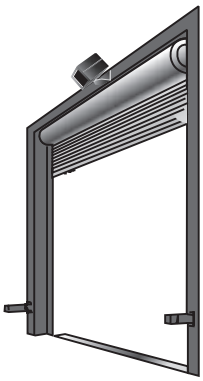

MONITORING CAPABILITY

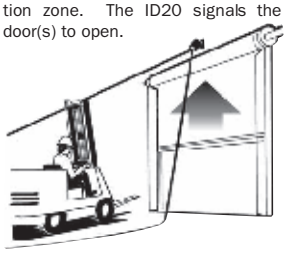

The SafePath™ ID20 is a long range microwave motion sensor designed to provide activation for industrial doors.

Microwave technology allows the ID20 to only detect motion in one direction (approach-only or depart-only) resulting in more efficient and economical door operation. It is capable of detecting larger objects, such as fork trucks up to 60 ft. away. The ID20 can be mounted up to 20 ft. off the floor and has a maximum pattern size approximately 18 ft. wide at 60 ft. from the unit. The pattern is adjustable by turning a range potentiometer and aiming the unit. A speed selection switch makes the ID20 capable of detecting pedestrians (at 25 to 30 feet) and/or vehicles.

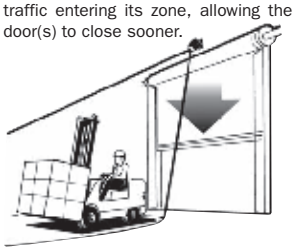

The ID20 is unaffected by air motion, temperature, humidity, color or background variations. It is less expensive to install than loop detectors and is not susceptible to damage or malfunction from ice, salt and heavy vehicular traffic.

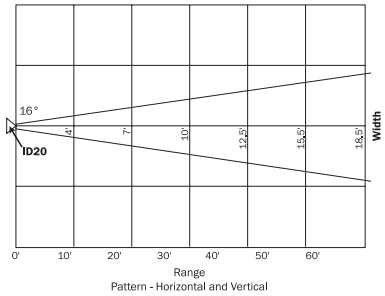

Approaching traffic enters the detection zone. The ID20 signals the door(s) to open.

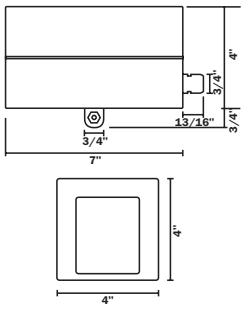

Departing traffic clears the hold open beam. The ID20 ignores departing traffic entering its zone, allowing the door(s) to close sooner.

COVERAGE PATTERN

SPECIFICATIONS

Model	ID20
Operating Frequency	10.525 GHz
Detection Method	Doppler Shift Microwave
Detection Pattern	Adjustable
Detection Angle	Adjustable
Directionality	Switch Selectable—Approach Only or Depart Only
Response Time	0.25 seconds
Speed Detection	Switch Selectable >1 mph or >3 mph
Hold Time	0.5 to 5 seconds, adjustable
Power	12V to 24V AC or DC
Current Consumption	0.10 amps
Relay Contacts	Form C, rated at 3 amps
Mounting	Heavy-duty metal bracket with lockset
Enclosure/Finish	Black powder coated aluminum
Temperature	-35°F to 165°F (-37°C to 74°C)
Physical Dimensions	4"H x 4"W x 7"D
Weight	4 lbs.

TECHNICAL DATA

- Hands-free door activation
- Replaces loop detectors
- Heavy-duty, weather-proof aluminum enclosure
- Easy to set-up and install
- Long range small vehicle detection (up to 60 feet)
- Outdoor/indoor use
- Responds to motion in only one direction—approach only or depart only
- Mounts up to 20 ft. high
- Use Safety Beams or Safety
- Sensors Where Appropriate
- Hold-open
- Rain Cover Available (DHRC)

INDUSTRIAL DOOR

DOMINO 1100

MICROWAVE MOTION SENSOR

Optional weather cover and Domi-LINK Remote Control pictured.

MONITORING CAPABILITY

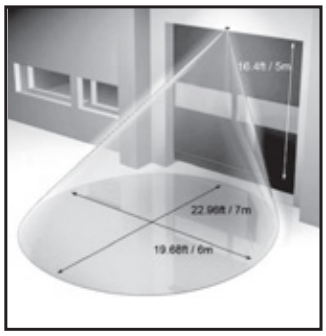

The Domino 1100 is a microwave motion sensor for activating automatic industrial doors. Features include a speed selectable switch that makes the unit capable of detecting pedestrians and/or vehicles. Detection mode is selectable between approach-only, depart-only, or bidirectional motion.

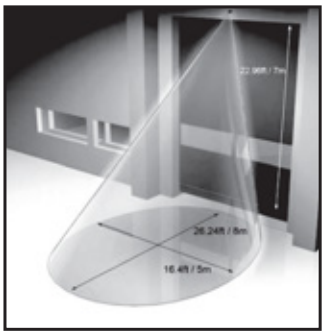

Microwave technology allows the Domino 1100 to detect larger objects, such as forklift trucks, up to 26 feet away. Maximum pattern size is approximately 16 feet wide at 26 feet from the unit, at a mounting height of 23 feet, and is adjustable via programming, tilt angle, and mounting height. The Domino 1100 is not affected by air motion, change in temperature, humidity, color or background variations.

TECHNICAL DATA

- Unidirectional & Bidirectional Detection
- Can Be Mounted Up To 23 Feet Above Floor
- Easy To Install and Set-Up
- Easy Sensitivity and Time Delay Adjustments
- UV Stabilized ABS Plastic Enclosure
- Optional Domi-LINK remote control for easy setup
- Optional weather cover and/or ceiling mount bracket available

Detection Area

APPLICABLE STANDARDS

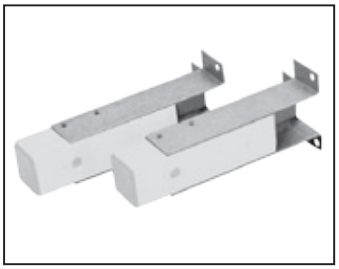

- American National Standards Institute (ANSI)
- Building Hardware Manufacturer's Association (BHMA) - ANSI/BHMA A156.10.

SPECIFICATIONS

Model	Domino 1100
Frequency	24.125 GHz ± 50 MHz (K-Band)
Detection Method	Doppler Shift Radar
Detection Pattern	Selectable, via tilt angle and mounting height
Detection Angle	Adjustable, 21° to 90° ±25° Left/Right
Directionality	Selectable, Unidirectional or Bidirectional
Range	Adjustable (via tilt angle, programming, and mounting height)
Max. Mounting Height	23' (7m)
Power Requirements	12 to 28V AC or 12 to 36VDC
Current Consumption	50mA @ 24V DC
Power Consumption	<1W
Relay Outputs	Main relay and vehicle relay, selectable to N.O. or N.C. via programming
Hold Time	Adjustable, 0.2 to 5 Seconds
Temperature	-4°F to 140°F (-20°C to 60°C)
Color	Flat Black
Enclosure	Ground plate ABS, Cover Polycarbonate
Weight	0.3 lb. (120g)
Size	4.84"W x 3.35"H x 2.24"D 123mmW x 85mmH x 57mmD

SENSOR ACCESSORIES

GDB

Bracket

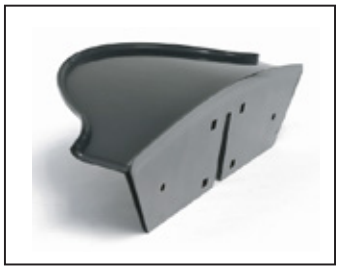

The GDB is an optional stand-off type bracket designed to allow our GD11S surface mount beams to clear garage door track hardware (shown with GD11S).

MS-BDB

Optional Mounting Bracket

The MS-BDB is an optional mounting device that allows the installer to elevate and rotate the microstar-M for special configurations.

MSRC

Optional Rain Cover

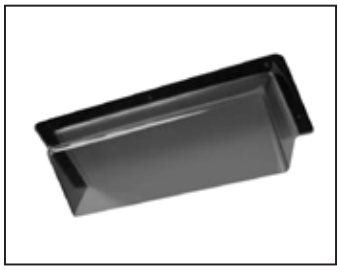

The MSRC is a rain cover designedfor use with the microStar-M sensors on installations that require protec-tion from direct rainfall. The MSRC is made of black polycarbonate plastic.

DH-BDB

Bracket/Backplate

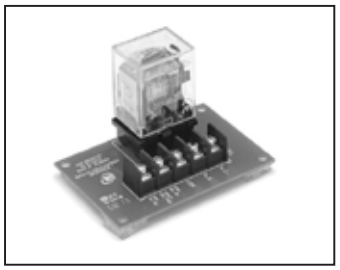

The MSRC is a rain cover designedfor use with the microStar-M sensors on installations that require protec-tion from direct rainfall. The MSRC is made of black polycarbonate plastic..

DHRC

Rain Cover

The MS-BDB is an optional mounting device that allows the installer to elevate and rotate the microstar-M for special configurations.

RIM

RIM Relay Isolation Module

The RIM is a relay isolation module that can be used in applications that could damage input or output connections on sensors, timing modules, or other low voltage devices. The relay on the RIM is rated to handle higher current that might be used for locks, alarms, or other electronic devices that exceed the ratings of standard relays.

12024 Open Frame 24V AC

Transformer

The 12024 transformer is a screw mount type transformer used to convert a 120V AC power supply to 24V AC low voltage.

BRM

BRM Bridge Rectifier Module

The BRM is a bridge rectifier module that can be used to convert AC voltage to DC voltage for a variety of applications.

RCM

RCM Relay Conversion Module

The RCM is a conversion module that will allow a single input signal to operate two discrete outputs. Application examples might include using a single actuator switch, such as our 830-A key-switch, to illuminate an indicator light and unlock a door simultaneously.

ACTIVATION SENSORS FOR INDUSTRIAL DOORS

FALCON

MOTION SENSOR

FEATURES

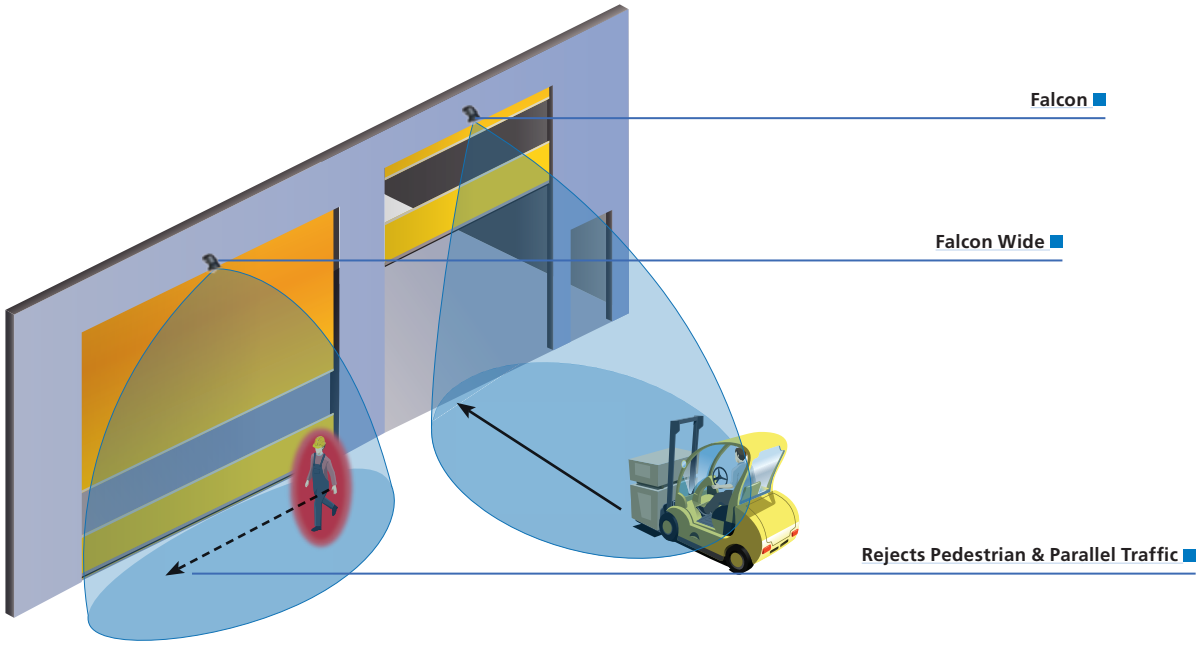

- Uni- and bi-directional microwave motion detection
- Multiple models and settings allow the Falcon family to cover various applications (explosion-proof housing available)
- Can reject pedestrian and parallel traffic
- Supplied mounting bracket allows multiple mounting options from 0° to 180° tilt
- A telescopic, heavy-duty mounting bracket offers extension up to 3-feet (optional)
- NEMA 4 rated enclosure provides protection against dust, cleaning agents and environmental conditions

Intelligence & Durability, All In One Enclosure

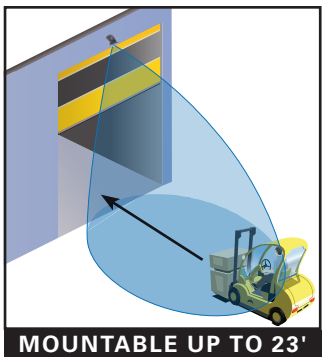

The Falcon is a uni- and bi-directional motion sensor optimizing the performance of automatic doors. The Falcon detects moving objects and can reject pedestrian traffic and parallel traffic.

By detecting vehicles and rejecting parallel traffic, the Falcon reduces door cycling and helps save energy.

MICROWAVE MOTION SENSOR

SPARROW

FOR INDUSTRIAL DOORS

PERFORMANCE

- Detection of both people and vehicles
- Unidirectional detection helps reduce a door's hold open time and helps improve energy conservation
- A total of 10 available detection areas offer an area from 3 ft (D) × 6 ft (L) – 20 ft (D) × 33 ft (L)
- Great product fexibility with a rotating angle from -180° to +180°

Flexible Mounting Positions

APPLICATION

- Any industrial door where motion activation is required

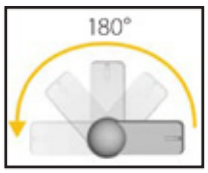

EASE OF INSTALLATION

- Simple installation (screwless terminal block)

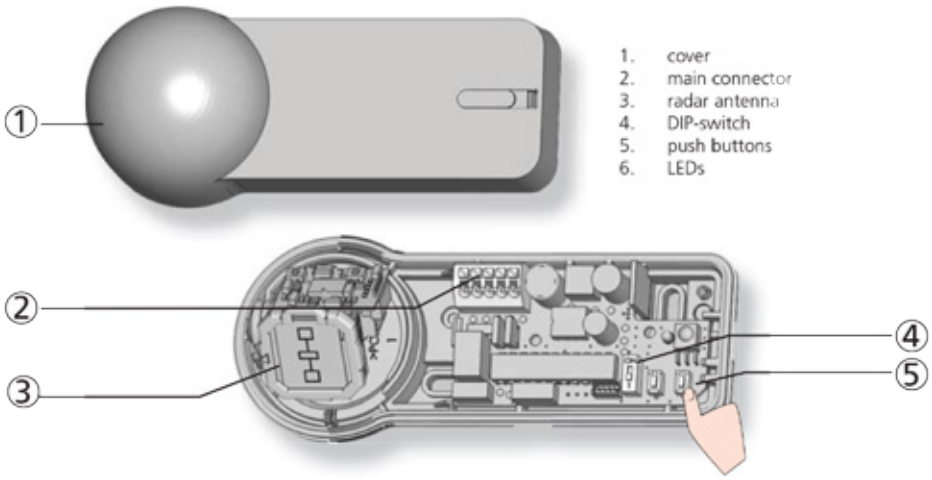

The SPARROW is aimed to detect people and vehicles approaching the door. Its unidirectional detection mode allows the sensor to optimize the door operation.

DESIGNED FOR INDUSTRIAL ENVIRONMENTS

- Rotating positioning: -180° to +180° in reference with the mounting central axis
- Maximum mounting height of 20 ft
- Parameter adjustment with remote control or push buttons
- Adaptation to industrial environment (IP64)

The sensor can be installed in various positions. Always verify the antenna position.

SLEEK AND RELIABLE PASSIVE INFRARED TECHNOLOGY

FLY KIT

PIR SENSOR

IDC'S SMALLEST & MOST ACCURATE PIR SENSOR

Note: Only one (1) Fly sensor included with each kit

Ceiling or Surface Mounting

FEATURES

- Cost effective kits make the Fly an economical sensor perfect for many security applications.
- The microprocessor provides a highly accurate detection zone that is easily field adjustable.
- Passive infrared (PIR) technology provides a reliable signal for request to exit (REX) applications.
- DIP switches and sensing field adjustment mask allow for custom, user-defined settings.
- An Extended Relay Time (ERT) version is available for hold times of 15 or 30 seconds.

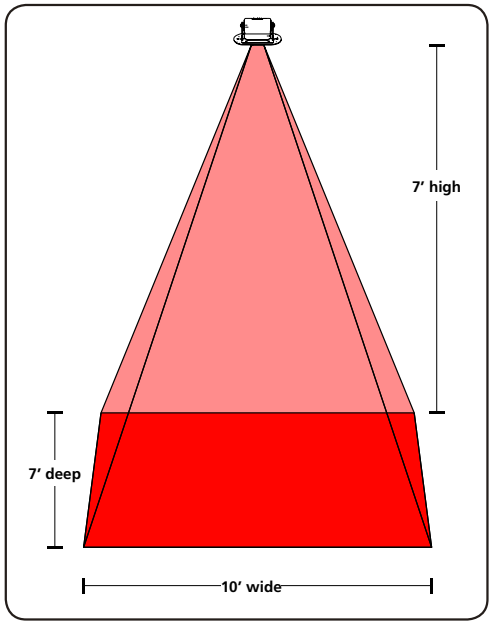

APPLICATIONS

- Releasing a maglock or electric strike on manual or automatic doors
- Request to Exit (REX) applications
- Controlling traffic flow

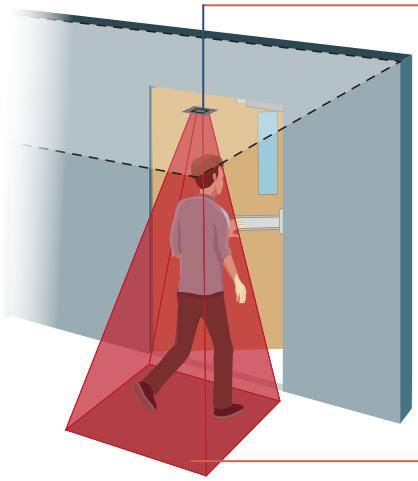

The Fly is a sensor utilizing passive infrared technology, small enough to fit in the palm of your hand.

The Fly Kit is a package containing the standard Fly sensor, the ceiling mount adapter and the surface mount adapter, all available in either a black or white finish.

Sensor Pattern

Recessed Ceiling Mount (FCA)

Featured as a part of IDC's Security product line, the Fly provides a simple PIR solution.

The Fly recognizes objects emitting a heat signature within its detection zone, such as a person.

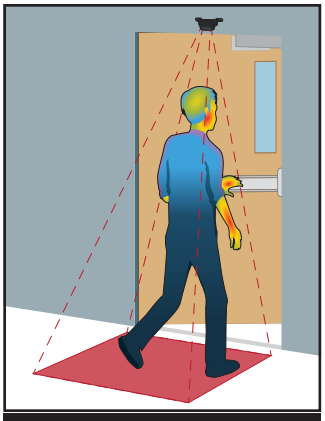

This type of technology is ideal for applications where debris or inanimate objects may cause false detections.

USERS GUIDE

FOCUS AND FOCUS 2

PRESENCE SENSOR

SAFETY PRECAUTIONS

- Shut off all power going to the header before attempting any wiring procedures.
- Maintain a clean & safe environment when working in public areas.
- Constantly be aware of pedestrian traffic around the door area.
- Always stop pedestrian traffic through the doorway when performing tests that may result in unexpected reactions by the door.
- Always check placement of all wiring before powering up to insure that moving door parts will not catch any wires and cause damage to equipment.
- Ensure compliance with all applicable safety standards (i.e. ANSI A156.10) upon completion of installation.

The Focus presence sensor (PN: 10FOCUS or 10FOCUS2 - for recessed mounting) may be used for various applications, including but not limited to revolving doors, drive-up windows, sidelite protection for sliding doors, and industrial applications. The sensor is fully adjustable and has a relay output for easy compatibility to external devices.

ELECTROSTATIC DISCHARGE (ESD) PRECAUTIONS

Circuit board components are vulnerable to damage by electrostatic discharge (ESD). ESD can cause immediate or subtle damage to sensitive electronic parts. An electrostatic charge can build up on the human body and then discharge when you touch a board. A discharge can be produced when walking across a carpet and touching a board, for example. Before handling any board, make sure you dissipate your body's charge.

PRODUCT DESCRIPTION

DESCRIPTION	SPECIFICATION
Power Supply	24 V AC / V DC +/- 10%
Current Consumption:	On = 60 mA max. Off = 30 mA max.
Output Interface; relay	Relay; max. contact rating is 1A @ 30v (resistive)
Detection Range	0' to 8'2" (2.5 m)
Distance Adjustment	2 ft. up to 8 ft. (.61m up to 2.44m) rotating cam with linear adjustment
Detection Time	< 50 ms
Detection Signal Duration	Infinite Presence Detection
LED Indications	Green LED = Detection
Operating Temperature Range	-30° F to 140° F
PCB Dimensions	Master: 6.63" x 1.5" (168mm x 38mm)
Connection to Controller	5 conductor cable
Detection Mode	NO or NC

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

- Ground yourself by touching a conductive surface of the door or other element connected to common earth ground to discharge the static electricity present in your body.
- Avoid walking around while replacing items inside the case, especially if you are on carpet or during conditions of low temperature and low humidity.
- Handle the board by the edges only to avoid touching electronic components.
- Store a loose board in an anti-static bag.

INSTALLATION & WIRING

NOTE: There are similarities and slight differences in the installation, wiring and setup of the Focus and Focus 2. These similarities and differences are noted throughout the document.

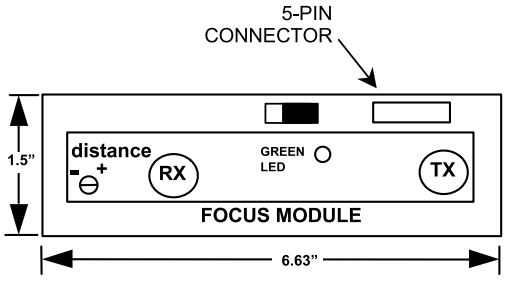

Installation of the sensor (Focus and Focus 2):

1. Remove the end-caps and lens from the sensor (Focus).
2. Drill holes in necessary locations near the ends of the extrusion (Focus).
3. Determine mounting location for the sensor (Focus and Focus 2).
4. Mount the sensor using the enclosed screws (Focus and Focus 2).

Wiring the sensor:

1. Locate the 5-pin connector on the circuit board and wire according to the drawing below (Focus and Focus 2).
2. Carefully route the harness out of the housing. The endcap has a breakaway notch if the wire is to be routed external to the sensor, otherwise, the harness can be neatly routed underneath of the endcap (Focus).
3. Replace the lens and end-caps once installed (Focus).

Wire Color	Connection
Red	N.O. Relay Contact
Black	N.C. Relay Contact
Brown	COM Relay Contact
White	24 V AC / V DC
Green	24 V AC / V DC

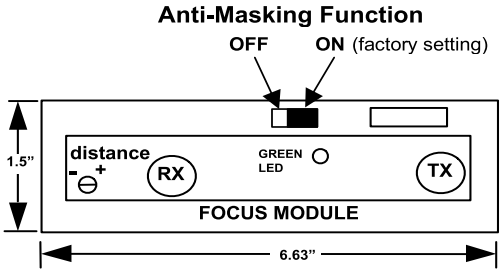

Configuring of the sensor (Focus and Focus 2):

1. The Anti-Masking Function of the sensor has 2 configurations:

-ON: detection occurs even if the receiver collects no signal (factory setting)

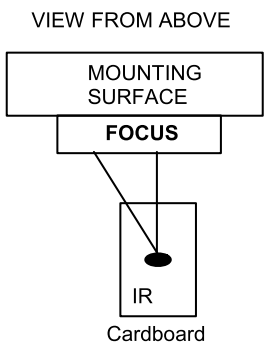

-OFF: no detection occurs if the receiver collects no signal

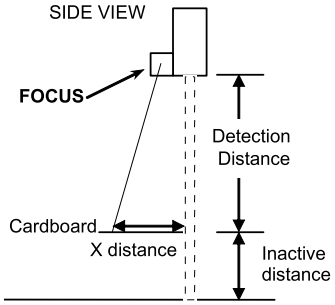

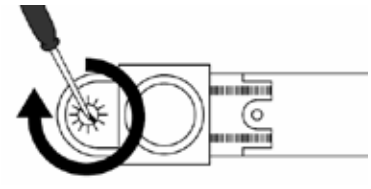

ADJUSTMENT OF DETECTION DISTANCE

CHART 1 (Distance From Face of Door at Inactive Zone Height)							
	ANGLE of PBC	0°	5°	10°	15°	20°	25°
INACTIVE DISTANCE							
8"		0	6"	12 1/2"	19 1/4"	26"	33 1/4"
12"		0	6"	12"	18"	24 1/4"	31 1/2"
16"		0	5 1/2"	11 1/4"	16 3/4"	23 1/4"	29 1/2"
20"		0	5 1/4"	10 1/2"	16"	21 1/2"	27 1/2"
		DISTANCE FROM FACE OF DOOR (X DISTANCE)					

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

NOTE: The Focus 2 is not configured to allow angle adjustment. The Focus 2 only allows for height adjustment.

Use the procedure listed below to adjust each detector in order to obtain detection 12" to 16" above the floor (Focus and Focus 2).

1. Use a white, gray, or black piece of cardboard about 8" x 11" and hold it as shown in the above diagrams.

2. Move the cardboard from the floor upward until it is detected. This will determine the height of the inactive zone (X distance).

3. Measure the height at which the cardboard was detected.

4. If this height does not fall between 12" & 16" above the floor or does not meet your requirements, an adjustment must be made to the detection distance. The distance adjustment potentiometer is near the left side of the PCB, (opposite side of wiring connector). On the Focus 2 the adjustment potentiometer is accessible by removing one of the hole plugs located on the front face or back of the sensor.

A) If the inactive Zone is too high: Turn the distance potentiometer clockwise to increase the detection distance

B) If the inactive Zone is too low: Turn the distance potentiometer counter-clockwise to decrease the detection distance.

NOTE: One notch of the distance adjustment corresponds to approximately 4".

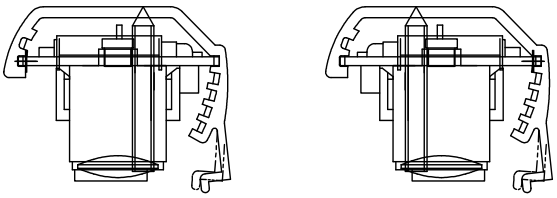

6. Repeat this procedure until the desired distance is achieved.

7. Make sure the door opens completely to ensure that the detector does not trip when there is no obstacle.

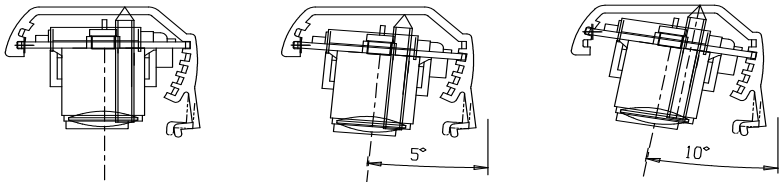

8. If there is detection, turn the distance adjustment counter-clockwise 1 to 2 notches OR change the lateral position of the module OR modify the angle adjustment of the lens.

SURFACE APPLIED MOUNTiNG ANGLES

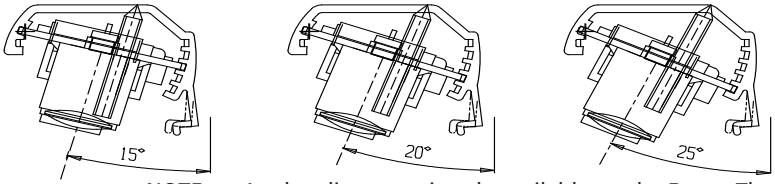

HINGE SIDE RIGHT HINGE SIDE LEFT

Angles of 0° through 10° shown below

Angles of 15° through 25° shown below

NOTE: Angle adjustment is only available on the Focus. The Focus 2 does not allow for angle adjustment.

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

ACTIVE INFRARED PRESENCE DETECTION

IS40/IS40XL

MOTION SENSOR

PROVEN TECHNOLOGY

- Active infrared and microwave technologies work together to provide precise presence and accurate motion detection in front of the door.

SUPERIOR COVERAGE

- With up to 40 spots of infrared detection, the standard **IS40** can be mounted from 8 ft – 16 ft.
- The **IS40xl** should be used for applications with mounting heights from 6.5 ft – 11.5 ft where a wider microwave pattern is desired.

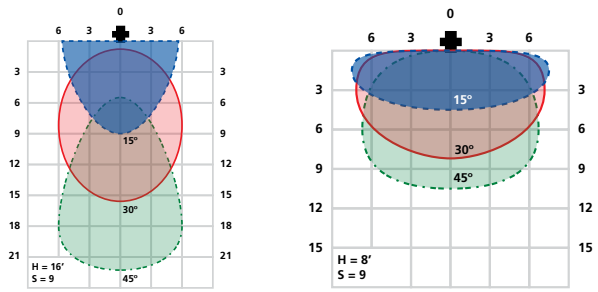

DURABILITY UNDER HARSH CONDITIONS

- The **IS40** and **IS40xl** are immune to subtle door vibrations, light, sun and environmental changes, including rain and snow.
- The **IS40** and **IS40xl** are designed with NEMA 4 and IP65 rated enclosures.

MINIMAL INSTRUCTION AND MAINTENENCE

Labor-intensive induction loops are replaced with an easy to mount overhead installation. Most adjustments can be performed using the IDC remote control.

ACTIVE INFRARED PRESENCE DETECTION

IS40P

MOTION SENSOR

SUPERIOR COVERAGE

- The IS40P has a maximum mounting height of 16 feet and a detection pattern up to 10′ × 10′

DURABILITY UNDER HARSH CONDITIONS

- The IS40P is immune to subtle door vibrations, light, sun and environmental changes, including rain and snow.
- The IS40p is designed with a NEMA 4 and IP65 rated enclosure..

DURABILITY UNDER HARSH CONDITIONS

- The **IS40** and **IS40XL** are immune to subtle door vibrations, light, sun and environmental changes, including rain and snow.
- The **IS40** and **IS40XL** are designed with NEMA 4 and IP65 rated enclosures.

MINIMAL INSTRUCTION AND MAINTENENCE

- Labor-intensive induction loops are replaced with an easy to mount overhead installation. Most adjustments can be performed using the IDC remote control

SUITABLE FOR MOST APPLICATIONS

- The IS40P is equipped with 9 pre-programmed pattern configurations for various industrial applications.l
- Various learn time settings allow presence detection to either remain constant or ignore a motionless object after a pre-determined period of time.

APPLICATIONS

USING 40 SPOTS OF DETECTION
The IS40P can prevent a door from closing on an object at rest or can be used to activate a signal light.

INFRARED PRESENCE DETECTION
Detects when an object is too close to a wall or occupying a space

EASY OVERHEAD INSTALLATION
Eliminates labor intensive induction loops

SAFETY SENSOR FOR INDUSTRIAL DOORS

LZR®–i30

LASER SCANNER

The Premium Industrial Safety Solution

FEATURES

- Cat.2/PL "C" high performance safety solution certified by TÜV for industrial doors
- High level of safety with a three–dimensional, complete presence detection area in front of the door
- Detects objects as small as 2 in.
- Alternative solution to contact edges, light beams, light curtains or any other safety solution
- Option of creating up to 2 virtual push buttons
- Reduces the possibility of collision/tampering damage due to the overhead mounting position
- Easy installation

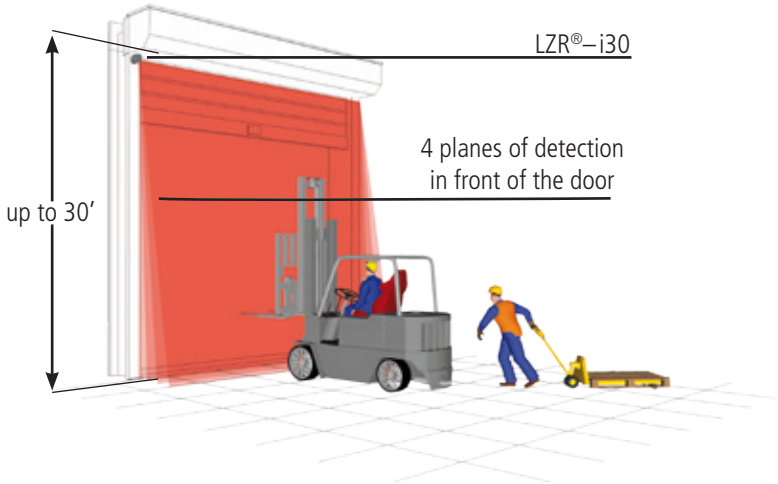

The **LZR®–i30**, works according to the principle of time of flight. It emits a light impulse and measures the amount of time it takes to receive the impulse back. This accurate technology enables the sensor to scan 4 planes in the front of the door, which helps to significantly reduce hazards within the door threshold and surrounding area.

DESIGNED FOR INDUSTRIAL ENVIRONMENTS

- Filters door vibrations and environmental interferences
- Filters door panel deformation caused by wind force
- Degree of protection: IP65 / NEMA 4
- External, Self Monitoring

LASER DETECTION

- Time of flight measurement: allows field dimensions to be customized (floor changes can be ignored)
- Maximum detection range: 30 ft × 30 ft
- Minimum object detection size: 2 in

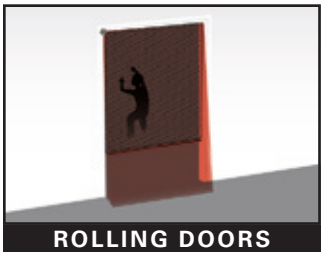

EASE OF INSTALLATION

- 3 visible LASER beams show the LASER safety field position
- Automatic teach–in of safety field dimensions
- Safety field depth adjustment through deactivation of curtains

INDUCTION LOOP DETECTORS

MATRIX

SINGLE & DOUBLE

COMPACT SAFETY SYSTEM

FEATURES

- The Matrix is available in multiple models to accommodate nearly any application.
- Available in single and double channel mode, with power supply configurations of 110 VAC or 12–24 V AC/DC.
- Compatible with most door and gate control applications
- Matrix detectors come in a compact housing with connection through an industrial 11-pin standard connector.
- Settings such as sensitivity and presence time are adjusted via potentiometers, so wide ranges and precise adjustments are made easy.

GATE OPENING AND SAFETY

- Activates and/or holds open a gate as soon as a vehicle enters or remains in its field of detection

INDUSTRIAL APPLICATIONS

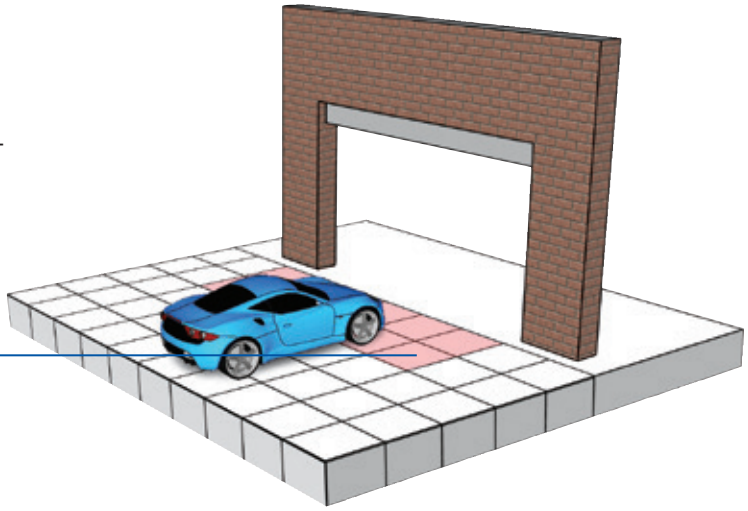

- Activates and/or holds open an industrial door/gate as soon as a vehicle enters or remains in detection

PRODUCT FEATURES

- Potentiometers allow for fine tuning sensitivity and presence learn time
- Detection is not affected by long-term occupation of the loop
- Remembers settings upon power loss
- Separate sensitivity settings for dual channel Matrix D
- Automatic sensitivity boost to track the presence of high-bed vehicles
- Selection of presence and pulse outputs for additional functions

The Matrix is a series of single or double digital inductive loop detectors for vehicle access control and safety for doors, gates, and numerous other applications. High performance features include automatic sensitivity boost, presence and pulse output selection and four frequency settings.

MINIATURE PHOTO ELECTRIC

OS-12C T

SAFETY BEAM

Complies with new ANSI standard

EASY-TO-INSTALL AMPLIFIER UNIT AND SENSOR HEADS

The Optex 0S-12C T amplifier has screwless wiring terminals, which realizes quick installation. Pressing the "Teach-In" button automatically sets the proper sensitivity and self-corrects crossed cables. One amplifier operates one or two pairs of sensor heads.

Teach-in button

One push installation sensor head

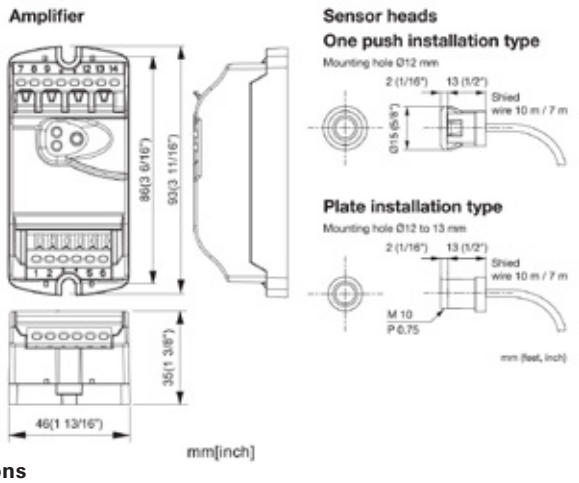

SINGLE BEAMS TYPE: UP TO 32' 10"

The Optex OS-12C T active infrared safety beam system is compatible with any type of automatic door. Its amplifier and sensor heads are designed for fast, simple installation while maintaining the hightest standards of safety and reliability.

MONITORING CAPABILITY

OS-12C T has built-in "monitoring capability". OS-12C T monitors all its critical functions and notifies compatible controls when an error occurs.

Self-monitoring capability ensures a higher level of performance over the life of the sensor.

Options

Mounting plate (Silver)	Sensor head unit	Sensor head holder (Black/Gray)	One push outer plate
			
PP-S (2pcs)	SH-7MC : 7 m SH-10MC : 10 m	OS-BH (2pcs)	PO-C (2pcs)

SPECIFICATIONS

Model	OS-12CT
Installation distance	Less than 10 m (32' 10")
Detection method	Point to point near infrared light beam
Power supply	12 to24 VAC/12 to30 VDC
Current draw	160 mA Max.
Operating indicator	BEAM1 / BEAM2 Stand-by: Green ON / Red ON Detection Active: Green OFF / Red OFF Insufficient sensitivity : Green Blink / Red Blink Test input error: Simultaneous twice Blinking(Red & Green)
Test input	Opto coupler Voltage 5 to 30 V DC Current 6 mA Max.(30 V DC
Safety 0utput (Initial setting)	50 V 0.3 A (resistance load) - N.O./N.C. Switchable
Response time	Approx. 0.1 sec. (from the moment of beam cut-off)
Relay hold time	Approx. 0.5 sec.
Operating temperature	-20 to +55°C (-4 to +131°F)
Weight	Amplifier 63 g (2.2 oz)
Component	1 Amplifier, 2 Mounting screws, 1 Manual (Sensor heads units are required for operation, sold separately)

Note : OS-12C T amplifier can operate with 1 or 2 pairs of sensor heads.
Note : The specifications herein are subject to change without prior notice due to improvements.

SAFETY FOR AUTOMATIC DOORS

MICROCELL

FEATURES

The Microcell range is designed for the safety of pedestrian doors and is featured by a flexibility and an easiness for universal installations :

- Reduced size for easy fittings in most of door profiles
- Enables a mounting very close to the floor (20 cm - 40 cm), as well as an important range (5 m - 10 m) and can be lightly out of alignment
- Protected against short time wrong connections and immuned to the ambient light (sunlight or artificial lighting)
- Totally immune to interference and complies with the European standards 89/336/EEC
- Microcell Two complies with ESC standards, and with the French
- Ministerial Order on automatic doors in the workplace
- Microcell Three complies with the German directive ZH 1/494 on
- Windows and doors activated by external energy sources
- Plug supplied with a special sleeve that prevents from moisture problems

Infrared barrier composed by an emitter and a receiver in cylindrical heads

The small-sized infrared beams that can be discreetly fitted into the profiles of single or double doors and which can also be used for specific applications (railways, security entrances, etc.).

THE MICROCELL RANGE IS AVAILABLE IN SEVERAL VERSIONS :

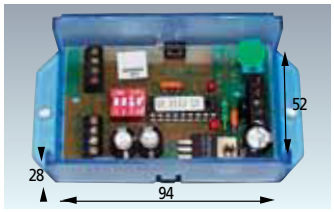

- **Microcell One:** barrier composed by plug-in cylindrical heads with a 5 m cable and a control box with one relay
- **Microcell Two:** barrier composed by plug-in cylindrical heads with a 5 m cable and a control box with two relays
- **Microcell Three:** barrier composed by plug-in cylindrical heads with a 5 m cable and a monitored control box with transistor output

Notes :

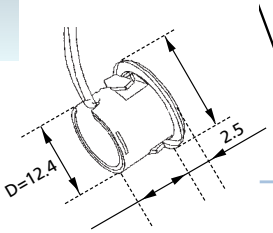

- The Microcell range is available either in single (-S) or in double beam version (-D) an optional 10 m cable (-L) is also available

MODULAR SAFETY BEAM SYSTEM

AccuGuard HP2

PRODUCT DESCRIPTION

The AccuGuard HP2 is an active infrared 2-beam safety system. This modular system consists of a separate Control Module, two Transmitter Beam Heads with cables and two Receiver Beam Heads with cables. The beam heads are available for recess mounting and can be ordered with surface mount housings (HP2-SURFACE).

When a beam is interrupted, the Control Module signals the door to open. In the event of a power loss to the AccuGuard HP2, it will also signal the door to open, thus providing a failsafe system.

The AccuGuard HP2 can be used in both new and retrofit installations with minimal door preparation. The beam heads are available for recess mounting into a 1/2" diameter hole or for surface mounting to any surface. Wiring instructions are printed on the control module housing and the software provides automatic set up.

Meet ANSI A156.10 safety requirements for automatic sliding doors by installing a HP2-SURFACE on the sliding door panel side of the entrance and a HP2 on the fixed sidelight side of the entrance.

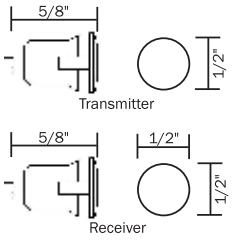

TECHNICAL DATA

- Intelligent Control Module automatically programs itself for one or two beam sets (two sets come with unit)
- Microprocessor controlled tominimize interference with other equipment or voltage oscillations
- Several units can be used inclose proximity to each other
- Fuse protected and compact
- Automatic beam sensitivity adjustment on openings 36" and wider
- Independent sensitivity adjustment for each beam at the control module on openings less than 36"
- Beam range 0-16 ft.
- Excellent resistance to naturaland artificial light sources, water and humidity
- No false activation from rain or insects
- Beam head cables are plug able allowing for easy replacement
- Wire connections at the control module are external screw-type terminals
- Cables are color coded: transmitter=gray, receiver=blue

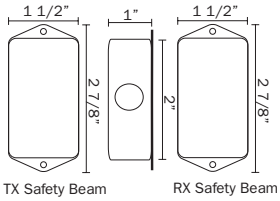

SPECIFICATIONS

Model	HP2 & HP2-SURFACE
Detection Method	Active Infrared Beam Interrupt
Detection Range	6 to 32 feet
Power Requirements	12V to 24V AC or DC (No Polarity Requirements)

SURFACE MOUNT SAFETY BEAM

AccuGuard GD11S

PRODUCT DESCRIPTION

The GD11S is a self-contained surface mount active infrared safety beam system for interior or exterior use on any automatic pedestrian door, industrial door or gate.

When the infrared beam is interrupted, the GD11S' relay output signals an industrial door or gate control to open, stop or reverse. On pedestrian swing doors, the GD11S is mounted on the guide rails. When the door is closing and the overhead safety sensor is locked out, interrupting the GD11S beam will bring this sensor protecting the swing side of the door back into the safety circuit thus inhibiting the door from reopening. This is now a requirement of ANSI A156.10 2005.

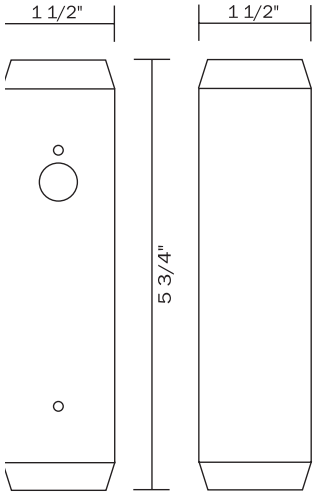

In the event of a power loss to the GD11S, the relay changes state (failsafe). The GD11S can be ordered with the GDB quick mounting brackets for easy installation on industrial doors and gates. side of the entrance and a HP2 on the fixed sidelight side of the entrance.

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

RECESS MOUNT SAFETY BEAM

AccuGuard DB11

PRODUCT DESCRIPTION

The DB11 is a self-contained recess mount active infrared safety beam system for use on any automatic door.

When the infrared beam is interrupted, the DB11's relay output signals an automatic sliding door control to open or reverse when closing. The DB11 can be recess mounted into tubular guide rails on pedestrian swing doors. When the door is closing and the overhead safety sensor is locked out, interrupting the DB11 beam will bring this sensor protecting the swing side of the door back into the safety circuit thus inhibiting the door from reopening. This is now a requirement of ANSI A156.10 2005.

In the event of a power loss to the DB11, the relay changes state (failsafe).

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

TECHNICAL DATA

- 12V to 24V AC or DC Operation
- Pulsed IR Emitter For High Immunity To Ambient Light
- Form C Relay (N.O. or N.C.)
- Recessed (Flush) Mounting
- Variable Time Delay
- Easy To Align
- Molex Connectors Provided For Easy Wiring

MICROCELL BEAM • DAMAGE PREVENTION

FLEX IR

FLEXABLE • UV-RESISTANT

WATERPROOF ACCESSORY AVAILABLE

DAMAGE RESISTANT

- Flexible mounting bracket prevents the Microcell beam system from damage when installed in industrial applications.
- Flexible, UV-resistant material prevents damage to the beam heads, optimizing safety and reliability.

NEMA 4 RATING

- Kits are also available which include the Flex IR, Microcell beam sets and sealed mounting boxes (suitable for exposure to wet and harsh conditions).

ADAPTABLE

- The bracket can be installed in a parallel or perpendicular position to the mounting surface, allowing optimal flexibility for different applications.

SERVICE FRIENDLY

- The Flex IR is built to withstand various conditions should accidents occur. If struck, the Flex IR will bend and flex back into position reducing service calls.

Flexible mounting brackets for BEA Microcell safety beam system — (2) Flex IR brackets are included per set

10FLEXIRN4
(1) 10FLEXIR bracket set, (1) 10MICROCELL1S single beam set, and (2) NEMA 4 boxes

10FLEXIRN4DL
(2) 10FLEXIR bracket sets, (2) 10MICROCELL1D double beam sets, and (4) NEMA 4 boxes

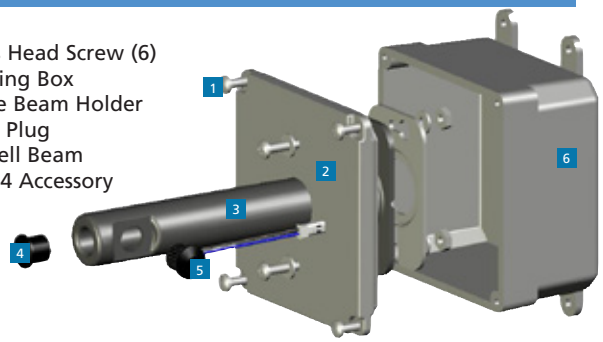

10FLEXIRKIT
Includes (1) 10FLEXIR bracket set and (1) 10MICROCELL1S single beam set

DIMENSIONAL DRAWINGS

COMPONENTS

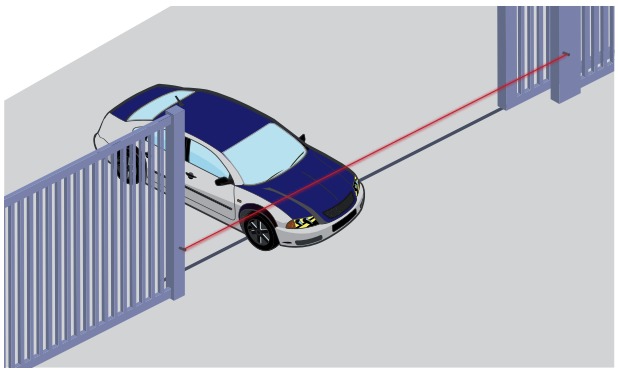

1. Phillips Head Screw (6)
2. Mounting Box
3. Flexible Beam Holder
4. Button Plug
5. Microcell Beam
6. NEMA 4 Accessory

APPLICATIONS

- Flex IR protects the Microcell against blunt hits from tractor trailers, forklifts, or heavy objects in the industrial setting.

- The flexible housing protects the Microcell from damage in the event that it is struck by a vehicle.

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

R2E-100

ENHANCED DOOR SECURITY

FEATURES

- Adjustable defined pattern creates a safer, more secure door
- Creates a secure detection zone from door jamb to lever handle
- Low profile sensor mounts on or above the door frame
- Multiple relocking modes for timed or door position conditions
- Relay output consists of two Form "C" contacts for NO / NC wiring
- Adjustable, built-in audible alarm denotes activation – Can be deactivated
- 3 DRY auxiliary inputs: request to exit, card reader or push button

The R2E-100 is an active infrared, request-to-exit detector specifically designed for access control applications where maximum protection is required. The active infrared pattern is focused in front of and above the door lever handle to greatly reduce unauthorized entry.

R2E-100 DETAILS

COMPETITIVE EXAMPLE

Focuses On Door Hardware Only

Ignores Parallel Cross-Traffic

Not Affected By Typical PIR Invasion Techiques

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

- Ground yourself by touching a conductive surface of the door or other element connected to common earth ground to discharge the static electricity present in your body.
- Avoid walking around while replacing items inside the case, especially if you are on carpet or during conditions of low temperature and low humidity.
- Handle the board by the edges only to avoid touching electronic components.
- Store a loose board in an anti-static bag.

INSTALLATION & WIRING

NOTE: There are similarities and slight differences in the installation, wiring and setup of the Focus and Focus 2. These similarities and differences are noted throughout the document.

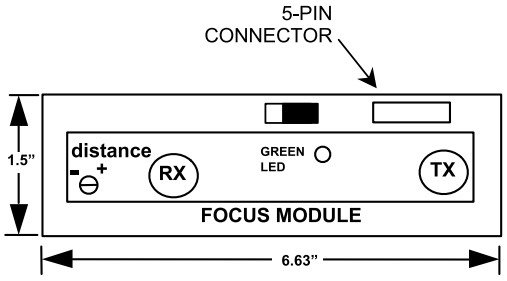

Installation of the sensor (Focus and Focus 2):

1. Remove the end-caps and lens from the sensor (Focus).
2. Drill holes in necessary locations near the ends of the extrusion (Focus).
3. Determine mounting location for the sensor (Focus and Focus 2).
4. Mount the sensor using the enclosed screws (Focus and Focus 2).

Wiring the sensor:

1. Locate the 5-pin connector on the circuit board and wire according to the drawing below (Focus and Focus 2).
2. Carefully route the harness out of the housing. The endcap has a breakaway notch if the wire is to be routed external to the sensor, otherwise, the harness can be neatly routed underneath of the endcap (Focus).
3. Replace the lens and end-caps once installed (Focus).

Wire Color	Connection
Red	N.O. Relay Contact
Black	N.C. Relay Contact
Brown	COM Relay Contact
White	24 V AC / V DC
Green	24 V AC / V DC

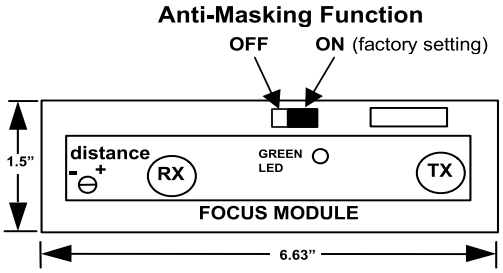

Configuring of the sensor (Focus and Focus 2):

1. The Anti-Masking Function of the sensor has 2 configurations:

-ON: detection occurs even if the receiver collects no signal (factory setting)

-OFF: no detection occurs if the receiver collects no signal

ACTIVE INFRARED SENSOR

SUPERSCAN

INDUSTRIAL

Precise Detection For Industrial Applications

FEATURES

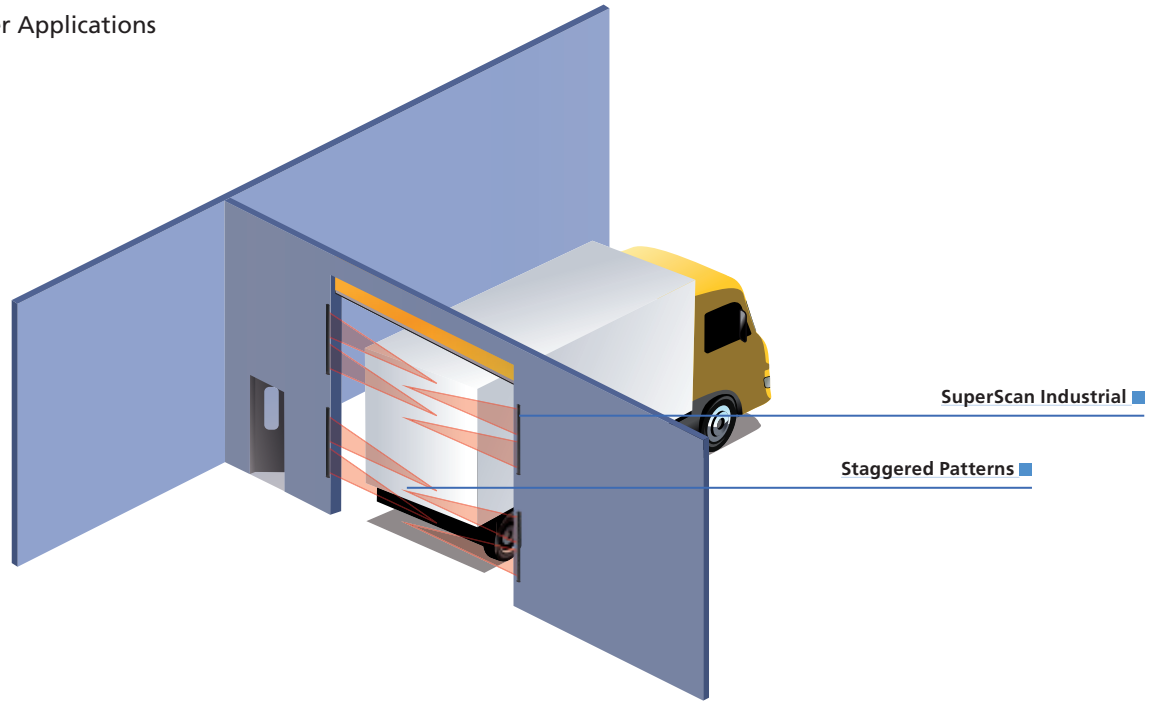

- A focused pattern may be ideal for many applications where increased safety and/or functionality is needed
- Adjustable detection range from 2 to 12 feet
- Background elements, such as texture, color or reflectivity do not effect detection sensitivity
- Single unit emitter and receiver in the same module
- Adjustable to various angles for unique applications; adjustable detection angle in 5-degree increments

APPLICATIONS

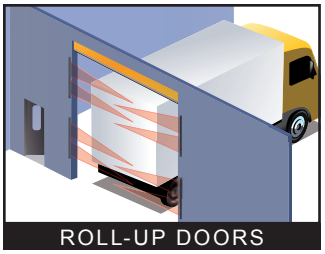

- High-Speed Roll-Up Doors
- Industrial Swinging, Sliding & Bi-folding Doors
- Swinging & Sliding Gates
- Barrier Arm Safety
- Material Handling Applications
- Off-Door Applications (i.e. Light Activation)
- RFID Applications
- Conveyer Applications

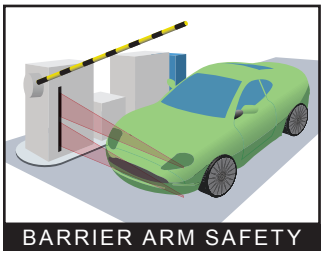

Distance Measuring Technology

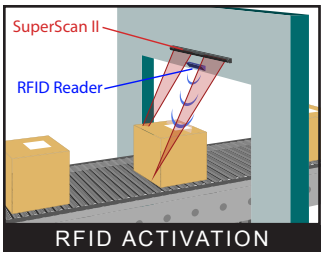

The SUPERSCAN is a presence sensor that uses distance measuring technology to project focused active infrared patterns which can be used for activation, safety and reactivation on industrial door, gate and RFID applications.

PROGRAMMABLE 3-RELAY LOGIC MODULE

Br3

LOGIC MODULE

Eliminates The Need For Multiple Modules

FEATURES

- Multi-functionality offers increased value by combining legacy MC-Linx functionality with more advanced functions for a solution to a wider variety of applications.
- Contains 3 relays; two 3-AMP and one 1-AMP
- Built-in surge suppression in all 3 relays eliminates the need for external components when installing electric locking devices
- Provides the ability to select a WET voltage output up to 1-AMP on Relay 1 to power electric locking devices without the need for an external power supply (source must be capable of providing at least 1-AMP of power)
- Advanced input power circuitry for better protection, including a resetable fuse

12 Different Functions

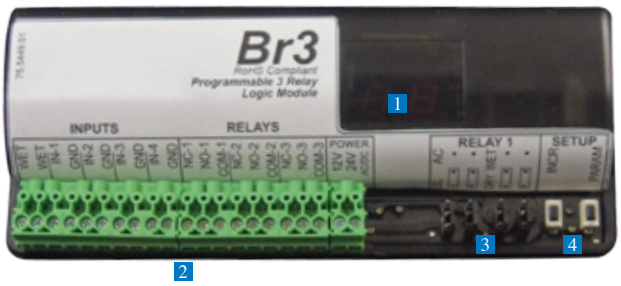

The br3 is a logic module for applications including simple timing, door mounted sensor inhibiting and advanced relay sequencing. With multiple functions in one module, technicians will only need to carry one solution.

Most Common Pedestrian Setting – MC25

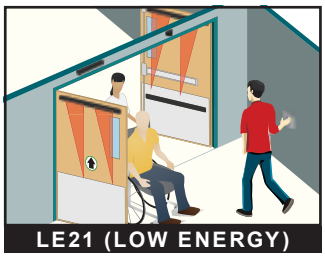

1. Activate Push Plate
2. Receiver Activates Br3
3. Br3 Releases Maglock
4. Br3 Opens Door

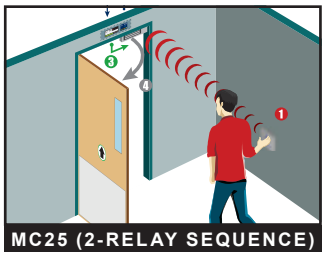

Components

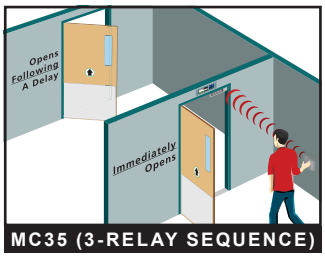

1. Two digit, 7-segment display
2. Input/Output Screw Terminal
3. DRY/WET Output & AC/DC Selector
4. Programmable Push Buttons

COMMON PEDESTRIAN APPLICATIONS

PRODUCT DETAILS & TECHNICAL SPECIFICATIONS

FUNCTION	SUBJECT	MOST COMMON APPLICATIONS
10 (MC10)	Simple Timer	Time delay relay
11 (MC11)	Ratchet / Latching	Push to open / Push to close
21 (LE21)	Inhibitor with Door Position Input	Automatic swing door with push plate, approach side SuperScan is inhibited when door is closed
22 (LE22)	2 Relay Sequence Inhibitor with Door Position Input	Automatic swing door with push plate, approach side SuperScan and Electric Strike. SuperScan is inhibited when door is closed
25 (MC25)	2 Relay Sequence	Automatic swing door with a push plate and electric locking devices
28 (MC28)	2 Relay Sequence with Door Position Input	Automatic swing door with a push plate and electric locking devices with a door position switch to prevent the delay from running during a recycle
29 (MC29)	Relay 1 Deactivation Timer	Automatic swing door or sliding door with an electric locking device and door position switch to prevent lock from reengaging before door closes completely
35 (MC35)	3 Relay Sequence	Two door vestibule with automatic swing doors and single electric locking device
50 (MC50)	Interlock Timer with Door Position Inputs	Interlock module that will only allow one door to open at a time and can be used with any automatic or manual door
55 (MC55)	Interlock Ratchet with Door Position Inputs	Interlock module that will only allow one door to open at a time with a ratchet/latching function and can be used with any automatic or manual door
65 (MC65)	2-Way, 2 Relay Sequence	Two door vestibule sequencing with automatic swing doors traveling in either direction
75 (MC75)	2 Relay Sequence	Automatic swing door with a push plate and electric locking devices

Note: Functions 10, 11, 50, 55 and 65 are NOT compatible with the WET input

Supply Voltage	12 to 24 V AC/DC
Power Consumption	30 to 130 mA; DRY Output
Temperature Range	-15°F to 150°F
Dimensions	5.2 in × 2.2 in × 1.0 in
Housing Material	Gray ABS Plastic
Input Specification	1 to 4; DRY Contact
WET Input	5 to 24 V AC/DC
Contact Rating DRY	
Relay #1	3 A @ 24 VAC / 30 VDC
Relay #2	3 A @ 24 VAC / 30 VDC
Relay #3	1 A @ 24 VAC / 30 VDC
Contact Rating WET	
Relay #1	1 A

2WIRE MODULE

Control Module for Conversion of Hardwired Actuator to Actuator Requiring Power Using Existing Wiring

American National Standards Institute (ANSI) - Building Hardware Manufacturers Association (BHMA) - ANSI/ BHMA A156.10 & A156.19.

PRODUCT DESCRIPTION

The 2WIRE Module is a control module which provides an easy and inexpensive way to upgrade an existing hardwired mechanical actuator to a touchless or capacitive touch actuator that requires power, such as the 216 or NexGen series, without the need for additional wiring.

Upgrading hardwired automatic door actuators to actuators that require power has traditionally been an arduous process. Most actuators that require power use a four wire connection - two wires to provide power to the actuator, and two wires for activation of the door control. Mechanical actuators require only two wires for activation of the door control. Due to this, upgrading required running two additional wires, which could prove costly and time consuming. Using the 2WIRE Module eliminates the need for additional wiring, making the conversion simple and inexpensive!

The 2WIRE Module is designed to install in the door header and requires a 12–24 V AC or DC power input. Up to four actuators can be powered using the 2WIRE Module.

Actuators such as the 216 series infrared touchless or NexGen series can be purchased separately, or as part of a retrofit kit. The input power wires for the actuators connect to the 12V DC Out terminals of the 2WIRE Module. When any of the actuators are triggered, the relay output on the 2WIRE Module will change state, activating the door control.

TECHNICAL DATA

- ADA Compliant Operation
- 12 to 24V AC or DC Operation
- Form C Relay Output
- Heavy Duty 3 Amp Contact

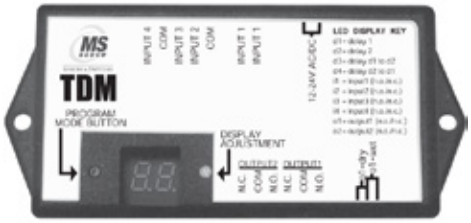

SPECIFICATIONS

Input Voltage	12V to 24V AC or DC, not polarity sensitive
Input Current	Approx. 100mA @ 18V AC
Relay Contact	Form C rated at 3 amps @ 24V DC (resistive)
Current Draw	100mA at 24V
Relay Operation Modes	Normal or “fail-safe” (jumper selectable)
Unit Size	2”W x 2 3/8”L x 3/4”D
Temperature	-13°F to 140°F (-25°C to 60°C) Recommended For Interior Use

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

UNIVERSAL TIME DELAY MODULE

TDM

PRODUCT DESCRIPTION

The TDM is a multipurpose micro-processor based timing module that can be used for a variety of applications. Its unique design and open architecture allows the TDM to be used in any type of application that requires timing control of up to two outputs with up to four inputs.

Common Applications include:

- Using the TDM to provide a simple time delay of 0-99 seconds.
- Using the TDM as a make/break relay to eliminate mechanical binding of the electrical locking mechanism on an automatic door. The make relay can even be configured as a wet output to directly apply power to the electric locking device.
- Using the TDM to sequence vestibule doors. One unit is capable of sequencing the vestibule doors from both directions.

The four inputs on the TDM allow sequencing or independent operation of the two outputs.

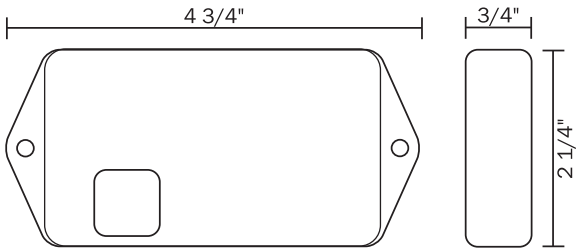

- Input 1 will sequence Output 1then 2.
- Input 2 will sequence Output 2then 1.
- Input 3 will operate Output 1 independently.
- Input 4 will operate Output 2 independently.

Both outputs on the TDM are programmable for “on time” duration as well as the delay time between the two outputs from 0 to 99 seconds

American National Standards Institute (ANSI) - Building Hardware ManufacturersAssociation (BHMA) - ANSI/ BHMA A156.10 & A156.19.

SPECIFICATIONS

Model	TDM
Power	12 to 24 V AC or DC
Power Consumption	2W Maximum
Output Contact	Form C, Rated At 3 Amps
Temperature	-22°F to 158°F (-30°C to 70°C)
Color	Flat Black
Enclosure	ABS Plastic
Weight	0.25 lb.
Physical Size	4 3/4”L x 2 1/4”W x 3/4”H

SPECIAL FUNCTIONS

Wet Output

- Allows installer to apply power directly to an electric locking device (eliminating need for separate transformer)

Pushbutton Fault Indicator

- Provides valuable diagnosticinformation to installer

Preprogrammable

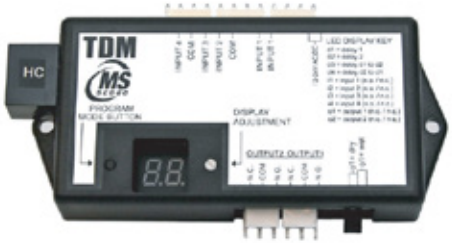

- Easily set-up on site or in advance using the LED Display
- Settings are stored in memory so TDM remembers settings (even after power failure)

COPYRIGHT 2018 INTERNATIONAL DOOR CLOSERS, INC

UNIVERSAL TIME DELAY MODULE

TDM-HC

HIGH CURRENT

PRODUCT DESCRIPTION

The TDM-HC is a multipurpose microprocessor based timing module that can be used for a variety of applications. Its unique design and open architecture allows the TDM-HC to be used in any type of application that requires timing control of up to two outputs with up to four inputs.

The first output of the TDM-HC has a capacity of 20 amps, making it compatible with every electronic locking device, including electric-latch-retraction exit devices

Common Applications include:

- Using the TDM-HC to provide asimple time delay of 0-99seconds..
- Using the TDM-HC as a make/break relay to eliminatemechanical binding of theelectrical locking mechanism onan automatic door.
- Using the TDM-HC to sequencevestibule doors. One unit iscapable of sequencing thevestibule doors from bothdirections.

The four inputs on the TDM-HC allow sequencing or independent operation of the two outputs.

- Input 1 will sequence Output 1then 2.
- Input 2 will sequence Output 2then 1.
- Input 3 will operate Output 1 independently.
- Input 4 will operate Output 2 independently.

Both outputs on the TDM are programmable for “on time” duration as well as the delay time between the two outputs from 0 to 99 seconds

SPECIAL FUNCTIONS

Pushbutton Fault Indicator

- Provides valuable diagnostic information to installer

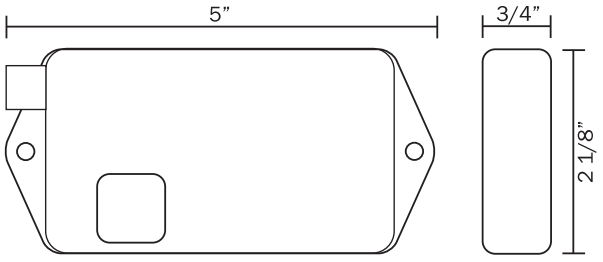

Preprogrammable

- Easily set-up on site or inadvance using the LED Display
- Settings are stored in memoryso TDM-HC remembers settings (even after powerfailure)

American National Standards Institute (ANSI) - Building Hardware ManufacturersAssociation (BHMA) - ANSI/ BHMA A156.10 & A156.19.

RELAY LOCKOUT MODULE

RLM

WITH SAFETY BEAMS

PRODUCT DESCRIPTION

The RLM is a microprocessor based relay lockout module with safety beams designed to meet the ANSI A156.10 2005 requirements that one-way traffic power operated pedestrian swing doors (typically supermarket doors) have an additional safety device installed when the overhead safety sensor is prevented from providing a safety signal during the closing cycle.

The RLM is equipped with Intelligent Door Position™ monitoring circuitry that will automatically identify a swing door's open and closed positions and determine its closing time.

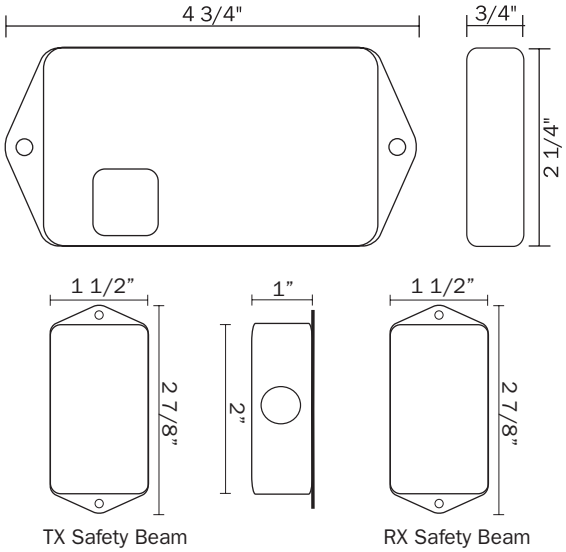

The RLM then controls the approach sensor, overhead safety sensor and safety beams. The proprietary software monitors the door's position and controls when to inhibit the signal from the overhead safety sensor during the closing cycle while simultaneously monitoring the safety beams and when to prevent reactivaiton of the approach sensor. By providing a single-source control for the approach sensor, overhead safety sensor and safety beams, the RLM streamlines installations by eliminating products and speeds up installation time by ending "trial and error" manual adjustments.

The RLM can also be used on operators not equipped with a safety circuit providing a more economical upgrade alternative to replacing expensive operator controls.The RLM is for use on electro mechanical operators only.

American National Standards Institute (ANSI) - Building Hardware ManufacturersAssociation (BHMA) - ANSI/ BHMA A156.10 & A156.19.

INTELLIGENT DOOR POSITION™

SAM

SECONDARY ACTIVATION MODULE

PRODUCT DESCRIPTION

The SAM is a microprocessor based secondary activation timing module designed to meet the ANSI A156.10 2005 requirements that knowing act power operated pedestrian swing doors (typically hospital corridor doors) include an approach sensor on the non-swing side of the door that is only active while the door is open or in its closing cycle.

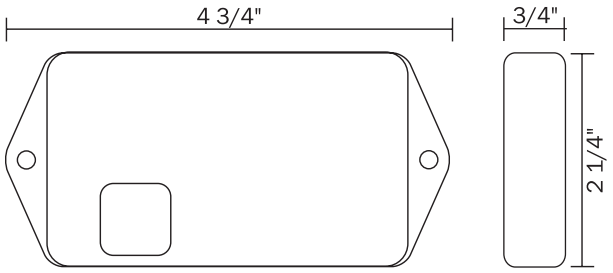

he RLM is equipped with Intelligent Door Position™ monitoring circuitry that will automatically identify a swing door's open and closed positions and determine its closing time.

The SAM is equipped with Intelligent Door Position™ monitoring circuitry that will automatically identify a swing door's open and closed positions and determine its closing time. The SAM then controls the push plate wall switch (knowing act), approach sensor (secondary activation) and overhead safety sensor. The proprietary software monitors the door's position and controls when to turn on and off the approach sensor after the push plate is activated while simultaneously monitoring the overhead safety sensor and locking out its signal during the door's closing cycle. By providing single source control for the push plate, secondary activation sensor and overhead safety sensor, the SAM streamlines installations by eliminating products and speeds up installation time by ending "trial and error" manual adjustments.

The SAM can also be used on operators not equipped with a safety circuit providing a more economical upgrade alternative to replacing expensive operator controls.

The SAM is for use on electromechanical operators only.

American National Standards Institute (ANSI) - Building Hardware ManufacturersAssociation (BHMA) - ANSI/ BHMA A156.10 & A156.19.

PRIVACY TIMING MODULE

PTM

PRODUCT DESCRIPTION

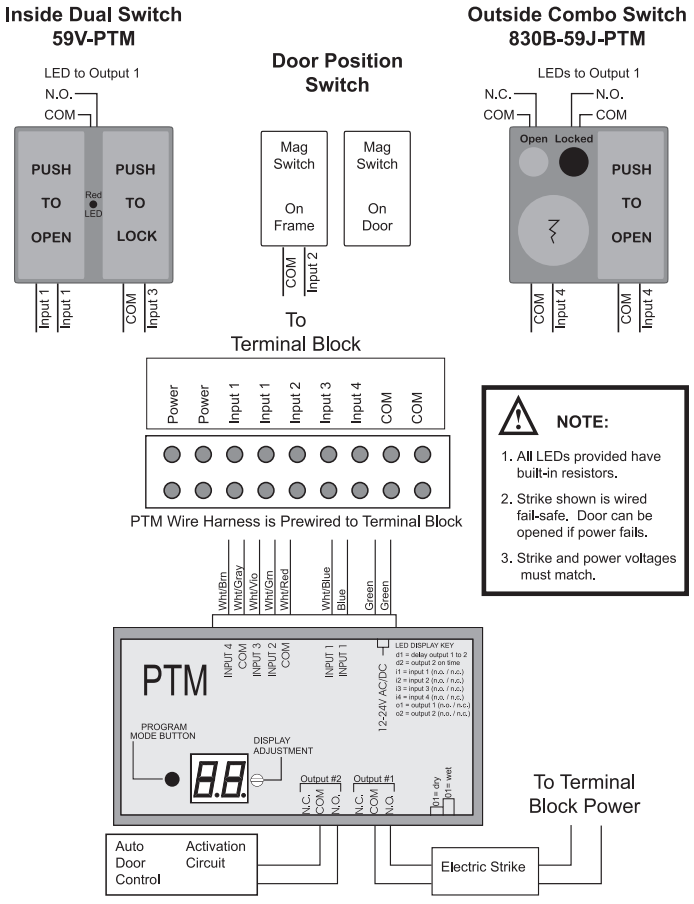

The PTM is a timing module that allows users to control an automatic door operator for a room where privacy is a concern, such as a washroom, restroom, clean room, or photo development room. From the outside of the room, users are able to activate the door. Once inside, users are able to lock the door which prevents access from the outside "push to open" button. When egress is desired, the user presses an inside "push to open" button which deactivates the lock and activates the door. A keyswitch override is present on the exterior, as well as LEDs to indicate if the room is occupied. Green indicates available while red indicates occupied.

The delay time between deactivating the lock and activating the door, as well as the "on time" for door activation are fully programmable.

SPECIFICATIONS

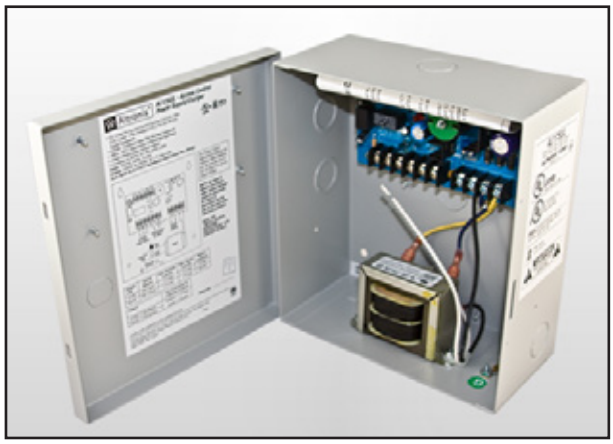

Model	PTM
Power	12-24V AC or DC
Power Consumption	2 W Maximum
Output Contact	Form C, Rated At 3 Amps
Relay Contact Rating	3A:120V AC; 3A:60V DC

Two (2) Output Switching Power Supply/Charger

POWER SUPPLY

AL175UL

AL175UL is a two (2) output Switching Power Supply/ Charger that converts a 115VAC 60Hz input into two (2) individually PTC protected 12VDC or 24VDC outputs.

Specifications

Input:

- Input 115VAC, 60Hz, 0.6 amp.
- Access control trigger input.

Output:

- 12VDC or 24VDC selectable outputs.
- 1.75 amp supply current.
- Two (2) Class 2 Rated power-limited outputs.
  - Fail-Safe/Fail-Secure lock output (switched).
  - Auxiliary power output (unswitched).
- PTC protected outputs, rated @ 2.5 amp.
- Filtered and electronically regulated output.
- Short circuit and thermal overload protection.

Battery Backup:

- Built-in charger for sealed lead acid or gel type batteries.
- Automatic switch over to stand-by battery when AC fails.
- Maximum charge current 0.4 amp.

Supervision:

- AC fail supervision (form "C" contacts).
- Supervised Fire Alarm Disconnect (Latching w/reset or Non-Latching).

Visual Indicators:

12VR REGULATOR MODULE

POWER SUPPLY

Dual 12VDC and 24VDC Output for IDC Power Supplies

12VR Voltage Regulator Module

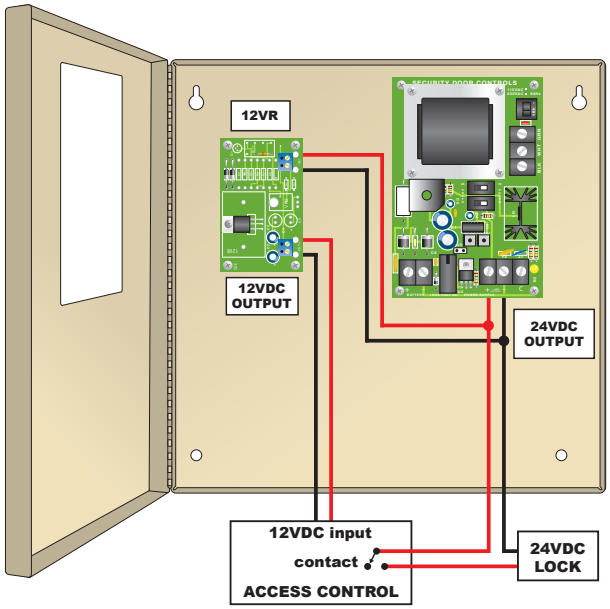

The addition of the 12VR module enables dual 12VDC and 24VDC output capability.

With the IDC 600 Series power supply output set at 24VDC for locking devices and components, the addition of the 12VR provides a separate 12VDC, 500 mA output for 12VDC Access Controllers and readers or other devices. The need for separate power supplies for 12VDC and 24VDC requirements within the same system is eliminated.

With the IDC 600 Series built in battery charger, the addition of batteries provides battery backup for both outputs. An auxilliary emergency release input is standard with IDC power supplies for failsafe locking systems.

Power Supply 12VR Capacity

602RF One Maximum
631RF One Maximum
632RF Two Maximum
634RF Four Maximum
636RF Six Maximum

Specifications

Model: 12VR
Input: 24VDC
Output: 500 mA @ 12VDC
Dimensions: 3.25"H x 2"W
(83mm x 51mm)

MODULAR ACCESS CONTROL POWER SUPPLY

602RF 1 AMP

POWER SUPPLY

Modular Access Control Power Supply

Field Selectable 12VDC or 24VDC Output - Standard
Dual 12VDC and 24VDC Output - Optional
California Compliant Manual Release Optional

UL LISTED

MADE IN THE USA

Access Control Systems Unit ALVY
Fire and Burglar Alarm Power Supply APHV
Releasing Device Accessory SYSW

All IDC power supplies are equipped with a high performance transformer and highly reliable electronic components. Filtering and output voltage regulation provide protection and ensure the longevity of all system components. With the addition of IDC programmable controllers or relay modules, the user-friendly modular designs ensure versatility, interface capability and easy installation of electric locking devices, access controls and related safety equipment.

Class 2 Outputs

To simplify installations that do not require conduit, a Class 2 output is standard and a 6-foot power cord is optional for the 115VAC input where permitted by code.

Modular Design

Door control relay modules are available to meet virtually any application need. All wiring for lock hardware, access controls remote control and monitoring is terminated at one central location. Installation and troubleshooting is simplified.

Modules may be factory installed or ordered separately for field installation as needed. All modules are individually fused for protection of multiple station systems.

Electrical Specifications

Input: 115VAC, 600 mA, 50/60 Hz (230VAC optional)
Output: 12/24VDC, 1 Amp
Battery Charger: 13.5/27VDC, 500 mA

Mechanical Specifications

Cabinet: 12" x 12" x 4", 18 GA
305mm x 305mm x 102mm

Features

Fire/Life Safety
A fire alarm input provides simultaneous release of all fail safe locks and door holders in case of an emergency.

Field Selectable Output
The output is field selectable to provide 12VDC or 24VDC.

Input and Output Protection
The AC input voltage is circuit breaker protected and the secondary output is PTC protected.

System Status
LED status indicators provide information regarding the AC input, DC output, and battery back up status. Outputs for remote annunciation are available.

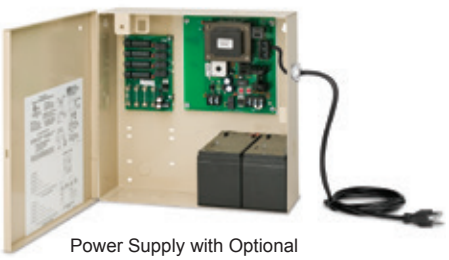

Battery Charging Output
A separate PTC protected charging output provides 13.5 or 27 volts to fully charge the batteries. The secondary output is always precisely maintained at 12 or 24VDC to protect locking devices and components from over voltage while the batteries are charging. The specified secondary output current is also maintained while batteries are charging. **De-rating of the secondary output current is not required when charging batteries.**

Low Battery Disconnect
Batteries are disconnected from the output circuit prior to deep discharge preventing battery destruction.

Door Control Modules
IDC relay modules may be incorporated in the power supplies to meet virtually any application requirement, for single or multiple door control.

MODULAR ACCESS CONTROL POWER SUPPLY

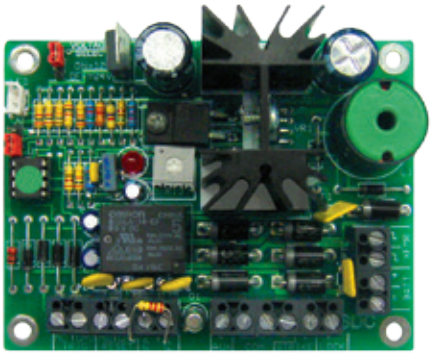

621 SERIES 1 AMP

POWER SUPPLY

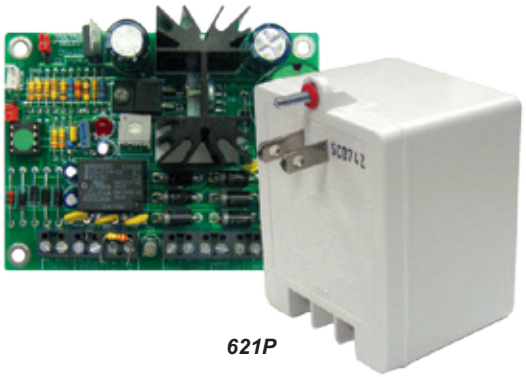

New Modular Access Control Power Supply-Easy as 1 • 2 • 3

The 621 Series access control power supplies are designed to support access controls and electric locking devices. Equipped with two power limited outputs, the modular design enables versatility for installations with or without battery back-up or fire command center interface for emergency lock release.

- 12VDC or 24VDC field selectable output
- 1 Amp maximum, filtered and regulated output
  - 1 power limited switched output
  - 1 power limited auxiliary output
- Two control inputs
  - 1 trigger input, normally open (NO)
  - 1 supervised emergency release input (latching with reset or non-latching)
- When latching emergency release is selected and the switched output is deactivated by emergency release or power loss, power is restored by manual means only.
- Short circuit and thermal overload protection
- Battery charger output
- Automatically switched to battery back-up when AC fails
- Board equipped with AC input, DC output and battery status LED indicator
- Enclosure equipped with AC input, DC output and battery status LED indicator

Modular Access Control Power Supply

Field Selectable 12VDC or 24VDC Output - Standard
Dual 12VDC and 24VDC Output - Optional

SIA *"Security Industry Finest" ISC Expo*

UL LISTED

MADE IN THE USA

ALVY - Access Control Systems Unit
URTZ - Fire and Burglar Alarm Power Supply
SYSW - Releasing Device Accessory

Quality, Performance & Versatility

The IDC 631RF Power Supplies have been developed specifically to support electric locks and access controls. The high performance, heavy-duty circuitry is ideal for inductive loads and multi-door applications. The modular design is built around several different application control modules to meet your specific needs for virtually any electric lock system. IDC power supplies are designed to provide a well organized installation for individual or multi-door systems that may include locking devices, access controls, station controls and consoles for remote control, annunciation and fire/life safety system interface.

Manufactured & Tested to Rigorous Standards

IDC 600 Series power supplies are manufactured according to **ISO 9001** certified quality standards.

Tests are conducted according to tough UL 1481 criteria for specific use with access controls, fire and burglary applications.

Modular Design

Ten different, individually fused door control modules are available for virtually any application. Time delays, latching relays and multiple station circuit breaker modules are available for custom configuration in the field or at the factory.

DIP Switch System Operation

Specification of the UR Universal Access Hardware Controller provides for six standard DIP switch selectable system and mantrap variations for multiple door systems.

Features

Filtered and Regulated
The output filtering stabilizes the DC output voltage and eliminates AC line noise. The solid state regulator maintains the selected output voltage at 12VDC or 24VDC regardless of the output load changes, including battery charging.

Field Selectable 12 or 24VDC
The output is field selectable for 12 or 24VDC output.

250 mA Battery Charger Output
A separate PTC protected, battery charger output provides 13.5VDC or 27VDC.

LED System Status Indicator
Amber - AC and DC voltages are OK
Green - No DC output
Red - No AC input, powered by batteries

Class 2 Outputs
Where permitted by code, conduit is not required when using Class 2 outputs.

Large Heavy Gauge Enclosure
Model 631RFA is housed in a 16 gauge, 16"W x 14"H x 6.5"D cabinet large enough to accommodate several additional modules and six 7 Amp hour batteries with plenty of room for wiring.

Value Added Features

Emergency Release Input
The Fire/Life Safety emergency release input is standard on all IDC power supplies.

Low Battery Disconnect
Batteries are disconnected from the output circuit prior to deep discharge preventing battery destruction.

Isolated Charging Circuit
While the charging output is 13.5VDC or 27VDC, the secondary output is unaffected and precisely maintained at the selected 12 or 24VDC. This ensures system components are powered by their specified voltage.

The secondary output current is maintained at the full 1.5 Amp capacity and is not de-rated when charging batteries.

MADE IN THE USA

Access Control Power Supply - ALVY
General Purpose Power Supply - QQFU/QQFU7

Quality, Performance & Versatility

The IDC 632RF Power Supplies have been developed specifically to support electric locks and access controls. The high performance, heavy-duty circuitry is ideal for inductive loads and multi-door applications. The modular design is built around several different application control modules to meet your specific needs for virtually any electric lock system. IDC power supplies are designed to provide a well organized installation for individual or multi-door systems that may include locking devices, access controls, station controls and consoles for remote control, annunciation and fire/life safety system interface.

Modular Design

Ten different, individually fused door control modules are available for virtually any application. Time delays, latching relays and multiple fuses are available for custom configuration in the field or at the factory.

DIP Switch Select System Operation

Specification of the UR Universal Access Hardware Controller provides for six standard DIP switch selectable system and mantrap variations for multiple door systems.

Manufactured & Tested to Rigorous Standards

IDC 600 Series power supplies are manufactured according to **ISO 9001-2000** registered quality standards. Tests are conducted according to tough UL criteria.

Features

Filtered and Regulated
The output filtering stabilizes the DC output voltage and eliminates AC line noise. The solid state regulator maintains the selected output voltage at 12VDC or 24VDC regardless of the output load changes, including battery charging.

Field Selectable 12 or 24VDC
The output is field selectable for 12 or 24VDC output.

Battery Charger Output
A separate PTC protected, battery charger output provides 13.5VDC or 27VDC.

LED System Status Indicator
Amber - AC and DC voltages are OK
Green - No DC output
Red - No AC input, powered by batteries

Class 2 Output
Where permitted by code, conduit is not required for the Class 2 output.

Large Heavy Gauge Enclosure
Model 632RF**A** is housed in a 16 gauge, 16"W x 14"H x 6.5"D cabinet large enough to accommodate several additional modules and six 7 Amp hour batteries with plenty of room for wiring.

Value Added Features

Emergency Release Input (Standard)
A signal input from the fire life safety system turns off the secondary output releasing all failsafe locks. When not used for emergency release, this input may be used as main on-off control.

California Compliant Manual Reset of Emergency Release and AC Power Loss (Optional)
When this feature is required, should an AC power loss occur or the emergency release input is actuated, personnel must restore secondary output power manually at the power supply after the emergency release signal is reset and/or AC power is restored.

Low Battery Disconnect (Standard)
Batteries are disconnected from the output circuit prior to deep discharge preventing battery destruction.

Isolated Charging Circuit (Standard)
While the charging output is 13.5VDC or 27VDC, the secondary output is unaffected and precisely maintained at the selected 12 or 24VDC. This ensures system components are powered by their specified voltage.

The secondary output current is maintained at the full 2 Amp capacity and is not de-rated when charging batteries.

Quality, Performance and Versality

The IDC 634RF Power Supplies have been developed specifically to support electric locks and access controls. The high performance, heavy-duty 4 Amp circuitry is ideal for inductive loads and multi-door applications. The modular design is built around several different application control modules to meet your specific needs for virtually any electric lock system. Documentation is provided to ensure a well organized installation for individual or multi-door systems that may include locking devices, access controls, station controls and consoles for remote control, annunciation and auxiliary emergency release interface. IDC 600 Series power supplies are manufactured according to ISO 9001 - 2000 certified quality standards.

UL LISTED
Access Control Power Supply - ALVY
General Purpose Power Supply - QQFU/QQFU7

Modular Design

Ten different, individually fused door control modules are available for virtually any application. Time delays, latching relays and multiple station circuit breaker modules are available for custom configuration.

DIP Switch Select System Operation

Specification of the UR Series Access Hardware Controller provides for six standard DIP switch selectable system and mantrap variations for multiple door systems.

Features

Filtered and Regulated
The output filtering stabilizes the DC output voltage and eliminates AC line noise. The solid state regulator maintains the selected output voltage at 12VDC or 24VDC regardless of the output load changes, including battery charging.

Field Selectable 12 or 24VDC
The output is field selectable for 12 or 24VDC output.

Class 2 Output
The 634RF Power Supply may be configured to use one 4 Amp output or two 2 Amp, Class 2 outputs. Where permitted by code, conduit is not required for low voltage wiring when using Class 2 outputs. The total current draw from all outputs must not exceed 4 Amps.

Battery Charger Output
A separate PTC protected, battery charger output provides 13.5VDC or 27VDC.

LED System Status Indicator
Amber - AC and DC voltages are OK
Green - No DC output
Red - No AC input, powered by batteries

Large Heavy Gauge Enclosure
Model 634RF is housed in a 16 gauge, 16"W x 14"H x 6.5"D cabinet large enough to accommodate several additional modules and six 7 Amp hour batteries with plenty of room for wiring.

Value Added Features

Emergency Release Input (Standard)
A signal input from the fire life safety system turns off the secondary output releasing all failsafe locks. When not used for emergency release, this input may be used as main on-off control.

California Compliant Manual Reset of Emergency Release and AC Power Loss (Optional)
When this feature is required, should an AC power loss occur or the emergency release input is actuated, personnel must restore secondary output power manually at the power supply after the emergency release signal is reset and/or AC power is restored.

Low Battery Disconnect (Standard)
Batteries are disconnected from the output circuit prior to deep discharge preventing battery destruction.

Isolated Charging Circuit (Standard)
While the charging output is 13.5VDC or 27VDC, the secondary output is unaffected and precisely maintained at the selected 12 or 24VDC. This ensures system components are powered by their specified voltage.

The secondary output current is maintained at the full 2 Amp capacity and is not de-rated when charging batteries.

DOOR CONTROL MODULES

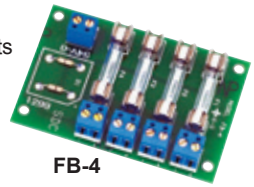

DOOR CONTROL

Door control relay modules ensure compatibility of access hardware components and simplify system installation and troubleshooting. Different modules may be specified for one power supply.

The isolated relay design allows small gauge cable runs of 22 gauge wire up to 1000 feet from the trigger device to the module.

MULTIPLE FUSED OUTPUT

FB-4 Four 2 Amp fuse protected outputs allow for precisely calculated circuit protection. Four modules provide 16 outputs.

UNIVERSAL DOOR CONTROL

MODULES

Field Programmable Access Hardware Controller

The UR4A is capable of providing the logic of 8 relays.

Time Delay Logic

Latching or Conventional Relay Logic

"Security Industry Finest"
ISC Expo East and West

UR-2A Two Station Controller
UR-4A Four Station Controller
6 Field Selectable Application Modes

The UR series is a microprocessor based controller that provides 7 different, field selectable application modes for two, three or four stations. 1 or 2 controller may be installed in IDC 600 series power supplies. Single and multiple controllers may be mounted in remote junction boxes and powered by a single power supply.

Interface and Centralized Wiring

The UR Series Access Hardware Controller provides complete system interface capability and centralized wiring of all components, including; access controls, electric locks, peripheral equipment and monitoring contacts.

Reduced Components and Engineering

Applications that require several individual relays may be costly and complicated, requiring additional engineering time to produce the proper system logic. The UR eliminates the need for multiple or different relays. All system logic is reduced to one controller.

Selectable Output Modes

- Conventional Relay
- Latching Relay (pulse on, pulse off)
  Latch individual station or all stations
- Time Delay Relay 1-35 seconds
- *Dual, Latching & Time Delay Relay
- Mantrap - All doors normally locked
- Interlock - All doors normally unlocked
- Interlock - 1 door locked, 1 door unlocked. **UR-2A only**

*Primary input triggers the Time Delay
Auxiliary input triggers latch function

The relay mode may be different per individual station. When mantrap or interlock mode is selected all outputs operate the same.

Documentation

Several access control and mantrap system wire diagrams are provided for common applications.

UR-2A Specifications

PTM-10AL **US28** equivalent, Aluminum Powder Coat

PTM-10BZ **US10B** equivalent, Dark Brown Powder Coat

FEATURES

- Power control input for electric locks and exit devices, locked, latched, mantrap, forced entry, open status signal wiring
- Mortise door and frame installation. The PTM is completely concealed when the door is closed.
- All metal design with stainless steel tubular wire transfer and heavy cast housing with steel back boxes provide weather and tamper resistance when door is open or closed.
- Fasteners for wood, steel and aluminum doors and frames included
- UL Listed Miscellaneous Fire Door Accessories
  - UL 10C Listed for up to 3 Hr Fire Rated doors and frames
  - Classified according to Uniform Building Code (UBC)
- Standard 7-2, "Fire Test of Door Assemblies" (1997)

IDC's heavy duty Electric Power Transfer Device provides a concealed and secure means of transferring electric lock and exit device power and signal wires from the frame to the door.

Completely concealed when the door is closed the PTM Electric Power Transfer Device is ideal for heavy traffic and applications requiring higher security to inhibit tampering and abuse.

COMPATIBLE OPENINGS

- 1-3/4" thick doors
- 0 - 180° opening swing with up to ¾" offset pivots
- 0 - 180° opening swing with up to 5" wide butt hinges
- 0 - 130° opening swing with up to 5-1/2" wide butt hinges
- 0 - 130° opening swing with up to 6" wide butt hinges

Not Compatible with: Center Hung Doors, Swing-Clear Hinges, Pocket Pivots, Butt Hinges Larger Than 6", And 1-1/2" Offset Pivots

Housing Dimensions:

- 9" H x 1-1/4" W x 1-5/8" D (229mm x 32mm x 41mm)

Cylindrical lock

Mortise lock (also mortise deadbolt and mortise exit device)

Rim exit device

Pair Opening

16 gauge min.- CR, A60, SS (doors and frame)
Hardware:

- **Cylindrical lock/Surface bolt**
- **Mortise lock (also deadbolt and mortise exit device)/ Surface bolt**
- **Rim exit device/Rim exit device/Hardware mullion**
- **Concealed vertical rod/Concealed vertical rod**
- **Surface vertical rod/Surface vertical rod**
- **State of Florida DBPR Approved**
- **Contact customer service for additional information, limitations and expanded product availability**

THERMAL RATED PRODUCTS

IDC products were one of the first steel door companies to test to the new and improved test standards. Door testing resulted in a wide range of products being added to our portfolio of doors for exterior applications. Results are based on actual data collected during laboratory testing of full door openings.

IDC doors have been tested for performance in accordance with ASTM C1199-09 Standard Test Method for Measuring the Steady-State Thermal Transmittance of Fenestration Systems Using Hot Box Methods

Products are available with U-factors ranging from 0.57 to 0.36 (R= 1.75 to 2.75). Steel stiffened, polystyrene and polyiso doors were included in the tests. Ratings are significantly better than those obtained from tests performed on wood and aluminum doors.

Thermal performance tests measure a door's thermal conductivity known as "U-Factor" and its inverse which is termed thermal resistance or R-Value. U-factors have units in the Inch-Pound system of BTUs per hour per square foot per degree (Fahrenheit) or Btu/hr-ft2-F. R-values have the rather unintuitive units of: hr-ft2-F/Btu. U-factor is based on measured heat flow through a sample at the temperature difference of the air on the indoor and outdoor sides. New test criteria provide realistic values representative of actual room conditions and are based on the full surface of an operable door rather than just the center portion of the door surface as with old test procedures.

Associated Standards:

- ASTM C1363-05 Standard Test Method for Thermal Performance of Building Materials and Envelope Assemblies by Means of a Hot Box Apparatus
- ASTM E1423-06 Standard Practice for Determining Steady State Thermal Transmittance of Fenestration Systems.
- SDI 113 Standard Practice for Determining the Steady State Thermal Transmittance of Steel Door and Frame Assemblies.
- ASTM C1363 alone is not intended to determine performance of fenestration systems.
- ASTM C1199 has been established for this purpose and is used in conjunction with ASTM E1423 and ASTM C1363. (Source reference ASTM C1363, Scope, para 1.8- http://www.astm.org/Standards/C1363.htm)

Contact customer service for additional information and product availability

THERMAL RATED PRODUCTS

Sound rated doors by IDC have been tested and certified by nationally recognized testing laboratories. All doors are 1 3/4" thick and do not require cam lift hinges. Rated frames are also available. We match other manufacturers' hardware locations at no extra cost.

Sound Rated Products

Testing and certification in accordance with the following national test standards:

- ASTM E90-09 Standard Test Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions and Elements
- ASTM E413-10 Classification for Rating Sound Insulation
- ASTM E1332-10a Standard Classification for Rating Outdoor-Indoor Sound Attenuation
- ASTM E2235-04 Standard Test Method for Determination of Decay Rates for Use in Sound Insulation Test Methods

Hardware Options Tested

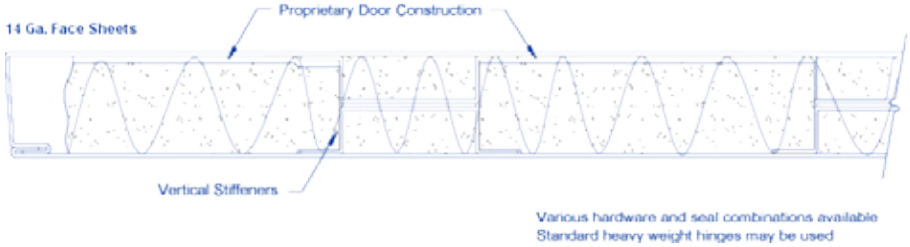

- Cylindrical lock prep
- Mortise lock prep
- Regular heavy weight butt hinges

Seals and Gasketing

- Provided for operable units

Ratings

- **STC 49 (operable)**
- **STC 48 (operable)**
- **STC 47 (operable)**
- **STC 39 (operable)**
- **STC 36 (operable)**
- **STC 52 (fully sealed/inoperable with hardware preps)**
- **STC 51 (fully sealed/inoperable with hardware preps)**
- **Operable standard polystyrene core available with STC 28 (18 ga. std. const.)**
- **Operable standard temp rise available with STC 36 (18 ga. std. const.)**
- **Inoperable proprietary polystyrene based core available with STC 43 (16 ga.)**
- **Frames grouted**
- **Contact customer service for additional information.**

METAL FRAMES

FEATURES

IDC custom steel frames are manufactured to the highest industry standards with many features exceeding the minimum requirements of the standards. Fabrication is in accordance with HMMA 860, HMMA 861 and ANSI A250.8

FRAME CONSTURCTION DETAILS

FRAME CORNERS AND BUTTED MULLION CONNECTIONS ARE CONTINUOUSLY WELDED AND FINISHED SMOOTH.

BEFORE BEING PAINTED WITH A RUST RESISTANT PRIMER, FRAMES ARE THOROUGHLY CLEANED AND DEGREASED USING A LIQUID IRON PHOSPHATE PROCESS.

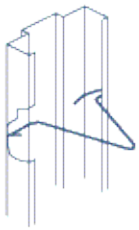

FACTORY APPLIED PRIMER MEETS ALL REQUIREMENTS OF ASTM B117 AND ANSI A224.1.

PRIMER TEST RESULTS:

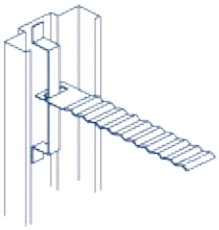

SALT SPRAY	120 HOURS
HUMIDITY	240 HOURS
IMPACT	PASSED
ADHESION	PASSED

HIGH QUALITY PRIMER ASSURES A SURFACE READY FOR FINISH PAINT APPLICATION.

Basic fire doors, double egress and stainless steel doors are available with prep for ceramic glazing as follows:
3 Hour "A" label- Max. exposed glass up to 100 in^2. (No dimension shall exceed 33")
1 1/2 Hour "B" label- Half glass up to 36"x56 1/2" or 2031 in^2 max.
1 Hour "B" label, 3/4 Hour "C" label or 20 minute- Full glass up to 36"x89" or 3204 in^2 max.

Notes:
(1) Max. louver size 24"x24"
(2) Max. 8'0x7'2 1 1/2 Hour with OBS
(3) Includes Double Egress and Stainless Steel Doors
